INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ IKT/18	Name: Mediocre Communication Technologies in Education
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2., 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, students study original information resources on media and communication technologies, education technology and information and communication technologies. They work independently on their semestral work and teaching resources throughout the semester. At the beginning of the semester, they have clearly defined assignments and method of classification. Students present their semestral work and the created teaching aid that they can create for any lesson in front of their classmates, after which a discussion is also included. The activity of students at seminars during the semester is also monitored. Active students receive a bonus that is added to the overall student rating. The course is completed by graded credit. Classification is determined based on the quality of the semester work and the creation of a teaching aid for any lesson and its level of presentation, plus bonuses earned per semester. Students must earn at least a 50% credit rating for the subject. At least 90%, B at least 80%, C at least 70%, D at least 60%, E at least 50% are required to obtain classification A. The student has the opportunity to improve his / her classification by completing or revising his / her semester work.	
Results of education: The main result of the course is for students to acquire knowledge and practical skills and abilities to apply and use classical audiovisual and modern multimedia presentation systems in the classroom.	
Brief syllabus: Implementing ICT in teacher training and in the teaching process. Didactic technology, educational strategies. Basics of didactic materials creation Didactic means. Principle of illustration and effectiveness of teaching aids in teaching. Classification of teaching aids. Categories of didactic technology. Internet and its possibilities in mass and personal communication, effects of media on man PowerPoint environment options Simple animations, running ready-made applications Working with sound, sequence, timing Data processing Management of didactic presentation	

Basics of working environment
Creation of own application with didactic intention
testing
Work with projector, multimedia

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ PVC/18	Name: Leisure Time Pedagogy
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The final evaluation shall be a summary assessment of the students' theoretical knowledge and practical skills and of their work over the course of the half-year. Students are preparing separate half-year jobs. In small groups, a well-designed tour will be developed, which will be presented together by the group. A small group seminar of 5 pages (A4, v. p.: 12, r.: 1,5) will create a fictitious tour that will be prepared according to current standards. Work includes: The travel program, the steps before and after each journey and the economic costs of organization. Assessment criteria (max. Score 50): The formal aspect of the seminar work, the feasibility of content and application options for pedagogical practice, the practical implementation of teaching activity, team work, feasibility and content of self-awareness, development plan. Knowledge monitoring (open and closed issues) in the field of free time pedagogues, the situation of out-of-school pedagogic science, principles, methods and forms of non-academic education. Participation in the written knowledge check is conditional on the fulfillment of the ongoing conditions for the taking of credits (participation, preparation of seminars). Assessment criteria (maximum score 50): The minimum requirement for completion of the written part of the subject is 26 points (minimum 51 %). Successful completion of the course requires at least 50% of the maximum possible assessment of the course. The assessment is on a scale: A-90-100%, B-80-89%, C-70-79%, D-60-69%, E-50-59%, FX 49% and less Total student workload (module 2•): 3 credits = 90 hours participation in 26 hour lectures and seminars (contact); 30 hours of self-study; 34 hours of preparation for half-year work.	
Results of education: Knowledge: The student is able to work with theoretical knowledge. The student is able to work with basic legal knowledge in organization, excursions, courses, camps. The student will be able to find out about free time teachers on the Internet, to deal with and work on literature. Capabilities: The student is able to learn about the teaching methods. The student has the ability to expand his or her knowledge and self-training. The student can create his/her own teaching methods. The student will be able to develop its own event options which it will be able to organize in the future. The student can work in a team.	

Competences:

The student will be able to apply his knowledge of the future in his work. It will be able to interact with different age groups and institutions. The student can organize excursions, courses, and camp. The student is able to develop self-training in a targeted way. The student is able to independently design activities that enhance his or her knowledge and contribute to his or her choice of profession. The student is able to establish a reliable, helpful, encouraging, attentive and accepted attitude, learn about and manage the way others work.

Brief syllabus:

History of free time pedagogues.

The situation of out-of-school pedagogical science.

