INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ DOG/25	Name: Hereditary diseases and basic genetics
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, students must complete the following requirements: Total student load: 2 credits = 50-60 hours The student participates in contact classes for 13 hours, prepares for class assignments for 15 hours, and prepares for a written examination for 25 hours of self-study. The prerequisite for successful completion of the course is obtaining at least 50% of the course grade. Overall course pass mark: - A = 90 - 100% (90 - 100 points) - B = 80-89% (80-89 points) - C = 70 - 79% (70 - 79 points) - D = 60 - 69% (60 - 69 points) - E = 50 - 59% (50 - 59 points) - FX = 0 - 49% (0 - 49 points) Student workload: 2 credits = 50-60 hours 13 hours of attendance at contact hours; 10 hours of studying recommended literature, preparing presentations and seminar papers; 27-37 hours of self-study.	
Results of education: Knowledge: - The student will be able to characterize the basic concepts of genetics, explain the basic principles of genetics - The student will gain knowledge of the symptomatology of selected mutations, types of inheritance, basic cytogenetics, population genetics, and methods of genetic analysis Skills: - The student will understand and comprehend the laws of inheritance (classical and basic population genetics) - The student will be able to explain the importance of genetics Competencies:	

- The student will gain insight into the workings of genetic principles as well as the diseases that can most commonly affect health, thus gaining a positive attitude towards protecting and maintaining his/her health as well

Brief syllabus:

1. Introduction to the problem of heredity.
2. Brief history of genetics.
3. Definition of basic genetic concepts. The basics of genetic terminology.
4. The genetic code.
5. The central dogma.
6. Practicing examples from replication, transcription and translation
7. Fundamentals of regulation of genetic systems.
8. Mendel's laws
9. Calculation of crossover examples
10. Mutagenesis
11. Characteristics of the most common human genetic diseases
12. Genetics of populations
13. Summary

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/MOB2-MDSSm/25	Name: Experience equivalent to academic mobility - Missiology, Deaconry and Social Care
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study:	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Total student workload: 3 credits = 75–90 hours 26 hours participation in contact hours; 20 hours preparation of the educational activity project and assignments given during lessons; 35–45 hours self-study and preparation of a brief reflection or report on the acquired experiences and knowledge in relation to the graduate's profile. The course is completed in the form of "passed" (without a grade), based on the fulfilment of the above conditions. The course completion is recorded in AIS by the academic responsible person (ZOŠP) after verifying that the conditions have been met.	
Results of education: Knowledge: <ul style="list-style-type: none"> - The student acquires subject-specific knowledge in line with the graduate profile, delivered by a foreign academic staff member in an international context. - The student becomes familiar with various approaches, concepts, and methods used in foreign academic and research environments. - The student gains an overview of current trends and findings in the relevant field from an international perspective. Skills: <ul style="list-style-type: none"> - The student is able to communicate and work in a foreign language, developing their language and intercultural communication skills. - The student can actively apply the acquired knowledge in their own academic and professional context. - The student develops the ability to critically analyse and apply new insights from the international academic environment. - The student enhances the ability to integrate new knowledge from international research into their own research or practice. Competences: <ul style="list-style-type: none"> - The student strengthens their ability to navigate the international academic environment and actively participate in it. 	

- The student improves their adaptability, independence, and flexibility when studying in an intercultural environment.
- The student develops openness to diverse professional and cultural approaches, as well as the ability to work both independently and as part of a team.

Brief syllabus:

- Introduction to the subject, the importance of academic mobility and the internationalisation of higher education.
- Professional seminars by a foreign university teacher in line with the graduate profile. International approaches and current trends in the field. Intercultural communication and working in an international academic environment.
- Reflection of the student on the knowledge, skills and experience gained from the teaching conducted by a foreign university teacher.
- Discussion and feedback - relevance of the knowledge gained for further study and professional development.

Literature:

Literature as recommended by the university teacher involved in the mobility programme.

Language, knowledge of which is necessary to complete a course:

