

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ APLI1dm/AJ/15	Name: Linguistics 5. - Applied Linguistics 1.
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 30 points. The course will end with a written examination for 40 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: Having successfully accomplished this course, the student will be able to evaluate and explain the basic concepts of and the main approaches to applied linguistics, as well as its most relevant research areas in an interdisciplinary context.	
Brief syllabus: Main approaches to and the evolutionary tendencies of applied linguistics. Linguistics and social context. Language users and societies. Linguistic diversity. Language, culture and thought. Interpretation theory and social interaction. Language functions, the social context of language use. Discourse analysis. Multilingualism, multiculturalism, intercultural communication.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ APLI2dm/AJ/15	Name: Linguistics 6. - Applied Linguistics 2.
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: There will be two tests in the semester, each with a score of 30 points. The course will end with a written examination for 40 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having successfully accomplished this course, the student will be able to evaluate and explain the basic concepts and main approaches of applied linguistics, and to illustrate how linguistic theories are utilized for practical purposes, with a special concern for the primary aspects of foreign language education and learning.	
Brief syllabus: Language planning, language policy. Teaching materials and syllabus design. Visual and auditive-vocal channels of communication. Language competence, theoretical linguistics and language teaching. Error analysis, communication strategies. Contrastive linguistics, applied contrastive investigations. Principles and procedures of translation and interpretation. Language use for specific purposes.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ CDS/15	Name: Chemical and Didactical Software
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students can gather 60% of the maximum points from the active participation of the course and homeworks, while the remainder 40% of the points can get from project realization and its presentation. For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course the students will acquire skill in selected software and aptitude to integrate them into the education process.	
Brief syllabus: 1. Basis of the cheminformatics. 2. Simulation of the physical properties of the molecule. Overview of the quantum-chemistry software. (Gaussian, Abinit, MOLCAS). 3. Vizualization the simulation and the results of the theoretical calculations. (ChemCraft, Molden). 4. Office suite programs to support the theacher professional work (MS-WORD, MS-PowerPoint) 5. Graphical editors in chemistry (ACD/ChemSketch, Avogadro) 6. Simulation and vizualization in virtual chemistry laboratory. (Virtual Lab, Yenka, virtuálny mikroskop NASA) 7. MindMapping software in chemistry conceptual learning (FreeMind, iMindMap) 8. Aplication eduROM – Chémia I.,II. 9. Learning by playing software in chemistry education. (PurposeGame, ThinkLink, prostriedky Discovery Education, interaktívne PT) 10. E-learning a on-line chemistry learning contents (Planéta vedomosti – RealikaEducatio, naučteviac.sk, sulinet.hu) 11. Interactive white board and its tools in chemistry education. 12. Website as a source of chemistry learning contents. Student project. 13. Presentation and defence of the students‘ project. The final evaluation of the course.

Number of credits: 3	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students will be delivered two written tests each of maximum 30 points, while he/she can gather another 40 points with homeworks assigned during the semester. For the successful termination of the course, one has to gather at least 50 points (i.e. 50% of the maximum count of points). For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course, the students will acquire theoretical knowledge about general didactics point the chemistry education.	
Brief syllabus: 1. Introduction. Didactics as science. Object of Didactics. General and Subject-oriental Didactics. 2. Characterization the education system in Slovakia. 3. National and school education program – education field „Človek a príroda“. Curriculum framework. Chemistry in curriculum framework. Chemistry educational standards. Cross curricular themes in education field „Človek a príroda“. Requirement for chemistry leaving exam. 4. Teaching plan. Lesson plan. Curriculum and its structure. Textbooks, workbooks, learning and teaching equipments, didactical materials and tools – in generally. 5. Teaching process. Education goals. The conditions and phases of the education process. 6. The 1st writting test. 7. The teaching principles. 8. Classification of the teaching methods and their description. 9. The organization forms of the classroom lesson in chemistry education. 10. Teaching and learning equipments, didactical materials and tools in chemistry education. 11. Teacher’s lesson plan. How to prepare for the teaching process? 12. The 2nd writting test.

Results of education: Upon successful completion of the course, the students will acquire competencies to create complex methodological analysis of selected chapters and create models of knowledge mediation in topics of general and inorganic chemistry in elementary and high school chemistry education	
Brief syllabus: 1. Introduction. Objectives of chemistry as subject in elementary and high school education. 2. Content characterization of general chemistry and inorganic chemistry in upper section of primary education ISCED 2 - and secondary education level. ISCED 3A 3. The cognitive and concept formation process in general and inorganic chemistry in both-primary and secondary -level of education (ISCED2 a ISCED3A) 4. Didactic analysis and interpretation of two topics: "Chemistry around us" and "System of materials" 5. Didactic analysis and interpretation of the follow topics: "Composition of materials" (ISCED 2) and "Chemical bond" (ISCED 3A) 6. Didactic analysis and interpretation of topics: "Structure of atom and ions" (ISCED2, ISCED3A) and "Chemical bond" (ISCED 3A). 7. Didactic analysis and interpretation of themes: "Periodic table of elements"(ISCED 2, ISCED 3A) and "nomenclature of inorganic compounds" (ISCED 3A). 8. Didactic analysis and interpretation of theme: transformation of materials- physical and chemical changes (ISCED 2) 9. Didactic analysis and interpretation of themes: "Course of chemical reactions", "chemical reaction equations and their types" (ISCED 3A). 10. Didactic analysis and inerpretation of themes: protolytic reaction and redox reactions (ISCED 2, ISCED 3A).	

