INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics	
Code: KM/ SPOMdb/KOC/17	Name: Communication practices
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Exam in written form: max. 100 points. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The purpose of the object is to develop the basic communication skills through the transfer of knowledge through the use of training methods. The essence of employment, self-interest involvement and problem centric learning. In the training, we demonstrate communication situations with the involvement of the students. Tests are used to map situations. We discuss the theoretical knowledge about communication situations.	
Brief syllabus: <ol style="list-style-type: none">1. Introduction to the subject, way of examining2. Behavior in communication3. Emotional abilities4. Cognitive abilities5. Communication skills6. Social skills and social feedback7. Feedback mechanism8. Video feedback9. Develop of the self-knowledge10. Training methods11. Solving tasks with feedback12. Solving tasks with feedback13. Solving tasks with feedback

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics	
Code: KMI/ SPOMdb/MAT1/16	Name: Matematika 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 2 For the study period: 26 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written tests by 35 points and for the active work of student in WebWork-system can the student obtain 30 points. Of the total of 100 points it is needed to obtain at least 90 points on the valuation A, for grade B is necessary to obtain 80 points, for grade C at least 70 points, for grade D at least 60 points and for grade E at least 50 points. If this condition is not met, a written test will be given in the exam period to obtain max. 70 points. Points earned in WeBWoRK will be counted in the overall rating.	
Results of education: After successfully completing the subject, the student learns the basics of of differential calculus of real functions of one variable. Students are able to solve basic problems of differential calculus, find local extrema of functions and investigate the course of functions. The student also knows the basic concepts of linear algebra and he can solve systems of linear equations by inverse matrix, determinants, or by the elimination method. Students learn the basics of the differential calculus of real functions of multiple variables, partial derivations, and economic applications of local extremes. In addition they master the basics of linear and nonlinear programming.	
Brief syllabus: 1. Sequences, monotony, boundary, limit of sequence. 2. Limit and continuity of the real function of one real variable. 3. Differential calculus of the real function of one real variable. Applications for economics. 4. Monotonicity and convexity of function. Function flow. Optimization. 5. Vectors and matrices. Operations. 6. Linear independence of vectors. 7. Systems of linear equations. Determinant, basic properties and applications. 8. Eigenvalues and eigenvectors of matrices. 9. Real functions of multiple Variables, Quadratic forms. 10. Differential calculus of functions of multiple variables, partial derivations. 11. Jacobi and Hess's matrix. Convex and concave functions. 12. Local extrema of multivariable functions. Bound extremes. 13. Lagrangian function, Lagrange multiplier.

If this condition is not met, a written test will be given in the exam period to obtain max. 70 points. Points earned in WeBWoRk will be counted in the overall rating.	
Results of education: After successful completion of the subject, the student learns the basics of integral calculus, basic theorems of indefinite integral and Riemann integral, infinite numerical series and functional series. The student will get a basic overview of the theory of probability. The student will get a basic overview of the theory of probability. The student understands the basic concepts and can calculate the probability of an event. Using random variables, he can describe a random event and calculate its numeric characteristics.	
Brief syllabus: 1. Numerical and functional series 2. Indefinite integral and primitive function, primitive function of elementary functions. 3. Basic methods for determining the integral: per partes, substitution. 4. Definite integral. Newton-Leibniz formula. Improper integral. 5. Integral calculus of multivariable functions 6. Random event. Operations. Probability. 7. Conditional probability, Bayes' theorems. 8. Random variable. Probability distribution, numerical characteristics. 9. Expected value, standard deviation. 10. Two-dimensional distribution, independence. 11. Laws of large numbers. 12. Types of random variable distribution. 13. Chebyshev's inequality. Central limit theorem

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics	
Code: KM/ SPOMdb/MEM/17	Name: International Marketing
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 2 For the study period: 26 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites: KM/SPOMdb/MRK/17	
Conditions for passing the subject: Colloquium and term project. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The subject concentrates for the company’s marketing policy in international environment. It analyses the environment, the expectations and possibilities of its adaptation. The students get knowledge about the different marketing activities in international business environment. They study the characteristics of marketing tools in international business life and they can apply this knowledge in the practice too. After this course the students can plan an international introduction of a certain product.	
Brief syllabus: 1. Introduction to the course, exam conditions 2. The basic definitions of international marketing 3. Cultural environment of international marketing 4. Adaptation, expectations and opportunities of environment 5. Companies’ strategies and market steps. 6. The planning and steps of business activities 7. International product introduction 8. Determination of target markets, international market strategies 9. International market research 10. International product policy 11. International pricing policy 12. International distribution 13. International marketing communication

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics	
Code: KM/ SPOMdb/MUC/17	Name: Managerial accounting
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 2 For the study period: 26 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites: KEK/SPOMdb/UCT1/17	
Conditions for passing the subject: The student's knowledge is assessed by written exam and/ or oral exam in the exam period. The available total score is 100 points on exam. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The subject deals with thematize of accounting, comparing managerial and financial accounting, goals, tasks and areas of management accounting.	
Brief syllabus: The subject describes conceptual cost apparatus, classification of costs, cost calculation, business calculations and cost calculation methods, cost calculation and management trough ABC method. It deals with the issues of calculation, recognition and cost control. It appropriates students with direct and indirect costs, calculation of the economic result, planning and optimization of the economic result and pricing of own performances. The student will get an overview of accounting issues related to decentralization and the transfer pricing system. It presents the relation between short and long-term planning, investment decisions and accounting support for the establishment and control of the capital budget. The subject will inform students about the budget preparation process, the specific features of the fixed and variable budgets, the methodology for the compilation and control of the operational and financial budgets. The student is able to interpret cost-related information and the basic links between them after learning the topic of the subject. Students recognize the theoretical and methodological basics of management accounting, management accounting techniques and practices related to the planning, management and control of business processes. Students will also learn about the possibilities to support managerial decision-making through data obtained from accounting in the subject.