English, Hungarian or Slovak

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ OBm/25	Name: Diploma thesis with defense
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study: 3., 4..	
Level of study: II.	
Prerequisites: KAV/SDP1/25 and KAV/SDP2/25	
Conditions for passing the subject: The final thesis is assessed by the thesis supervisor and the opponent. The thesis supervisor and the opponent shall prepare the thesis, in which they evaluate (according to AIS2) the formal aspect of the thesis, the level of processing of the theoretical and practical part, the contribution and applicability of the thesis. The selection of a sufficient number of relevant literature sources and their arrangement into a coherent whole are also assessed. The supervisor and opponent of the thesis will evaluate the contribution and usefulness of the thesis, or in his/her opinion he/she will give recommendations and questions for the author of the thesis. The result of the thesis defence is evaluated by grading grades from A to FX. The thesis defence takes place in the form of a colloquial examination. Final grade: A - 100 - 91%, B - 90 - 81%, C - 80 - 71%, D - 70 - 61%, E - 60 - 50%. Credits will not be awarded to a student who fails to achieve more than 50%.	
Results of education: The student understands the connections between the discipline and the social sciences, - The student has a comprehensive knowledge of the social sciences and social groups, The student will be able to justify the ideas presented as well as to formulate practical conclusions and recommendations in a sophisticated manner - The student will be able to prepare a presentation of the results of his/her own research activities. The student is able to argue and methodically apply knowledge in theoretical and methodological contexts, - The student is able to answer the questions of the supervisor and the opponent of the thesis at the required level to successfully defend the thesis.	
Brief syllabus: Competent and adequate responses by the student to questions posed by the supervisor and members of the state examination committee during the defense.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/OPC/25	Name: Professional practice in the church and supervision
Types, range and methods of educational activities: Form of study: Practical / Seminar Recommended extent of course (in hours): Per week: 2 / 1 For the study period: 26 / 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Participation in the internship to the required extent (confirmed by the contractors/workplaces in which the internship was carried out) and preparation of an internship report. Student workload: 6 credits = 150 hours 100 hours of professional practice: 30 hours of observation, 10 hours of observation analysis, 50 hours of practice, 10 hours of practice analysis. 50 hours of preparation: preparation for professional practice – consultations with students, preparation for practice, preparation of documentation.	
Results of education: <ul style="list-style-type: none"> • The student will gain a set of theoretical and methodological knowledge and direct experience at work. • The student understands the nature and importance of the organizational structure of the selected equipment. • The student is able to describe specific intervention procedures of a social worker in a selected social institution, to detect critical points and to propose new more optimal solutions. • Can process, evaluate and reflect on the results of observations in the context of theory. • The student can recognise his/her own level of competence. • The student can identify common professional problems, investigate and formulate the theoretical and practical background necessary for their solution and solve them (using practical procedures in practice). • The student is able to document support activities, reflection and self-reflection in a professional manner. • Takes a position on observed phenomena on the basis of previous theoretical knowledge. • Undertakes self-reflection and receives feedback on own output • Presents own values and professional skills responsibly. • The learner will be able to undertake purposeful development of self-knowledge related to the profession. • The student will be able to create an atmosphere of trustworthiness, helpful, encouraging, attentive, accepting behavior. 	
Brief syllabus: Within the professional practice, students observe and analyze the social rehabilitation process, learn to apply the theoretical knowledge acquired during their studies, gradually acquire the	

professional skills necessary for the performance of social work in a group and individual form, and have the opportunity to observe the administrative process and the running of the institution.
 Key elements of the exercise:
 Practical training of methods and procedures.
 Communication with the exercise leader.
 Applicability of the knowledge acquired in school: especially personality, social ties, social legislation.
 Assessment of the readiness of the trainees to practice.
 Suggestions and solutions to improve the client's situation.
 Preparation of the final report of the practice.
 Final evaluation. Presentation of the report.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ OPM/25	Name: Specialised practice and mediation
Types, range and methods of educational activities: Form of study: Practical / Seminar Recommended extent of course (in hours): Per week: 2 / 1 For the study period: 26 / 13 Methods of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Participation in the internship to the required extent (confirmed by the contractors/workplaces in which the internship was carried out) and preparation of an internship report. 6 credits = 150 hours 100 hours of practical training: 30 hours of observation, 10 hours of observation analysis, 50 hours of practical training, 10 hours of practical training analysis. 50 hours of preparation: preparation for professional training – consultations with students, preparation for practical training, preparation of documentation.	
Results of education: <ul style="list-style-type: none"> • The student will gain a set of theoretical and methodological knowledge and direct experience at work. • The student understands the nature and importance of the organizational structure of the selected equipment. • The student is able to describe specific intervention procedures of a social worker in a selected social institution, to detect critical points and to propose new more optimal solutions. • Can process, evaluate and reflect on the results of observations in the context of theory. • The student can recognise his/her own level of competence. • The student can identify common professional problems, investigate and formulate the theoretical and practical background necessary for their solution and solve them (using practical procedures in practice). • The student is able to document support activities, reflection and self-reflection in a professional manner. • Takes a position on observed phenomena on the basis of previous theoretical knowledge. • Undertakes self-reflection and receives feedback on own output • Presents own values and professional skills responsibly. • The learner will be able to undertake purposeful development of self-knowledge related to the profession. • The student will be able to create an atmosphere of trustworthiness, helpful, encouraging, attentive, accepting behavior. 	
Brief syllabus:	

Within the professional practice, students observe and analyze the social rehabilitation process, learn to apply the theoretical knowledge acquired during their studies, gradually acquire the professional skills necessary for the performance of social work in a group and individual form, and have the opportunity to observe the administrative process and the running of the institution.

Key elements of the exercise:

Practical training of methods and procedures.

Communication with the exercise leader.

Applicability of the knowledge acquired in school: especially personality, social ties, social legislation.

Assessment of the readiness of the trainees to practice.

Suggestions and solutions to improve the client's situation.

Preparation of the final report of the practice.