11. Didactic analysis and interpretation of themes: "metals (s-block elements a d-block elements) a nonmetals and metalloids (p-block elements) (ISCED 2, ISCED 3A).
12. Presentation of final projects.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ DP1/15	Name: Technical and Didactical Aspects of Chemistry Laboratory Practical Education I.
Types, range and methods of educational activities: Form of study: Practical Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the students will be issued two written tests each of maximum 30 points, while another amount of 40 points can be granted for his/her laboratory protocols. The final classification is obtained as the sum of points obtained for the written tests (60%) and from the classification of laboratory protocols (40%). For the final classification to be A one has to acquire 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: After successful completion of the course student can technically and methodologically manage chemical laboratory practice, also acquired skill in implementing demonstration experiments in various form and master the didactic analysis and create models of student experiments in chemistry teaching.	
Brief syllabus: 1. Introduction. Didactical interpretation of occupational safety and health regulation during the chemical laboratory practice 2. Characterization of school chemical experiments- their types and division. Characterization of student's competencies 3. Characterization and maintenance of school laboratory equipments , laboratory glassware, aids and chemicals. Terminology of laboratory equipments and technics, and their didactic interpretation in chemistry teaching. 4. Range and systematization of basic equipments, chemicals in equipment store- administration and updating of chemical inventory . 5. Development and consolidation of manual skills and habits during the work with chemicals. Didactic interpretation of basic laboratory operations . 6. Didactic interpretation of demonstration experiments. Demonstration experimets carried out with screening, modeling of chemical experiments using IKT/DT. 7. Didactic interpretation of student's experiments. Adaptation of project methody and IBST methody. (Inquiry Based Science Teaching). 8. Experimets realized in the field. „Portable laboratory"and their didactic interpretation. 9. Implementation of laboratory measuring instruments and computer aided laboratory techniques in the chemistry teaching. The basic principals in good laboratory practice. 10. Assessment of student's work in chemical laboratory	

11. Final evaluation

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ DP2/15	Name: Technical and Didactical Aspects of Chemistry Laboratory Practical Education II.
Types, range and methods of educational activities: Form of study: Practical Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the students will be issued two written tests each of maximum 30 points, while another amount of 40 points can be granted for his/her laboratory protocols. The final classification is obtained as the sum of points obtained for the written tests (60%) and from the classification of laboratory protocols (40%). For the final classification to be A one has to acquire 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: After successful completion of course student master didactic analysis and through chemical experiments can transfer knowledge of selected thematic units of chemistry for ISCED2 and ISCED3 education, also acquired skill in implementing interesting demonstration experiments and managing students laboratory work. After successful completion of the course the student is able to carry out chemical experiments from everyday life.	
Brief syllabus: <ol style="list-style-type: none">1. Introduction. Basic principals of good laboratory practice. Occupational safety.2. Didactic interpretation of school experiments connected with themes chemistry around us (ISCED 2) and system of materials. (ISCED 3A)3. Didactic interpretation of experiments from theme: Transformation of materials-physical and chemical changes. (ISCED 2 and ISCED 3).4. Didactic interpretation of experiments from topic: Factors affecting the reaction rate. (ISCED 2 and ISCED 3).5. Didactic interpretation of experiments : Protolytic reactions (ISCED 2 and ISCED 3).6. Didactic interpretation of experiments: redox reactions (ISCED 2 and ISCED 3).7. Didactic interpretation of experiments from selected topics of inorganic chemistry (ISCED 2 and ISCED 3).8. Didactic interpretation of experiments from selected topics of organic chemistry (ISCED 2 and ISCED 3).9. Didactic interpretation of experiments from selected topics of biochemistry. (ISCED 2 and ISCED 3).10. Didactic interpretation of experiments from selected topics of analytical chemistry (ISCED 2 a ISCED 3).11. Chemical experiments from everyday life and their application in teaching of chemistry.	

12. Final evaluation

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ DTK/15	Name: ICT in Chemistry Education
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students will be delivered a test of maximum 50 points, while he/she can gather another 50 points with homeworks assigned during the semester. For the successful termination of the course, one has to gather at least 50 points (i.e. 50% of the maximum count of points). For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course, the students will meet the properties and attributes of the information society. They will be able to compare traditional education vs. education in digital age. The student can describe requirements of the information society for the education process. They will be able to characterize the basic components of the selected ICT use for education purpose. The students can implement their IT knowledge into chemistry education process on both ISCED 2 and ISCED 3A level of the education.	
Brief syllabus: 1. Introduction. Comparison attributes of the traditional school and digital school. 2. Description of the information society. History path preview of the information society from the beginning until now. 3. Characterization of the concepts: communication, digitalization, informatization, globalization, the digital competencies - differences between people/students in digital knowledge, the risks of on-line and virtual world, copyright and plagiarism. 4. Cognitive learning theories in digital age. Learning styles changes - digital tools to support learning process. 5. Chemistry and digital competencies, e-learning materials, e-Learning, m-Learning, learning software – characterization. 6. The 1st writing test. 7. Basic tools of ICT. 8. History of ICT. 9. Mobile digital ICT in education. 10. Multimedia – its didactical aspects in chemistry education. 11. Interactive communication during the learning process – social websites, chat, blogging, vlogging etc.	

