INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ DI1/15	Name: Didactics of Informatics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students are become familiar with special elements in teaching informatics subjects at elementary and secondary schools as well as with various forms and methods of teaching (problem based, project based learning and cooperative teaching). Continuous, individually and creatively works on their own preparation to the lesson (to the content), which must submit, subsequently presenting (to teach) in the frame of the exercise. During the semester, students have the opportunity to consult their sample preparation with teacher. During the semester, students are evaluated to their activity (creation of preparation) and for the performance (presentation of own preparation). Students must get at least the 50% of the total evaluation, to be allowed to pass the examination. The exam is combined and consists of practical part - presentation of the didactic software and verification of theoretical knowledge from creation of educational software. The students, to be classified, must be also successful at least 50% on the exam. Students are classified according to the average obtained in the overall assessment of the continuous preparing during the semester (50%) and according to the exam (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of this course students can use different teaching forms and methods, to know the structure of the lesson, and are able to apply their own preparation in the subject of informatics. They are aware of the possibilities of the computer as didactic tools in various forms and phases of education. They know control technical and legal context of the teaching and its organization.	
Brief syllabus: <ul style="list-style-type: none"> • Introduction to didactics of informatics, • special elements of teaching the subjects of informatics, • working on the computer for beginners, • work with text (problem based learning), • working with graphics (problem based learning), • spreadsheets and databases (problem and project based learning), 	

- Internet and communication (cooperative teaching),
- supporting of the creativity in the education - constructionism and constructivism,
- evaluating the pupil performance and the classification,
- preparation of teacher of informatics to the teaching,
- structure of the lesson,
- computer as a universal didactic tool,
- technical and legal context of the teaching and its organization.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ DI2/15	Name: Didactics of Informatics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students are become familiar with special elements in teaching informatics subjects at elementary and secondary schools -especially focused to programming, as well as with various forms and methods of teaching (problem based, project based learning and cooperative teaching). Continuously becomes familiar with the opportunities of children´s programming languages, individually and creatively works on their own preparation to the lesson (to the content of the phases of programming), which must submit, subsequently presenting (to teach) in the frame of the exercise. During the semester students must submit for evaluation 6 preparations, from which 2 needs to be presented. Students have the opportunity to consult their preparations with teacher. During the semester, students are evaluated to their activity (creation of preparation) and for the 2 performance (presentation of own preparation). Students must get at least the 50% of the total evaluation, to be allowed to pass the examination. The exam is combined and consists of practical part - presentation of the didactic software and verification of theoretical knowledge from creation of educational software. The students, to be classified, must be also successful at least 50% on the exam. Students are classified according to the average obtained in the overall assessment of the continuous preparing during the semester (50%) and according to the exam (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of this course students can use different teaching forms and methods, focused to teach programming at elementary and secondary school. Know the structure of the lesson, and are able to apply their own preparation to teach the programming in the subject of informatics. They are aware of the possibilities of the computer as didactic tools in various forms and phases of education. They know control technical and legal context of the teaching and its organization.	
Brief syllabus: <ul style="list-style-type: none"> • Safety regulations and health protection at work with a computer, • the place of programming in the frame of teaching informatics, 	

- children's programming languages and their application in primary and secondary schools - Logo turtle graphics, Imagine and other graphical programming environment,
- teaching programming in the "classic" programming language in primary and secondary schools,
- pupils' motivation and creativity,
- care of talented pupils - their preparation for programming competitions,
- evaluation of programming skills and performance,
- work with literature and with resources from the Internet (type freeware programs),
- social, ethical and psychological issues connected with teaching,
- methods of problem-based learning and collective problem-solving - active performance of students,
- technical realization of teaching - exemplification, electronic textbooks.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ MS1/15	Name: Modeling and Simulation 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 0 / 2 For the study period: 26 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the students except of analytical solutions of identification systems problems, making their mathematical models and computer implementation models create their own applications - computer simulation model of a particular system. Students are assessed according to the average percentage obtained on the basis of their continuous training assessment during the semester, their semester project and the exams. For assessment A it should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent.	
Results of education: After successful completion of the course the student is familiar with the methods of modeling and simulation, can do mathematical models, and he has has a theoretical knowledge and skills to implement them through appropriate programming environment. He can cope with the simulation of different dynamic effects in order to acquire new knowledge.	
Brief syllabus: Course contents: Introduction to modeling and simulation systems, basic terminology, classification systems and their essential characteristics , Discrete systems: Markov chain and its characteristics; queuing systems and their classification; Kolmogorov differential equations and analytical solutions of queuing systems ; Description and analytical solution for various types of queuing systems; Network queuing systems and analytical solutions; Methods for generating random numbers; Monte Carlo method and its applications; Compartmental models in discrete systems; Languages for modeling and simulation of discrete systems (SPML); Computer modelling and simulation of discrete systems; Simulation experiments, their planning and implementation, simulation protocol. Continuous systems:	