Final evaluation. Presentation of the report.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ SDP1/25	Name: Diploma Thesis Seminar 1
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Attendance at the seminar is in accordance with the SJE Study Regulations. Active participation in the seminars and continuous completion of the sub-tasks assigned by the topic leader. Regular consultation with the supervisor, presentation of ideas for the thesis, preparation of the written parts of the thesis, preparation of a whole chapter of the final thesis. The evaluation assesses the student's activity throughout the semester and the preparation of the thesis, working with the supervisor. A - excellent (numerical value: 1) - outstanding performance (90-100%), B - very good (1.5) - above average performance (80-89%) C - good (2) - average performance (70-79%) D - average (2,5) - acceptable performance (60-69%) E - fair (3) - minimum performance (50-59%) FX - unsatisfactory (4) - further preparation required (0-49%) Student workload: 3 credits = 75-90 hours 26 hours of attendance at contact hours; 11 hours of studying recommended literature, preparing assignments given in class; 38-53 hours of self-study.	
Results of education: Knowledge: The aim of the course is to help students to prepare a final thesis, to refine the thesis hypothesis, to select the literature - based on the selection and recommendation of the topic leader, to conduct independent library research, to search for appropriate literature, to clarify the basic, central, key concepts of the final thesis, to work systematically with the necessary literature, to define the content and thematic areas of the final thesis. Skills: The student will master the basic elements and steps of scientific research, be able to formulate a working hypothesis independently; to design a thesis system; to search for and select material; to analyse, evaluate, synthesise and systematise sources; to master the formal requirements of the thesis and its final organisation according to the relevant regulations. Attitudes: The student will acquire the basic attitude of a researcher, in which the primary role is played by the ability to know, understand, respect, process and reflect on the opinions of others and to work	

independently to develop the personality

Brief syllabus:

1. Choosing a thesis topic.
2. Basic working hypotheses.
3. Notes.
4. Content of the thesis.
5. Literature: sources, primary literature,
Literature: auxiliary, secondary literature.
7. Processing sources, literature
8. own opinion, results, contribution, novelty in the thesis.
- 9 Requirements in the context of the thesis. University regulations, guidelines.
10. Own research, collection of material
11. own research: selection and processing of materials,
12. Proper structure of the thesis.
13. Formal requirements for the thesis

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ SEO1/25	Name: Socio-economic area 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 1 For the study period: 26 / 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Sub-discipline: Management in social work Prerequisites: The method of assessment and successful completion of the course consists of two parts. 1. Seminar work and active participation in solving practical tasks (40 points) - to successfully complete the course, it is necessary to work out practical tasks individually or in groups (individual work based on theoretical knowledge, group solution of case studies). Semester work and practical solutions are to be prepared in writing. A total of 40 points can be obtained for all practical assignments. 2. Final assessment (60 points) - for successful completion of the course it is necessary to pass a written final examination in the form of a written exam, which consists of theoretical and practical questions. To pass the written test, it is necessary to achieve a minimum of 30 points out of a maximum of 60 points (excluding the points for the seminar paper and the solutions to the practical tasks). Overall assessment: the overall assessment is the sum of the marks obtained by the student over the assessment period, as the sum of the marks for the seminar paper and practical problem solving, and the final assessment. The overall result is determined in accordance with the internal regulations of UJS (Study Regulations of UJS) according to the classification scale: A - excellent - 90-100%, B -very good - 80-89%, C - good - 70 -79%, D - satisfactory - 60 - 69%, E- satisfactory - 50 -59%. FX - insufficiently - 0 -49%. Credit will not be awarded to a student who scores less than 50 points on the overall assessment. Sub-discipline: Social planning and projection Prerequisites: The method of assessment and successful completion of the course consists of three parts. 1. Active participation in solving practical tasks (20 points) - to successfully complete the course, it is necessary to work out practical tasks individually or in groups (individual work based on	

theoretical knowledge, group solution of case studies). Practical solutions are to be prepared in writing. A total of 20 points can be obtained for all practical assignments.

2. Project plan (20 points) - in order to pass the course, a group work on a social project plan in written form based on the acquired knowledge is required. A total of 20 points can be obtained for all parts of the social project.

3. Final evaluation (60 points) - for successful completion of the course it is necessary to pass a written final examination in the form of a written exam, which consists of theoretical and practical questions. To pass the written test, it is necessary to achieve a minimum of 30 points out of a maximum of 60 points (excluding the points for the seminar paper and the solutions to the practical tasks).

Overall assessment: the overall assessment is the sum of the marks obtained by the student over the assessment period, as the sum of the marks for the practical assignments, the social project plan and the final assessment. The overall result is determined in accordance with the internal regulations of UJS (Study Regulations of UJS) according to the classification scale:

A - excellent - 90-100%,

B - very good - 80-89%,

C - good - 70 -79%,

D - satisfactory - 60 - 69%,

E- satisfactory - 50 -59%.

FX - insufficiently - 0 -49%. Credit will not be awarded to a student who scores less than 50 points on the overall assessment.

6 credits = 150-180 hours 39 hours of attendance at contact hours; 41 hours of studying recommended literature, preparing for written tests, and preparing assignments given in class; 70-120 hours of self-study.