12. Presentation of students' homework. The final evaluation of the course.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ IAK/15	Name: Foreign Chemical Extraction of Food-stuffs
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 1	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester a writing test is compulsory, when the maximum points are 50. Moreover, another 50 points can be achieved from the essays and project works. The conditions for the successful recognition of the course are the collection of 50 points (maximum points are 50 + 50 = 100), i.e. 50% performance. Grading system: grade A (90–100%), grade B (80–89%), grade C (70–79%), grade D (60–69%), grade E (50–59%), and grade F (49% and below).	
Results of education: After the successful accomplishment of his/her studies, students can utilize his/her knowledge of inorganic and organic chemistry in order to understand the mechanism of the activity of artificial additives which can be found in our foodstuff. He/she will realize what is the aim and importance of the monitoring these artificial additives in our foodstuffs. Students will be able to interpret the relationships between these additives, their quality marks, and he/she will be able to evaluate their positive and negative effects.	
Brief syllabus: 1. The role and importance of chemicals with foreign origins 2. The raw materials of foodstuffs. Their importance, application and utilization for human consumption. The importance of the foodstuff components for our healthy foods. How to prepare our students for healthy life style 3. The human foodchain. The importance of healthy foods in the view of our biological developments 4. The importance of the education of our future chemistry teachers 5. The basic materials of our foodstuffs, their importance and utilization for the humanbody. The importance of the composition of our food in the development of healthy life style of the young generation 6. The importance of the human foodchain. What are the key issues in the view of our biological development 7. The expertise of the chemistryteachers of our future generation 8. The rules of the human foodchain. The importance of food consumption in view of the periods of our biological developments 9. The expertise of the future generations of the chemistry teachers 10. The role of the individuals in the foodchain. The function of foods and their ranking from the view of chemistry education	

11. The most important bioelements, their role in the human body
12. Quality control of our foodstuffs. Personality character of the future generation of chemistry teachers
13. Qualitative characterization of the artificial additives
14. Quantitative characterization of the artificial additives
15. How to detect the natural components of our foodstuff in order to preserve the healthy foodchain for the future generation
16. Characterization and evaluation of the common food additives in the view of chemistry
17. Characterization of artificial additives, their mutagenic, teratogenic and carcinogenic effects from the view of a chemistry teacher
18. The presence of pesticides, herbicides and heavy metals in our foodstuffs, their interactions
19. Foodstuff regulations in Slovakia. Normaccontrols, patent rules. The role of chemistry teachers in the future

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ JCH/15	Name: Nuclear Chemistry
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester a writing test is compulsory: the maximum points are 50. Moreover, another 50 points are available from the mid-term and final projects (maximum points 50 + 50 = 100). The minimum requirement for the successful accomplishment of the course is overall 50 points, i.e. 50% of 100 points. Grading system: grade A (90–100%), grade B (80–89%), grade C (70–79%), grade D (60–69%), grade E (50–59%), and grade F (49% and below).	
Results of education: By successfully finishing this course, students will be familiar with the basis of nuclear and radiochemistry, including the usage and handling of radioactive materials	
Brief syllabus: 1. Elementary particles, nucleus, isotopes, isotones, isobars 2. Radioactivity — basic features, kinetics 3. Types of the radioactive radiation: ###-decay 4. Radioactive decay chains 5. Natural and artificial radioactivity 6. Radiometric dating 7. Detection and measuring radioactivity 8. Interactions of the radioactive decay with matter 9. Consequences of the radioactivity. Dosimetry. Limits and quantities 10. Peaceful utilization of the radioactive decay. Nuclear power station, and their risks 11. Nuclear weapons

Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ KIK/15	Name: Chemical Literature and Sources for The Educational Practice for Teacher
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 1	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester a writing test is compulsory: the maximum points are 50. Further 50 points can be collected from project work. The minimum requirement for the successful accomplishment of the course is overall 50 points, i.e. 50% of 100 points. Grading system: grade A (90–100%), grade B (80–89%), grade C (70–79%), grade D (60–69%), grade E (50–59%), and grade F (49% and below).	
Results of education: By successfully finishing this course, students will have a broad overview of the main sources of chemical information. They will have the basic ability in managing the scientific and special expertise in his/her future, pedagogical digital reading–writing carrier. Furthermore, it is very important for the students to be acquainted with the importance of the usage the literature and databases of of the practice of chemistry.	
Brief syllabus: 1. The internet for the chemists 2. Practical usage and application basic monographs (Gmelin, Beilstein, Patai, etc.) for the chemistry teachers of the future 3. Scientific papers and their importance for the chemistry teachers of the future 4. Abstracting literature (Chemical Abstracts) 5. Standards, legal issues, patents 6. Introduction to the chemical databases. Free and paid databases, and their utilization in chemistry teaching 7. Preparation of scientific projects and applications 8. Evaluation of the scientific performance in chemistry 9. Presentation of the results of scientific research — BSc, MSc, scientific papers, seminars, conference presentations (oral and posters) 10. Citations, how to use citation protocols in the practice of the next chemistry teachers 11. Defense of the final project