Principles, methods and forms of education other than teaching.

Education for a healthy lifestyle.

Free time pedagogy.

Family education.

Institutional education.

Educational establishments outside the classroom.

The rules governing the organization of excursions.

The legal provisions governing the organization of journeys.

Legislation on the organization of camps and training courses.

Presentation - individual projects developed by students.

Group lectures - present projects on various courses and the development of camps.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ TAB/18	Name: Camping Course
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3., 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The following conditions shall apply to the subject: General conditions for the performance of the subject -the final assessment is a summary assessment of the theoretical and methodological knowledge and practical skills of swimming and the taste, with an emphasis on the use of competences in basic education. -during the course, the students will perform daily hands-on classes. They present methodological skills in the delivery of educational content. -completion of the subject shall be conditional on the development of a six-year work on issues related to the specificities of physical activity in the aquatic or winter environment, aimed at the chosen level of education and at achieving the educational content according to the initial training course or course. -the specific theme selected will be defined at the beginning of the course in agreement with the teacher. Evidence of theoretical knowledge is provided in writing at the end of the course (open and closed questions). Specific conditions for the performance of the subject: <ul style="list-style-type: none"> ● active participation in practical training — participation in practical and theoretical instruction in the course, where knowledge of the swimming methodology and basic practical skills of the ski-training methodology are presented. Assessment criteria: Active participation and fulfillment of the content of the course theory and practice activities. (pass/no) Information on the accompanying text document <ul style="list-style-type: none"> ● half-year work in 5-8 pages (e.g. Ms Word, A4, minimum 10 pages, A4 format, 12-point times new Roman font, line spacing: 1,5), developing the specific features of kinesthetic activities in the aquatic environment and in the winter environment for a selected stage of education and content implementation during the course of the floating training course and/or ski course (development of a part of the curriculum selected from subjects jointly defined by the instructor at the beginning of the course) (max. number of points: 15). Assessment criteria (max. Score 15): The form to be submitted, the content and application possibilities, the pedagogical practice, the awareness and correct application of existing legislation, the quality of the processing of the selected topic.	

- evaluation of the effectiveness of the text document (15 points):
- topic description, good practice planning (4 points),
- underbuilding of good methodological practices on the subject (7 points),
- description of the legal context (2 points),
- content and format requirements (2 points).
- use the correct method - during swimming instruction or skiing training - teach hour (max. number of points: 15).

Assessment criteria: Use of appropriate practices and good methodological sequences to achieve the goal of the clock; good pedagogical judgment and the resolution of specific problem tasks during teaching, error correction.

- final exam - (open and closed questions) on swimming instruction or ski instruction, methodology, lesson planning.
- Safety standards and legislation for the training of swimming pools and skiing courses. Courses, first aid, nature conservation principles, a program of physical activity in the aquatic and winter environments in terms of education standards (ISCED).

Assessment criteria (maximum score 30): The minimum requirement for written completion of the subject is 16 points (minimum 50 %).

- successful completion of written completion of the subject,
- written assessment of its effectiveness (50 points):

- 46 to 50 points A,
- 41 to 45 points B,
- 36 to 40 points c,
- 31 to 35 points D,
- 26 to 30 points E,
- 0 to 25 points FX.

Total student workload: 4 credits = 120 hours

40 hours of attendance at lectures and exercises (contact); 30 hours of self-study; 25 hours of study preparation; 25 hours of practical swimming instruction or ski instruction with different tasks.

Results of education:

Knowledge:

- The student is able to work with theoretical knowledge.
- The student is able to develop preparedness for child and youth health practices.
- The student can develop various tools to improve the mobility of children, young people and the adult population.
- The student can set up specific warm-up exercises per age group.

Capabilities:

- The student will be able to navigate through the field of health and physical activity SEP.
- The student has the ability to expand his or her knowledge and self-training.
- The student is able to develop their own preparedness and health practices for different age groups.
- The student is able to apply sentence-related knowledge in practice.