Results of education:

Sub-discipline: Management in social work

Knowledge - skills-attitudes:

Knowledge:

Upon successful completion of the course, students will gain the following knowledge:

- have an overview of organization theory and distinguish between different forms of organizations,
- They know the basics of management,
- master the basic concepts of management, recognise different managerial roles and functions,
- know the nature of management, motivation and leadership styles
- acquire competences and knowledge in the field of social management.

Skills:

Upon successful completion of the course, students will acquire the following competencies:

- Know how to create an environment for the proper functioning of social management,
- they are able to manage change and group decision-making from a practical perspective,
- they are able to lead people, communicate properly
- learn to define the vision, mission, strategy and organisational structure of an organisation
- plan human resources in organisations,
- know the principles of motivation and how to apply them in practice,
- have an overview of the essence of people management,

Attitudes/Skills:

Upon successful completion of the course, students will acquire the following skills:

- They know the basic breakdown of managerial skills, know how to adapt them in practice,
- know the necessary skills of effective social management,
- they are able to hold the position of a managerial manager in social entrepreneurship,

- know the necessary management and communication techniques of an effective manager,
- have gained experience in solving problems in the field of social management.

Sub-discipline: Social planning and projection

Knowledge - skills-attitudes:

Knowledge:

Upon successful completion of the course, students will gain the following knowledge:

- Know the management processes of project planning and implementation,
- know the tasks of project management, project planning in a social enterprise,
- know the specifics of strategic planning, programming and project planning in the social field,
- know and can evaluate the plan of social projects and related services in the social field,
- gain knowledge and have an overview of the project cycle and the project planning process.

Skills:

Upon successful completion of the course, students will acquire the following competencies:

- Distinguish the means of project planning in theory and practice,
- They are able to give examples of the project planning process and the factors that influence them,
- they are able to apply the acquired knowledge in the preparation of a project proposal addressing a specific community problem from a social perspective,
- they are able to assess the risks of the developed social project plan.

Attitudes/Skills:

Upon successful completion of the course, students will acquire the following skills:

- Graduates are able to develop and evaluate projects with a social focus,
- They will have mastered project management methods,
- they are skilled in creating a project team, and the correct creation of an organizational structure according to the needs of a social project.

Brief syllabus:

Sub-discipline: Management in social work

1. Management in social work
2. The nature and importance of management, managerial functions
3. Developmental concepts of management, history, approaches and processes
4. The manager and his environment, levels of management
5. Basic managerial roles and skills

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ SEO2/25	Name: Socio-economic area 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 1 For the study period: 26 / 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Sub-discipline: economics and the social sphere The course ends with an exam. The condition for successful completion of the course is to obtain at least 50% of the total number of maximum 100 points obtained within the course. Points within the course can be obtained as follows: <ul style="list-style-type: none"> • max. 40 points in the seminar work during the semester; • max. 60 points in the examination period for a written exam, which includes a test of the student's knowledge acquired in the course. To achieve an A rating, it is necessary to obtain 100-90%; for rating B 89-80%; for a C rating of 79-70%; for evaluation D 69-60% and for evaluation E 59-50% of the total number of points. Credits will not be awarded to a student who has not obtained at least 50% of the total number of maximum points obtained in the course. Sub-discipline: Social management and social entrepreneurship The method of assessment and successful completion of the course consists of two parts. <ol style="list-style-type: none"> 1. Seminar work and active participation in solving practical tasks (40 points) - to successfully master the subject it is necessary to work out practical tasks individually or in groups (individual work on the basis of theoretical knowledge, group solution of case studies). Semester work and practical solutions are to be prepared in writing. A total of 40 points can be obtained for all practical assignments. 2. Final assessment (60 points) - for successful completion of the course it is necessary to pass a written final examination in the form of a written exam, which consists of theoretical and practical questions. To pass the written test, it is necessary to achieve a minimum of 30 points out of a maximum of 60 points (excluding the points for the seminar paper and the solutions to the practical tasks). Overall assessment: the overall assessment is the sum of the marks obtained by the student over the assessment period, as the sum of the marks for the seminar paper and practical problem solving, and the final assessment. The overall result is determined in accordance with the internal regulations of UJS (Study Regulations of UJS) according to the classification scale: <ul style="list-style-type: none"> A - excellent - 90-100%, B -very good - 80-89%, C - good - 70 -79%, 	

D - satisfactory - 60 - 69%,

E- satisfactory - 50 -59%.

FX - insufficiently - 0 -49%. Credit will not be awarded to a student who scores less than 50 points on the overall assessment.

6 credits = 150-180 hours 39 hours of attendance at contact hours; 41 hours of studying recommended literature, preparing for written tests, and preparing assignments given in class; 70-120 hours of self-study.

Results of education:

Sub-discipline: economics and the social sphere

Knowledge - skills-attitudes:

The student

- acquire basic concepts and definitions related to market economy and economic thinking;
- get acquainted with the individual key factors of the company's research;
- knows the economic and financial context and interactions of processes taking place in business development.