Conditions for passing the subject: During the semester, the students will be delivered two written tests each of maximum 25 points (it means max. 50 points), while he/she can gather another 50 points with homeworks assigned during the semester. For the successful termination of the course, one has to gather at least 50 points (i.e. 50% of the maximum count of points). For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course, the students will be able to do the complex didactical analysis of the learning content "chemical calculuses" and can do preparation for classroom lesson in primary- and secondary education.	
Brief syllabus: 1. Introduction. Didactical analysis of the learning content "chemical calculuses" on ISCED 2 and ISCED 3A level of the chemistry education. 2. Didactical analysis and rendition the learning content Physical-chemical quantities, base quantities (ISQ), units. 3. Didactical analysis and rendition the conceptions: amount of substance, size of an ensemble of elementary entities, relative atomic and molecular mass, volume, relationships between physical quantities. 4. Didactical analysis and rendition the learning content: Calculations by chemical formulas. 5. Didactical analysis and rendition the learning content: solution, mass- and mole fraction. 6. Didactical analysis and rendition the learning content: Molar concentration, molality. 7. The 1st writing test. 8. Didactical analysis and rendition the learning content: volume fraction of the solutions, mixtures contained more components, density of the solutions. 9. Didactical analysis and rendition the learning content: solubility, quantification of the solubility of the ionic compounds in water. 10. Didactical analysis and rendition the learning content: calculations needed to prepare solutions at given concentration. 11. Didactical analysis and rendition the learning content: chemistry calculuses by reaction rates. 12. The 2nd writing test.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ MAM/15	Name: Motivational and Active Learning Methods in Chemistry Education
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students can gather 60% of the maximum points from the active participation of the course and homeworks, while the remainder 40% of the points can get from project realization and its presentation. For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course, the students will acquire theoretical knowledge about motivational and active learning process and will able to implement their knowledge into their teaching process and further pedagogical practice.	
Brief syllabus: 1. Introduction. The philosophy of LLL. Motivation to LLL. Motive and motivation – its types and their description. The motives to learn chemistry. 2. Constructivism. Classroom lesson by constructivist way – the role of teacher and student. Communication as a motivational, activizational and management tool of teacher . 3. Characterization the active learning methods in chemistry. 4. Simple active learning methods in classroom chemistry lesson. 5. Application of the simple active learning methods in classroom chemistry lesson. 6. Cooperative learning. 7. Application of the cooperative learning methods in chemistry education. 8. Problem-based learning. Problem-based chemistry worksheet. 9. Problem solving models in chemistry education. 10. Characterization of project management – in generaly. Project methods in education. 11. Project-based learning in chemistry. 12. Presentation and defence the students‘ projects. The final evaluation of the course.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ OPC/15	Name: Organoelement Chemistry
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester 2 writing tests are compulsory: the maximum points are $2 \times 25 = 50$. The minimum eligibility requirement for the oral exam is overall 25 points from the two writing tests. The maximum points at the oral exam are 50. The final evaluation comprises both the writing test and oral exam (maximum points $50 + 50 = 100$). Grading system: grade A (90–100%), grade B (80–89%), grade C (70–79%), grade D (60–69%), grade E (50–59%), and grade F (49% and below).	
Results of education: After finishing his/her studies, the students became familiar with the atomic structure, bonding theories, and basis of metalorganic chemistry. We will focusing on the practical application of metalorganic compounds, especially their applications in the catalytic processes	
Brief syllabus: 1. History of organometallic chemistry. Discovery of ferrocene 2. Definition of organoelement chemistry 3. Categories of the ligands. 4. Nomenclature of organoelement compounds 5. Geometry of organoelement compounds 6. Nomenclature of organoelement compounds 7. Typical reactions of organoelement compounds 8. Organometallic compounds of non-transition metals 9. Organometallic compounds of transition metals 10. Catalytic reactions of organometallic compounds. Homogeneous and heterogeneous catalysis 11. Organometallic chemistry. Ziegler–Natta catalysts, its discovery