Competences:

- The student will be able to apply his/her knowledge in the course of his/her future work.
- It can make contact not only with children, but also with parents and adults.
- The student has the ability to provide professional reasons for his activity.
- The student is able to implement a targeted self-training development.
- The student is able to independently design activities that enhance his or her knowledge and contribute to his or her choice of profession.

- The student is able to demonstrate a reliable, helpful, encouraging, attentive and accepted attitude, to create an atmosphere open to knowledge.
- The purpose of this course is to acquire basic knowledge of the organization of physical education courses, camps, the development of mobility patterns, the improvement of physical performance, the development of intellectual skills, the understanding of the role of physical movement as a personal and health promotion tool are tools for regenerating physical and psychological strength.

Brief syllabus:

Opportunities to achieve the content of AOP in schools for student education, kinesthetic activities in school-to-water and winter environments. Developing mobility skills (walking, running, jumping, climbing) in the aquatic or winter environment. The use of induced kinesthetic games in aquatic or winter environments. Water is used as a playful method. Fundamentals of Shizes on flat terrain. Use of various aids. Types of modes of transport, floating ports and water activities. Knowledge and application of basic techniques, methods and techniques in situ. Principles for the organization of physical activities in the aquatic or winter environment (nursery). Selection, planning and preparation of the content of a floating or ski course. Tangible assets required to achieve float or taste. Safety and regulatory requirements for the conduct of floating or ski courses. Use of new teaching tools and teaching methods.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ TOV5/18	Name: Thematic Areas of Education 5
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 2 For the study period: 13 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Active participation in lectures and seminar work. The content of the seminar work will be the conception of a part of the educational plan belonging to the relevant thematic area for the selected type of school facility. The definition of the competencies of the child/student of the selected type of school facility (20 points), the definition of the thematic area of education in the selected type of school facility (20 points), the definition of the educational plan of the selected type of school facility (20 points), the definition of the educational standards of the given thematic area in a selected type of school facility (20 points), definition of the educational curriculum of the given thematic area in the selected type of school facility (20 points). Resulting assessment: A – 100 - 91%, B – 90 - 81%, C – 80 - 71%, D – 70 - 61%, E – 60 - 50%. Credits will not be awarded to a student who does not achieve more than 50%	
Results of education: The student: Knowledge: <ul style="list-style-type: none"> - acquires basic theoretical knowledge from the educational field of Man and Nature; - master basic terms and technical terminology used in biology, physics, and chemistry; - possesses basic knowledge enabling understanding of natural phenomena and laws of natural processes; - understands natural aspects affecting human life and can explain natural phenomena in his surroundings; - acquires different ways of getting to know the natural environment (truthfully and by current scientific knowledge); - can list the characteristic features of individual species of living organisms, their importance in nature and for humans - knows simple biological classification, can categorize based on observation of differences; - can list the characteristic features of physical phenomena and bodies, their meaning in nature and for humans; - can explain the basic principles of operation and use of simple machines; - knows the basic building blocks of substances and their properties; - controls the composition of substances and the laws of their transformations; - can explain the importance of water and air for life; 	

- acquires environmental knowledge and understands the issue of environmental pollution;

Abilities:

- can effectively plan and organize his own "scientific" activity;
- can carry out simple research activities;
- can objectively and reliably observe and describe the observed;
- can formulate hypotheses, draw conclusions and generalizations, interpret data and describe their interrelationships;
- can notice the essential properties of objects and phenomena and the causal connections of natural phenomena and gradually understand the relationships between them (at an elementary level);
- will be able to ask questions that arouse children's curiosity and create opportunities for observation, research, and discovery of new knowledge;
- can solve problem situations from everyday life in connection with scientific knowledge;

Competencies:

- has a positive attitude and is ready to perform his profession;
- can work effectively independently and as a team member;
- acquires a positive relationship with the living and non-living nature, natural phenomena, and natural sciences in general;
- acquires the knowledge necessary for personal decisions in civil and cultural matters related to local and global problems such as health, environment, nature, technical progress, and the like;
- realizes the usefulness of natural science knowledge and its application in practical life.