The student

- has basic practical experience in the evaluation of economic processes with special regard to the context of business economics;
- can independently compare market demand from the demand and supply side;
- will be able to derive the consequences of state interventions with emphasis on the reactions of companies.

The student

- communicates effectively on the basic economic context;
- can reflect on the impact of state interventions and assess their impact;
- will be able to critically assess the economic situation with special regard to the business economy.

Sub-discipline: Social management and social entrepreneurship

Knowledge - skills-attitudes:

Knowledge:

Upon successful completion of the course, students will gain the following knowledge:

- Have knowledge of social economy, social management and social entrepreneurship,

The student will be able to understand the basic concepts of the field, its different theoretical orientations, principles and methods.

- The student will be able to apply knowledge of the field to other areas of social sciences.
- The student will know the basic methodological approaches and aspects of the field.

The student will be able to

- identify and solve professional problems related to the subject matter.
- use and understand basic terminology.
- apply knowledge related to the subject in social practice.
- understand the research results related to the subject.

The student develops unprejudiced attitudes towards tensions in the social structure.

- The student will be able to plan activities independently that will increase his/her knowledge of the social structure.
- The student will have a critical perspective in the interpretation of data.

Brief syllabus:

Sub-discipline: Analysis of social problems

1. Definition of social problem.
2. Identifying social problems in practice.
3. Exploring social problems by identifying income conditions.
4. Identifying social problems during family visits.
5. Student presentation.
6. Complex assessment of social problems.
7. Individual case management subtasks.
8. Sub-tasks of family support.
9. Student presentation.
10. Sub-tasks for working with groups.
11. Crisis situation.
12. Crisis intervention.
13. Student presentation.

Sub-discipline: Social structure and social processes

Basic concepts. Social structure - social inequalities. Theories of harmony, conflict, exchange and coercion. Multidimensional social structure theories. Bourdieu's theory of capital. Methods: survey method and self-assessment method. Social mobility. School and status. Spatial and ethnic inequalities. Sources for social structure studies in (Czech) Slovakia - census and vital statistics. Changes in the social structure of (Czech) Slovakia 1918-1989. Structural changes of nationalities in Slovakia.

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ SVO3/25	Name: Social sciences 3
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 2 For the study period: 26 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Sub-discipline: Sociology of religion During the semester, the student will submit a written paper of 30 points (5 points for originality, 5 points for structure, 20 points for content). For a presentation where the student presents his/her theoretical and practical knowledge, the student may receive 20 points (2 points for originality, 2 points for structure, 12 points for content, 4 points for technical performance, 2 points for presentation). The whole course is completed with a final written examination for 50 points. The prerequisite for passing the course is the achievement of at least 50 points, i.e. 50% of the total. A grade of A requires 90-100%; a grade of B requires 80-89%; a grade of C requires 70-79%; a grade of D requires 60-69%; and a grade of E requires 50-59% of the total points. Sub-discipline: Political Science During the semester, the student will submit a written paper of 30 points (5 points for originality, 5 points for structure, 20 points for content). For a presentation where the student presents his/her theoretical and practical knowledge, the student may receive 20 points (2 points for originality, 2 points for structure, 12 points for content, 4 points for technical performance, 2 points for presentation). The whole course is completed with a final written examination for 50 points. The prerequisite for passing the course is the achievement of at least 50 points, i.e. 50% of the total. A grade of A requires 90-100%; a grade of B requires 80-89%; a grade of C requires 70-79%; a grade of D requires 60-69%; and a grade of E requires 50-59% of the total points. 6 credits = 150-180 hours 52 hours of attendance at contact hours; 38 hours of studying recommended literature, preparing for written tests, seminar papers, and preparing assignments given in class; 60-90 hours of self-study.	
Results of education: Sub-discipline: Sociology of religion Knowledge - skills-attitudes: - The student will be able to familiarise him/herself with the basic concepts and the most important authors of the sociology of religion, and will be familiar with the different theoretical directions, principles and factors of the sociology of religion. - The student will be able to apply knowledge of sociology of religion to social practice.	

- The student will master methodological approaches and perspectives in the sociology of religion.

The student knows the place, aims and tasks of sociology of religion.

- The student knows the basic terminology of sociology of religion.

- The student will be familiar with the most important authors, the different theoretical directions, models and principles of sociology of religion.

- The student will be able to apply knowledge of sociology of religion to social practice.

- The student will be familiar with research findings on religion.

- The student will develop non-judgemental attitudes towards the diversity of different religions.

- The student will be able to plan independently activities that will increase his/her knowledge in the field of sociology of religion.

- The student will have a critical perspective in the interpretation of data.

Sub-discipline: Political Science

Knowledge - skills-attitudes:

The student will be able to navigate in the basic terminology of political science, to know different theoretical directions, principles and factors of political science

- The student will be able to apply the knowledge of political science in social practice.

The student will master methodological approaches and aspects of political science

- The student will be able to know the place, aims and tasks of political science

- The student will be able to navigate the basic terminology of political science

- The student will be able to know the different theoretical orientations, models, basic principles of political science

- The student will be able to apply the knowledge of political science in social practice

- The student will have an open-minded approach to certain phenomena, processes and aspects of political science, such as different political systems and electoral systems, political opinion polls.