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ PPX2/15	Name: Pedagogical Practice II.
Types, range and methods of educational activities: Form of study: Practical Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Active participation in the teaching practice will be carried out complying with the principles outlined by the UJS PF regulations of teaching practice..	
Results of education: The student will be able to observe, evaluate and analyse the class activity during the teaching practice and the methodology of elementary and secondary school teaching on the basis of the pedagogical-didactic principles applicable at elementary and secondary schools. The student will be able to teach a class independently.	
Brief syllabus: Direct experience of the didactic and educational principles of elementary and secondary education in the actual environment and in actual interaction with learners and students. Observation and analysis of teaching activity. Acquisition of the special methodology of teaching English as a foreign language at the elementary and secondary school level in the light of the contemporary aspects and didactics (based on individual conception). Application of pedagogical approaches focusing on the learners' personality. Expected elements of the applied methodology include creativity, independence, individualization and complementarity.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ SAM/15	Name: Spectral Methods
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students will be delivered two written tests each of maximum 25 points. To be allowed for the oral part of the examination, the students will have to gather at least 25 points from both tests (i.e. 50% of the total possible count). The maximum number of points obtainable at the oral part of the exam is 50. The final classification is obtained from the sum of both parts of the examination – written and oral. For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Upon successful completion of the course the students will acquire knowledge about the most common spectral methods used in current research and will get familiar with employing individual methods for selected chemical problems	
Brief syllabus: 1. Introduction to methods for determining the structure of compounds. Qualitative and quantitative analysis. 2. The Electromagnetic field. Electromagnetic radiation and its generation. The spectrum of electromagnetic radiation. 3. Interaction of atoms and molecules with external fields (electric, magnetic and electromagnetic). 4. Emission methods and analysis. 5. Absorption methods and analysis. 6. Thermoanalytical methods. 7. The Zeeman effect. Magnetic resonances. 8. Nuclear spin. Nuclear magnetic resonance. Application of NMR in chemistry and medical practice. 9. Electron spin. Chemistry of radicals. Electron paramagnetic resonance. 10. Electron microscopy. 11. Diffraction methods. Electron and X-ray diffraction. Sources of radiation. Particle accelerators. 12. Single-crystal and powder diffraction.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ TKT/15	Name: Planning and Realization of Chemical School Projects and Excursions
Types, range and methods of educational activities: Form of study: Practical Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 1	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, the students will be delivered a test of maximum 50 points, while he/she can gather another 50 points with homeworks assigned during the semester. For the successful termination of the course, one has to gather at least 50 points (i.e. 50% of the maximum count of points). For the final classification to be A one has to obtain 90-100% of the total points, for B 80-89%, for C 70-79%, for D 60-69% and for E 50-59%.	
Results of education: Student after successful completion of learning process will be able to creatively plan and implement excursions, also gains knowledge in project management which will be able to apply in practice of future chemistry teacher. It strengthens the sense of responsibility in relation to healthy lifestyle and perception of the aesthetic values of environment. It deepens, develops and reinforces the scale of value of the future teacher in environment education. The active participation in seminars form the personality of the future teacher of chemistry , develop the ability to cooperate in group , divide tasks and take responsibility.	
Brief syllabus: <ol style="list-style-type: none">1. Basics of project management.2. Phase of project –incubation phase and project planning .3. Phase of project – execution and presentation of project4. Phase of project– evaluation and correction of project5. Excursion as an option of meaningful learning of chemistry.6. Excursion as a tool of practical education.7. Preparation for the excursion and explore possibilities and conditions of educational influences.Preparation of thematical excursion.8. Organizational and technical aspects of chemical themed excursions9. Planning process of chemical excursions. Making time-theme schedule.10. Realization process of chemical excursion.11. Evaluation of participation in thematical excursions.12. Proceeds of excursion for the future teachers of chemistry13. Advantages and disadvantages of domestic and foreign excursions.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KCH/CHdm/ VFE/15	Name: Selected Chapters from Environmental Chemistry
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 1	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester a writing test is compulsory: the maximum points are 50. Further 50 points can be collected from project work. The minimum requirement for the successful accomplishment of the course is overall 50 points, i.e. 50% of 100 points. Grading system: grade A (90–100%), grade B (80–89%), grade C (70–79%), grade D (60–69%), grade E (50–59%), and grade F (49% and below).	
Results of education: After the successful accomplishment of his/her studies, students will become familiar with the basic role of the environmental factors and their structure. He/she will be able to characterize the connections between the organisms and between the humans and her environments. Due to the chemical education he/she can apply this knowledge for the formation and protection of the environment at local, regional and international level. He/she will get an overview on the present state of the environmental issues in this country, and about the future changes. He/she can evaluate the importance of sustainability, as the positive perspectives of our society. He/she can apply this knowledge in chemical education in the form of pedagogical practice.	
Brief syllabus: 1. Chemistry is an important part of natural sciences. It is an important link between the humans and their environment 2. The effect of chemistry on human life 3. Evaluation of the environment and its components. Characterization of the soil, water, and air, based on chemical principles 4. The characteristic physical and chemical parameters of our environment 5. The sources of the contaminations, their chemical characterization 6. The most important polluting materials in the air, water and soil. 7. Technologies, used for the determination of soil contaminations and methods for its cleaning 8. Instrumentations and methods used for water purifications 9. Instrumentations and methods used for the air purifications 10. Characterization of the industrial and domestic trash from the viewpoint of organic chemistry 11. Neutralization and recycling. Chemical characterization from the viewpoint of environmental friendly processes 12. The legal actions and the environmental protection laws in Slovakia	