Brief syllabus:

Position of science knowledge in the primary school curriculum. Characteristics of the most influential families and species of plants. Useful plants. SI system of units. Physics of solids and liquids. Mechanics. Characteristics of the essential elements, structure of atoms. Organic compounds, metabolic events. Basics of geology and tectonics. Characteristics of the most crucial animal orders and species. Useful animal species and parasites. Environmental Protection.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ TPK/18	Name: Pedagogical Communication
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The ratio of interim and final evaluation is 50/50. Student can master 50b for managing communication in standard social and learning situations. The student passes the reflection written on the subject of communication for which he / she can get 50b. The condition of successful completion of the subject is to obtain at least 50% of the maximum possible evaluation of the subject. Rating is granted on a scale: A - 90-100%, B - 80-89%, C - 70-79%, D - 60 - 69%, E - 50-59%	
Results of education: In this course the student acquires the theoretical knowledge and practical skills to communicate in social communication and especially in the education and learning process. Within the exercises the student acquires verbal and nonverbal elements of social communication, both in the monologue and in the dialogue. In particular, they master the management of teaching in standard situations. He will be able to use the elements of non-verbal communication and paralingvistic aspects of communication, particularly in school situations.	
Brief syllabus: Introduction to communication. Communication, social communication. Definition of basic terms. Man and communication. Communication skills of an individual. Verbal communication. The word and its meaning. Paralingual aspects of speech. Practice of verbal expressions. Non-verbal communication. Expressions of non-verbal communication. Types of non-verbal communication: mimics, views, proxemics, gestures, haptics, posturika, kinetics, looks, olfactions and the environment. Specific personality skills in the communication process. Empathy, assertiveness. Empathic and assertive behavior. Their significance in interpersonal relations. Pedagogical Communication. Participants in pedagogical communication. Rules of pedagogical communication. Spatial distribution of participants. Verbal communication in the educational process. Monologic and dialogical forms of communication. Interview in the educational process. Function of questions, tasks, exercises in developing all cognitive functions. Creating divergent tasks and exercises. Nonverbal signals and attitudes of participants in the process of education and training. Means of expression. Impact of the environment on communication. Personality and other influences. Persuasion - Convincing as an interpersonal influence. Characters and ways of	

influencing (clarification, suggestion, exemplification, exercise). Barriers in communication. Social aspects of pedagogical communication

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KPD/PEDdb/ UAP/18	Name: Introduction to Academic Writing
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: In the course of the semester, students study original sources of information about pedagogical research, pedagogical experiments, and the processing and interpretation of results. They independently work on their research projects throughout the semester. At the beginning of the semester they have clearly defined assignments and a classification method. Students present their semester work to classmates, which includes discussions. Students' activity at seminars during the semester is also monitored. Active students get a certain bonus that is added to the overall student rating. The subject is completed with a classified credit. Classification is based on the quality of the semester work and its presentation level, with the added bonus for the semester. Students must earn a minimum of 50% credit for the subject. To obtain Class A, at least 90%, B at least 80%, C at least 70%, D at least 60%, E at least 50%. The student has the opportunity to improve his / her classification by completing or refining his / her semester work.	
Results of education: The aim of the subject is to familiarize students with science as an organic component of human culture institutional forms, the most important methods, forms and outputs of scientific work, scientific ethics and prepare them for independent planning and realization of pedagogical research in practice and also to teach them to present the results of their own research activities in the professional community.	
Brief syllabus: Science as part of human culture, scientists and scientists; <ul style="list-style-type: none"> • Institutional provision and management of scientific work; • The most important methods of scientific work; • The most important forms of scientific work; • Scientific and technical information; • Ethics of scientific work; • Preparation and realization of independent research activities of the educator in practice; • Processing, interpreting and presenting the results of independent scientific work; • Specifics of the work of the community of scientists, the evaluation of scientific work and qualifications.