- He observes political events and news in their contradictions.

Brief syllabus:

Sub-discipline: Sociology of religion

What does religious sociology deal with, what are its branches and research areas? What does it consist of Religion: definitions and approaches. Durkheim on religion. Religion and the church, the institution and organization. Church and sect. Sects, cults, ecclesiastical diversity, the ecclesiastical market. M.Weber on religion (Protestant ethics, others). Secularization. Fundamentalism .What is religiosity and how can it be measured? Types of religion. Religious situation in the modern world. . Change in religiosity at the individual and societal level. Development and explanation of the religious situation in Slovakia after 1945. Contemporary religion - description, characteristics, directions. Religion and values, religion and politics, religion and economy.

Sub-discipline: Political Science

What is the policy. The theoretical foundations of political science. Political ideologies. Types of political systems. Executive power. Constitution and constitutional court. Types of government systems. Organisation of public administration. Political parties and party systems. Elections and electoral systems. Interest organisations and civil society. Public policy. Changes in political systems.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ TEM/25	Name: Theory of methodology
Types, range and methods of educational activities: Form of study: Lecture / Practical / Seminar Recommended extent of course (in hours): Per week: 1 / 1 / 1 For the study period: 13 / 13 / 13 Methods of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Sub-discipline: basic methodological knowledge of research Attendance at the exercises is in accordance with the SJE Study Regulations. Regular preparation during the semester. The subject matter of the course is based on personal presence, but the emergency may be completed online during the emergency. In the event of the emergency being lifted, the face-to-face training format in the form of contact hours will be automatically activated. Evaluation: Active participation and involvement in the exercises, completing the tasks assigned in the lessons. At the end of the semester, a paper on a topic of your choice must be submitted, which must be prepared according to the rules for publication in scientific journals. The manuscript must include at least: 10 scientific books, 10 scientific articles and 30 scientific references. The aim of the assignment is to practice identifying research questions, methodology and necessary data collection. Collection of literature from libraries and databases. Preparing references to the literature. Completion of the tasks assigned in class to at least a satisfactory level. A - excellent (numerical grade: 1) - outstanding performance (90-100%), B - very good (1,5) - above average performance (80-89%) C - good (2) - average performance (70-79%) D - average (2,5) - acceptable performance (60-69%) E - fair (3) - minimum performance (50-59%) FX - unsatisfactory (4) - further preparation required (0-49%) The assessment of the subject is based on the average of the marks awarded in the sub-subjects according to the following rounding system: A = 1,00 - 1,25 B = 1,26 - 1,75 C = 1,76 - 2,25 D = 2,26 - 2,75 E = 2,76 - 3,00 FX = 3,01 - 4,0	

Sub-discipline: didactics

The student must attend seminars in accordance with the applicable study regulations (see Art. Organisation of Educational Activities of the Study Regulations of J. Selye University). Active participation in meetings (assessed). During the semester, from the area of Didactics, the student will submit 3 written assignments. In order to pass the course, the student must obtain at least 50% of the total. The course is evaluated in accordance with the study regulations (See Art. 10. Control of study and evaluation of learning outcomes of the Study Regulations).

Sub-discipline: Methodology of the sciences

Successful completion of the course is subject to passing a written examination.

The final grade consists of the points obtained for fulfilling the requirements in the form of: max. 30 points for participation and max. 70 points for the exam. A student may obtain a maximum of 100 points in total.

The final grade for the course is: A 100-90%, B 89-80%, C 79-70%, D 69-60%, E 59-50%. A grade of FX is awarded if the student achieves less than 50% of the total points.

Student workload: 5 credits = 125-150 hours 39 hours of attendance at contact hours; 31 hours of studying recommended literature, preparing for written tests, and preparing assignments given in class; 55-80 hours of self-study.

Results of education:

Sub-discipline: basic methodological knowledge of research

Knowledge - skills-attitudes:

You have a comprehensive knowledge of scientific writing.

You are familiar with the rules for publishing scientific papers.

Knowledge of current trends in theological studies.

Knowledge and description of professional forms of citation used in theological studies.

Awareness of the ethics of scientific publication.

Ability to understand the workings of archives.

Understand the details of writing a thesis.

Ability to interpret and apply different forms of research methodology (quantitative and qualitative).

Ability to write research proposals at a scientific level, including introduction, formulation of objectives and hypotheses, choice of methods, formulation and synthesis of results.

Ability to search effectively for appropriate literature sources.

Ability to interpret and apply specific research methods.

Ability to formulate research findings in appropriate scientific language.

Ability to interpret and explain a work of scientific interest at an appropriate level.

Ability to interpret and use terminology, analyses and synthesis appropriate to the nature of the research, in conversation and in writing.

Ability to interpret and evaluate literature with a critical eye.

Ability to present research orally in a clear, concise and comprehensible way.

Possesses and authentically represents a diversity of scientific and theological thought in its environment.

His work, results and conclusions are constantly monitored.