13. Relationships of the local and global environmental factors, the responsibility of the individuals

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DAL2dm/AJ/15	Name: History of English Literature 2.
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students have to take two written tests, each for 20 points. Students have to prepare a presentation for 10 points. The course finishes with an oral exam for 50 points. In order to obtain evaluation A, it is necessary to collect at least 90 points, for B at least 80 points, for C at least 70 points, for D at least 60 points, for E at least 50 points.	
Results of education: By completing the course, students will be able to describe the individual trends of English literature from the beginning of the 20th century until the contemporary period, will be able to evaluate the effects of realism, modernism, and postmodernism and analyse the development of fiction, poetry and drama.	
Brief syllabus: The lectures and seminars provide a theoretical background and practical exercises in modern and postmodern literature with special attention to the theories of David Lodge, Ihab Hassan, John Barths, Roland Barthes, Gerard Genette, Northrop Frye and Brian McHale. Students will be encouraged to apply the presented opinions and literary approaches, critical schools during the interpretation of the following literary works: Virginia Woolf: Orlando, James Joyce: A Portrait of the Artist as a Young Man, Dubliners, Ulysses, Samuel Beckett: Waiting for Godot. Maloy, Murphy, Graham Greene: The Power and the Glory, George Orwell: 1984, Animal Farm, David Lodge: Changing Places, Anthony Burgess: A Clockwork Orange, Graham Swift: Waterland, Julian Barnes: The History of the World in 10 ½ Chapters, Ian McEvan: Amsterdam and Salman Rushdie: The Satanic Verses.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DAM2dm/AJ/15	Name: History of American Literature 2.
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students will write two tests with a score of 20 points each. They will also prepare a presentation for 10 points. The course will end with an oral exam of 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: By accomplishing this course the student will be able to characterize certain trends of American literature from the beginning of the 20th century until the present, and will be able to evaluate the influences of realism, modernism and postmodernism, and analyse the development of novels, poetry and drama in the given period.	
Brief syllabus: America of the 20th century saw the rise of the nation and contributed significantly to its formation. The course will illustrate various voices and trends and will support students in understanding the development of American literature. The course will deal with the most important literary works of the period, which provide an insight into the rediscovery of America. The works to be analysed in the seminars will include novels and short stories by Hemingway, Faulkner, Scott Fitzgerald, Steinbeck, Kurt Vonnegut, Saul Bellow, poetry by W. C. Williams, e.e.cummings, R. Lowell, A. Ginsberg, S. Plath, drama by Tennessee Williams, Eugen O'Neil, E. Albee, etc.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DELIdm/AJ/15	Name: Children's Literature
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 20 points. The student has to prepare a presentation, for which 10 points can be earned. The course will end with an oral exam for 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having successfully accomplished this course, the student will be able to evaluate the contemporary trends and phenomena of British and American child literature, as well as to analyse texts of key importance in British and American child literature.	
Brief syllabus: The course introduces the history of British and American child literature and discusses key issues of the topic. How does child literature differ from adult literature? How do children read, and what critical reactions are acceptable from adults? The course pays special attention to the phenomenon of literary nonsense and fantasy literature. The course will concentrate on the following themes: The beginnings of child literature (I. Watts, J. A. Taylor, E. Lear, W. de la Mare); Tales and folk narratives (origin, structure, classification); Modern narratives – literary nonsense (Lewis Carroll), symbolic tales (Oscar Wilde), animal stories (Rudyard Kipling, B. Potter, K. Grahame, A. A. Milne, E. B. White); Contradictory stories (Roald Dahl); Main types of modern fantasy (C. S. Lewis, J. R. R. Tolkien); Fantasy novels (P. Dickinson, A. Garner, J. K. Rowling, Ph. Pullman); Realistic stories – social and racial issues (Ch. Dickens, M. Twain, H. Beecher-Stowe), family saga, school stories.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DRA2dm/AJ/15	Name: Drama Techniques in Teaching English 2.
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the student has to submit a seminar paper for 50 points and prepare a presentation for another 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having successfully accomplished this course, students will be able to independently apply drama technique in teaching English. They will also be able to organize and develop their own drama projects and lesson plans, and to use these in the foreign language classroom.	
Brief syllabus: The goal of the course is to activate the classroom application of the drama technique acquired by students in the course Drama Techniques I of the previous year. After a survey of basic drama techniques students develop their own lesson plans and drama exercises for the purpose of teaching English grammar and vocabulary. Topics of the course also include the following: Using drama plays at the elementary school. Drama techniques at the secondary school. Drama techniques in adult education. Directing and acting out a play in a foreign language.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DSAJdm/AJ/15	Name: Master's Thesis Seminar
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students are required to formulate the hypothesis and the structure of their thesis, for which they can obtain 20 points. They have to collect at least 15 sources for the bibliography section, by which another 10 points can be earned, and furthermore, 70% of the thesis has to be accomplished for another 70 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: Having successfully accomplished this course, students will be able to write the abstract of their thesis, as well as appropriately cite the literature used, and can write up and present 70% of their thesis.	
Brief syllabus: The main goal of the course is to support the students in the process of writing their own thesis. The topic and the exact title of their work were already fixed in the previous semester. During the course and the given semester the supervisor suggests basic reading materials to be read and studied by the student. Beyond this the student is supposed to do individual search for and research of further literature. After consultations the student outlines the structure of the thesis, and writes the thesis.

Conditions for passing the subject: During the semester the students take a number of short pop quizzes for a total of 30 points and present the summary of an article published in a professional journal for a maximum of 20 points. The course finishes with a written exam which is worth 50 points. In order to obtain an A the students must achieve at least 90 points, for a B 80 points, for a C 70 points, for a D 60 points, and for an E 50 points.	
Results of education: By completing this course the participants will be able to look at special needs learners not as disabled persons but as individuals who are different and who can also achieve success provided their special needs are catered for. The participants will be able to recognize the most frequent symptoms of dyslexia and will be able to organize classroom work in a way that accommodates special needs learners.	
Brief syllabus: The course is built on the results of a complex research project conducted for more than a decade. Its aim is to help participants realize that dyslexia as a special need does not exclude successful language learning, it only requires a different teaching approach. During the course the students will find out about the motivation of dyslexic language learners, their learning experiences, and the instructional methods and techniques that can be successfully applied in teaching them. Besides finding out about research conducted in a Slovak and Hungarian context, the participants will also get an insight into the broader international research. When discussing the legal background, the students will find out about possible accommodations, exemptions, as well as how far various language exam centers take account of the needs of dyslexic learners.

Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 2 For the study period: 13 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student is required to prepare a presentation for 25 points, submit an essay also for 25 points. The course ends with a written exam by which 50 points can be obtained. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: Having accomplished this course, the student will be able to continuously and effectively evaluate teaching materials and to select the teaching materials and tools appropriate for teaching English. The student then can assess the advantages and disadvantages of teaching materials, as well as suggest supplementary tools. The student will learn how to utilize ICT devices in teaching contemporary English.	
Brief syllabus: This course deals with the planning and organization of teaching and education. Students learn the basic principles of lesson planning, analyse the ways of adapting tasks from course books, and propose their own exercises and evaluate them. Numerous teaching materials and educational devices will be introduced (visual, audio-visual, authentic materials, tablet, projector, computer, videos, etc.). Questions related to foreign language testing and evaluation, as well as basic concepts such as reasons for testing, types of tests or suggestions for administering tests will be also covered by the course.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ MEVLdm/AJ/15	Name: Methodology of Teaching Literature in the EFL Classroom
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students must present three exercises demonstrating teaching English through literature. This will earn them 30 points. Two tests will be administered with a score of 35 each. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: After successfully accomplishing this course students will be able to prepare lesson plans for teaching English as a foreign language through literature. Students will be able to use literary texts for the purpose of foreign language teaching.	
Brief syllabus: The course concentrates on using literary texts in foreign language education, and uses such texts as sources for language instruction and analyses them not from a primarily literary viewpoint. Students are motivated to focus on the text and do interactive exercises. The course is based on the idea that foreign language can be taught with the help of literary texts, and it examines the main goals, the approaches to classroom applications, selection of texts, the various steps in utilizing novels, short stories, drama and poetry. Student will do intensive work during the seminars: they will prepare actual lesson plans and use language games, video recordings, pictures, translations, etc.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ SAJdm/AJ/15	Name: English Language and Literature
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study:	
Level of study: II.	
Prerequisites: KMF/APLI1dm/AJ/15 and KMF/DAL2dm/AJ/15 and KMF/MET3dm/AJ/15 and KMF/APLI2dm/AJ/15 and KMF/DAM2dm/AJ/15 and KMF/TYLdm/AJ/15 and KMF/DELI1dm/AJ/15 and KMF/DRA2dm/AJ/15 and KMF/FRAZdm/AJ/15 and KMF/PPX4dm/AJ/15	
Conditions for passing the subject: The student has to obtain the necessary number of credits from compulsory and elective subjects required by the study plan.	
Results of education:	
Brief syllabus: 1. Language and speech; human communication; langue/parole, competence/performance, descriptive and prescriptive approaches; levels of linguistic analysis: phonetics/phonology, morphology, syntax, semantics, pragmatics, discourse analysis, phraseology and paremiology. Properties of human language (displacement, arbitrariness, productivity, cultural transmission, duality) 2. Formal linguistics, applied linguistics. Main schools of thought in formal linguistics. The notion of applied linguistics, main areas of research. Interdisciplinary relations: sociolinguistics, psycholinguistics, computational linguistics, stylistics, philosophical linguistics, anthropological linguistics, forensic linguistics, corpus linguistics, cognitive linguistics, paremiology, phraseology. 3. Linguistics and the social context of language use. The notion of sociolinguistics. Context of speech (components of the speech event, Hymes model). The functions of language, models (e.g. Jakobson). The relationships between function and form. 4. Pragmatics. Speech act theory, direct and indirect speech acts. Politeness Theory. The cooperative principle (Grice). Conversation analysis. Discourse analysis. Speech practices associated with gender. 5. Language variation. Varieties of English according to users: regional and social varieties. Use-related varieties of English: field of discourse, medium, attitude. 6. Languages of the world. The notions of language, dialect, accent, idiolect. Languages of the world (typological and genetical classifications). The Indo-European language family. The Proto-Indo-European language (PIE); Latin; English; Cognates; English and the Germanic languages. 7. Main periods in the development of English. Old English, Middle English, Modern English. Similarities and differences between British English and American English. Major and minor influences on the development of English (Old English, Middle English, Modern English). Borrowing in English. The influence of English in the world.	