Continually expands his/her knowledge of scientific and theological thinking through continuous learning.

Open to the use of information and communication technology tools.

Develops skills in accurate problem and task solving, scientific writing.

Publishes results according to professional criteria.

Keeps abreast of developments in the theological sciences.

Publishes his/her opinions and views without offending others.

Sub-discipline: didactics

Knowledge - skills-attitudes:

The student will be able to adapt to current educational issues, understand the importance of and the importance of teacher preparation for teaching.

The student knows the priority position of the goal in the teaching process, organizational forms of teaching (social forms), didactic principles (principles).

The student is able to develop their skills through practical activities.

The student is able to use teaching strategies (methods, working and organisational forms, teaching tools) to the practical teaching perspective.

The student will strive to solve problems in cooperation with others where possible.

The student respects the student's personality.

The student considers it important to be aware of the processes of learning and teaching, self-regulated learning the knowledge and skills needed to support self-directed learning, the and is open to lifelong learning.

Sub-discipline: Methodology of the sciences

Knowledge - skills-attitudes:

The student

- learn the basic concepts, categories and issues of scientific methodology.
- have a broad knowledge of the fundamental characteristics of science and of the methodology of science
- be able to understand the logical context of social science studies.

The student

- will be able to apply the basic concepts of scientific methodology.
- be able to formulate opinions on methodological issues.
- be able to apply methodological knowledge to the practice of social sciences.
- be able to formulate reasoned opinions on methodological issues.

The student:

- develop unprejudiced attitudes towards changes in the history of science.
- accepts the diversity of social science thinking.
- accepts the importance of the theoretical underpinnings of scientific research

Brief syllabus:

Sub-discipline: basic methodological knowledge of research

1. Introductory lesson. Discussing the tasks to be done, assigning tasks.
2. Genres, structure, language and style of theological work. (Text analysis exercises).
3. Scientific problems, raising relevant questions.
4. General features of making a presentation
5. Presentation of prepared presentations
6. Presentation of prepared presentations
7. rules for citing literature.
- 8.rules for citing literature.
9. Reference rules for online literature.
10. Rules for referencing archival, archival and probate documents.
11. Structure and appearance of the thesis.
12. Structure and internal logic of the thesis.
13. Summary and evaluation

Sub-discipline: didactics

1. Didactics as a scientific discipline, its subject, division. Basic didactic categories. Elements of didactic system.
2. Teaching process. Definition. Stages of teaching.

3. Didactic principles and their application in teaching.
 4. Educational goal as a determinant of the choice of content, methods, forms and means of teaching.
 5. Student presentation.
 6. Teaching content, curriculum, educational programmes, curricula, syllabuses, curriculum, educational standards, thematic plans.
 7. Teaching methods - definition, possibilities of classification of teaching methods, their optimal selection, characteristics of individual methods with emphasis on activating teaching methods.
 8. Organisational forms of teaching - definition, division and characteristics of individual organisational forms.
 9. Student presentation.
 10. Characteristics of selected concepts of teaching (verbal-narrative teaching, problem-based teaching, constructivist concepts of teaching).
 11. Material didactic means in the teaching process (teaching aids and didactic technology).
 12. Monitoring the education process
 13. Student presentation.
- Sub-discipline: Methodology of the sciences
- Basic questions. Science and logic. Philosophical questions of science. Hypothesis and conjecture. Classification. Definition. Induction and deduction. Experiment. Prediction. Development of the sciences. Methods of the social sciences. Frontiers of scientific knowledge .

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Reformed Theological Faculty	
Code: KAV/ TEP1/25	Name: Theological Subjects 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 1 For the study period: 26 / 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Sub-discipline: Church History Attendance at lectures in accordance with the UJS study regulations. 2 written tests during the semester with min. "sufficient", which make up 40% of the whole. Successful oral examination (60% of the whole). The written tests are graded individually, and at the end of the semester these values are added together, plus the student's performance on the oral exam. Assessment (written tests, oral exam and the whole exam): A - excellent (numerical value: 1) - outstanding performance (90-100%), B - very good (1.5) - above average performance (80-89%) C - good (2) - average performance (70-79%) D - average (2.5) - acceptable performance (60-69%) E - fair (3) - minimum performance (50-59%) FX - unsatisfactory (4) - further training required (0-49%) Sub-discipline: Poimenics Attendance at lectures in accordance with the UJS study regulations. Active participation in lectures and involvement in joint work. Regular preparation during the semester. Successful completion of a written test and an oral examination at the end of the semester. Successful completion of end-of-semester examinations in the sub-courses that make up the course. Assessment: Assessment of the sub-courses will be by means of sub-examinations according to the following assessment: A - excellent (numerical value: 1) - outstanding performance (90-100%), B - very good (1.5) - above average performance (80-89%) C - good (2) - average performance (70-79%) D - average (2.5) - acceptable performance (60-69%) E - fair (3) - minimum performance (50-59%) FX - unsatisfactory (4) - further training required (0-49%) The course grade is based on the average of the grades awarded in the sub-courses according to	

the following rounding system:

A = 1,00 - 1,25

B = 1,26 - 1,75

C = 1,76 - 2,25

D = 2,26 - 2,75

E = 2,76 - 3,00

FX = 3,01 - 4,0

6 credits = 150-180 hours 52 hours of attendance at contact hours; 38 hours of studying recommended literature, preparing for written tests, seminar papers, and preparing assignments given in class; 60-90 hours of self-study.