8. Multilingualism, multiculturalism. English as a native, a second and a foreign language. The notions of language and culture. Anthropological linguistics, Sapir-Whorf hypothesis. Forms of multilingualism, multiculturalism. Pidgin and creole, lingua franca.
9. Language planning: corpus planning, status planning. Language and education, foreign language education. Planning English as a foreign language education.
10. Lexicology, word structure. The notions of lexicology, lexicon, lexeme, word structure. Inflection, derivation, affixation, suffixation, prefixation. Word classes.
11. Word formation processes in English. Compounding, conversion, acronyms, clipping, backformation, blending, nonce words; backformation. Lexical relations: synonyms, antonyms, meronyms, hyponyms, homophones, homonyms, homographs.
12. Types of dictionaries, main tendencies in the development of lexicography. The notion of lexicography. Dictionaries as sources of information (relations to levels of phonology, morphology, syntax, semantics, pragmatics). Main stages in the development of dictionaries. Outstanding American and British dictionaries. The use of dictionaries in EFL education.
1. Modernism. The cultural and philosophical background. Modernism in literature. Features of modernist works. Henry James. *The Beast in the Jungle*. Children's literature: Children's literature – early works. Chapbooks and horn books. Comenius, John Locke, John Newberry, Sarah Fielding, Anna Laetitia Barbauld
2. American Modernism. The Expatriate Movement. *Making it New in Prose*. Gertrude Stein. Ernest Hemingway. Children's literature: Fairy tales. Classification. Myths, legends, fables. Brothers Grimm, Andersen.
3. Modernism – cultural and philosophical background. Modernism in American poetry. Imagism. T. S. Eliot. Ezra Pound. Wallace Stevens. e. e. cummings. Children's literature: Victorian children's literature. Nonsense tale. Edward Lear. Lewis Carroll. *The Golden Age of children's literature*.
4. Modernism in American fiction. The features of a modernist text. William Faulkner. *The Sound and the Fury*. Children's literature: Children's fantasy. Classification. Journey fantasy. J. M. Barrie. L. Frank Baum
5. The Jazz Age. The American Dream in literature. F. S. Fitzgerald. *The Great Gatsby*. Children's literature: Stories with girl protagonists. The family story. Louisa May Alcott, Lucy Maud Montgomery, Frances Hodgson Burnett, Eleanor Hodgman Porter, Laura Ingalls Wilder
6. American drama in the 20th Century. Eugene O'Neill. Arthur Miller. Tennessee Williams: *A Streetcar Named Desire*. *The Theatre of the Absurd*. Edward Albee: *Who's Afraid of Virginia Woolf?* Children's literature: Folk tales and literary tales. The symbolic tales of Oscar Wilde
7. The Beat Generation. Beat poets – Allen Ginsberg. Beat prose – Jack Kerouac, J.D. Salinger. *The Catcher in the Rye*. Children's literature: Stories with boy protagonist. Adventure fiction. Defoe, Swift, Robert Louis Stevenson, Mark Twain
8. The emergence of Postmodernism in American literature. Brian McHale, Susan Sontag, John Barth, Ihab Hassan. Richard Brautigan. *In Watermelon Sugar*. Children's literature: Animal stories. Kipling, Beatrix Potter, Kenneth Grahame, Hugh Lofting, Jack London, A. A. Milne
9. The emergence of Postmodernism in American literature. Brian McHale, Susan Sontag, John Barth, Ihab Hassan. Thomas Pynchon. *The Crying of Lot 49*. Children's literature: Subversive fantasy: Roald Dahl's fantasy tales
10. Metafiction, metanarrative. Immigrant Writing. Vladimir Nabokov: *Lolita*. The short stories of Vladimir Nabokov. *Spring in Fialta*. Children's literature: *The School Story*: Fantasy in the Harry Potter series
11. The employment of black humour in fiction. Kurt Vonnegut: *Cat's Cradle*. The beginnings of sci-fi. Children's literature: *The Long Weekend in Children's Literature: 1920-1939*. P. L. Travers
12. African-American literature. The Harlem Renaissance, the Civil Rights Movement era. James Baldwin, Alice Walker, Toni Morrison: *Beloved*. Children's literature: Children's Literature after World War II, Clive Staples Lewis: *The Narnia series*

1. Teaching listening – authentic and realistic material, listening teaching techniques, “gist listening”, extensive and intensive listening; pre-, while- and post-listening activities
2. Teaching reading – authentic and realistic material, reading strategies, pre-, while- and post-reading tasks
3. Teaching speaking – different speaking activities, error correction, teaching pronunciation
4. Teaching writing – writing activities, text types, error correction
5. Teaching vocabulary – aspects of a word, techniques for introducing new vocabulary
6. Teaching grammar – different techniques for teaching grammar, introducing new language structure, teaching models
7. Teaching through drama. Drama techniques in teaching English as a foreign language
8. Course and lesson planning – a lesson plan, planning ‘well-balanced’ lessons
9. Language teaching aids, the types of visuals, educational technology
10. Evaluation and assessment – test types, test construction, reliability and validity
11. Mistakes and feedback, dealing with spoken and written errors, correction
12. Classroom management – pair work and group work, individual work

Literature:

Indicated in the information sheets of the compulsory courses of the study programme.

Language, knowledge of which is necessary to complete a course:

English

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ TYLdm/AJ/15	Name: Teaching Young Learners
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, students need to hand in a seminar work, for which they can collect 50 points, and they need to present two activities demonstrating teaching English in the lower level of primary school - one activity for teaching grammar, one for teaching vocabulary. Each presented activity is worth 25 points, i.e. 50 points altogether. In order to obtain evaluation A, it is necessary to collect at least 90 points, for B at least 80 points, for C at least 70 points, for D at least 60 points, for E at least 50 points. Students with less than 50 points will not be given any credits.	
Results of education: By completing the course, students will be able to teach English in preprimary level and in the lower level of primary school in a playful way. Students will be able to design their own activities and lesson plans for the indicated target group.	
Brief syllabus: During the course, students get acquainted with a number of techniques of teaching English to young learners. The course focuses on teaching language in a playful way, several activities for teaching vocabulary (including topics such as Colours, Family, Animals, Vehicles, etc.) and activities for teaching grammar will be presented.