Results of education:

Sub-discipline: Church History

Knowledge - skills-attitudes:

The student will learn about the spread of Christianity, the establishment and life of the Church in antiquity and the Middle Ages. They will learn about the outstanding historical events, Christian personalities and their work in each period.

The student will understand the reasons for the development of Christian doctrine. The depths and heights of the life of the Church. He will be able to organise his knowledge of the period. He will have a better understanding of the past, virtues and errors of the Church.

Empathy with ancient and medieval Christianity and the Church. The affirmation of personal Christian identity based on historical facts. Willingness to learn from historical events and from the mistakes of the medieval Christian Church. Learning from the examples of historical figures of the time. Understanding the impact of each historical period on the Church. A better appreciation of the state of the Christian Church in the present day.

Sub-discipline: poimenics

Knowledge - skills-attitudes:

The graduate of the course will gain knowledge of the basic issues of poimenics, current pastoral trends, contemporary trends, and the content and methodological emphases of pastoral ministry. The student learns to apply these emphases to typical pastoral situations. Acquire basic pastoral psychological knowledge in typical situations of life. Acquires the ability to appropriately apply spiritual tools of assistance and communication practices in ministry to the individual and the group in order to promote personal maturity, to solve personal problems of faith and life, and to integrate into the community of God's people. The student is familiar with common life problems and pastoral situations that occur in practice.

The student acquires the ability to appropriately apply spiritual aid tools and communication practices. The student will be able to act appropriately in pastoral situations and solve various pastoral problems.

Graduates demonstrate responsible behavior, attitude in interpersonal relationships and pastoral practice; the ability to take a responsible stand and make independent decisions on issues related to the course.

Brief syllabus:

Sub-discipline: Church History

1. Church history as a science. Its auxiliary sciences, co-disciplines, sources and periodization.
2. The Roman Empire: the spread of Christianity until 313.
3. Persecution of Christians in the Roman Empire. Apostolic Fathers and apologists. Constantine the Great, Theodosius the Great, the first and second ecumenical councils.
5. Monasticism; characteristics of Eastern and Western monasticism.

Results of education:

Sub-discipline Church History

Knowledge - skills-attitudes:

The student acquires knowledge about the important events of the 2nd millennium of Christianity, the Reformation, the spread of the Reformation in Hungary, the development and life of the Hungarian Reformed Church. The student will learn about the circumstances and life of the Reformed Christian Church in Slovakia in the 20th century. To learn about the outstanding historical events, Christian personalities and their work in each period.

The student will understand the reasons for the development of Reformed doctrines. They will be able to organise their knowledge of each period of church history. He/she will have an overview of the life of the Reformed Christian Church in Slovakia up to the present day.

Empathy with medieval Christianity and the Reformation. The affirmation of personal Christian identity based on historical facts. Readiness to learn from the events of history and the struggles of the Reformation. Learning from the example of historical figures. Readiness to better evaluate the present state of the Reformed Christian Church in Slovakia.

Sub-discipline Poimenics

Knowledge - skills-attitudes:

The course focuses on different pastoral situations that are conditioned by age and life situation. Absolute knowledge of pastoral situations, their possible solutions, the elements of communication leading to the solution, the process and the possibilities. Based on and taking into account the theoretical knowledge already acquired in poimenics, the lectures will provide the student with practical information in areas of pastoral care that he/she is likely to encounter in his/her future practice.

The student will acquire skills that will enable him/her to use the tools of pastoral care in dealing with a variety of problems. The student will be able to analyze part of the psychological and spiritual problems of clients, to conduct pastoral conversations; he/she will learn the elements of communication that help to verbalize and partially solve problems. He/she will be able to evaluate a given problem; choose appropriate methods of communication; guide the client, the person in need; inspire him/her to make a decision; help solve the client's problems.

The empathetic and altruistic behavior and attitude of the graduate will be greatly improved .

His/her relationship with people, clients develops positively. He becomes sensitive, receptive to more problems of people in his environment. Graduates demonstrate responsible behaviour in interpersonal relationships in practice.

Brief syllabus:

Sub-discipline Church History

1. The Reformation: Luther, Calvin, Zwingli. Reformed creeds.

2. Pre-Reformation in Hungary (1400 - 1520) The emergence and spread of the Reformation in Hungary in the first half of the 16th century.

3. Hungarian reformers of the 16th-17th centuries.
 4. The heyday of the Reformation, recatholicisation efforts and violent recatholicisation in the 17th-18th centuries.
 5. Enlightenment and Toleration (1781-1848), the Toleration Patent, the Church and the Revolution of 1848/49.
 6. Ecclesiastical and social developments from the Austro-Hungarian reconciliation to the end of the 19th century.