A description of continuous systems, mathematical models of continuous systems and their creation;
 identification of systems;
 Numerical methods for solving linear systems;
 Continuous compartmental models;
 Languages for continuous systems (PSI/I);
 Computer modeling and simulation in continuous systems;
 Simulation experiments, their planning and implementation;
 Interpretation of the results of the simulation experiment.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ PGR/15	Name: Computer Graphics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The course is finished by an exam. Students are assessed according to the average percentage obtained on the exams. For assessment A should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent. Credits will not be granted to students who obtain less than 50 percent.	
Results of education: After successful completion of the course the student gain insight into the world of digital image processing and computer graphics. He masters the technical terminology, algorithms, principles and procedures used in computer graphics. He is familiar with the work of raster and vector graphics, work with graphic data and formats, hardware components and modern methods.	
Brief syllabus: Introduction to image processing and computer graphics. Characterization of raster image and their displayig. Color models and the human visual system. Raster image formats. Raster image compression method. Image processing- highlighting , bounding of noise and so on. Stereograms, optical illusion. Characterization of vector images. Curves and surfaces. Geometric transformations. Visibility of objects. Lighting and shading. Fractals in computer graphics.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ PPX2/15	Name: Pedagogical Practice 2
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student shall transmit documentation on teaching practice: completed observation sheets, protocol of teaching practice, lesson plans and assessment of own performer teaching practice.	
Results of education: Within the teaching practice students observe and analyze educational process. They learn to apply the theoretical knowledge acquired during studies of general-education subjects, general and subject didactics. They gradually acquire teaching skills to conduct teaching profession.	
Brief syllabus: - 5 hours to listen: passive participation in the hour of the teacher trainer, during which the student monitoring the progress of the lesson, resp. the educational process and makes notes of the aspects of the lesson in monitoring sheets; - 5 hours of preparation: the student is preparing for the teaching activity, resp. for the management of lesson, according to the instructions and guidances of teacher trainer; - 5 hours of active teaching activity: the student performs as a teacher in the classroom selected by teachers trainer and leads the lesson; - 5 hours of analysis and evaluation: the teacher trainer and student jointly make analysis the activity of the student, from the methodological and didactical point of view.	
Literature: The current curriculum and educational standards. Pedagogical school programs for primary /secondary schools. Overview of current foreign pedagogical documents.	
Language, knowledge of which is necessary to complete a course: Hungarian language	
Notes: The student mandatory takes up the performer teaching practice (PPX2 respectively PPX3) from the one of their combination (subject specialization) in the 2. semester and the second one in the 3. semester.	

The performer teaching practice - active individual teaching of students (trainees) under the guidance of teacher trainers based on thought out written preparation. It has two forms: the continuous performer teaching practice and the related performer teaching practice.

The student absolves the continuous performer teaching practice (PPX2) from the one of their subject specialization in the 2. semester of master study (in the range of 20 hours per semester) and the continuous performer teaching practice from second one subject specialization (PPX3) in the 3. semester of master study (in the range of 20 hours per semester).

The student absolves the related performer teaching practice (PPX4) from each of subject specialization in the 4. semester of master study in the range of 40 hours per subject specialization, of which 20 hours in primary school and 20 hours in secondary school (the first subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school; the second subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school).

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMJ/MJdm/ BIK/15	Name: Bilingualism and Contactology
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: There will be four tests during the term. The scoring is the following: for mark A it is necessary to gain minimum 72 points, for mark B minimum 64 points, for mark C minimum 56 points, for mark D minimum 48 points, for mark E minimum 40 points. Below 10 points the credit is not accepted.	
Results of education: Students acquire theoretical knowledge from the field of Bilingualism and Contactology. Students become familiar with the term of Bilingualism. The acquired skills make them possible to use term apparatus within the topic of language contacts.	
Brief syllabus: The discipline makes students familiar with the language contacts in the Carpathian Basin, variability of natural languages, different language variants, language norm etc. The subject introduces students into the theory of sociolinguistic research.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMJ/MJdm/ MET1/15	Name: Hungarian language didactics
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: There will be four tests during the term. The scoring is the following: for mark A it is necessary to gain minimum 72 points, for mark B minimum 64 points, for mark C minimum 56 points, for mark D minimum 48 points, for mark E minimum 40 points. Below 10 points the credit is not accepted.	
Results of education: Students acquire theoretical knowledge and skills from the fields of Methodology of the first language. The subject introduces students into the terminology of Methodology. The acquired knowledge help students to use the term apparatus in their praxis.	
Brief syllabus: The discipline focuses on the theoretical and practical components of the mother tongue, furthermore beside the classical methods it applies the newest strategies as well. The acquisition of the language in certain parts of the discipline (teaching vocabulary, reading and comprehension) causes problems for different age groups, so the aim is to provide practical knowledge.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMJ/MJdm/ PPX2/15	Name: Teaching practice
Types, range and methods of educational activities: Form of study: Practical Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student presents the documentation of teaching practice: completed observation sheets, The minutes of teaching practice, lesson plans and the evaluation of the student's performance during teaching practice.	
Results of education: Within the framework of teaching practice, students observe and analyse the educational process, they learn to apply the theoretical knowledge and the general and specialized methodology acquired during their studies, and they gradually obtain skills necessary for their future teaching profession.	
Brief syllabus: - 5 lessons of observation: passive participation in the lesson taught by the teacher trainer during which students observe the course of the lesson respectively several aspects of the educational process and record their experiences in observation sheets; - 5 lessons of preparation: students prepare lesson plans according to the instructions and guidance of the teacher trainer for their active teaching activity, respectively for leading the teaching process; - 5 lessons of active teaching activity: students teach in a class selected by the teacher trainer as an independent teacher and lead the lesson; - 5 lessons of analysis and evaluation: the teacher trainer and the student analyze the activities of the student together from a methodical and didactic point of view.	
Literature:	
Language, knowledge of which is necessary to complete a course: Hungarian	
Notes: Final teaching practice - active teaching activities of students (trainees) under the supervision of a teacher trainer based on written preparation. It has two forms: continuously performed teaching practice and coherent teaching practice. Students undergo continuously performed teaching practice from one subject of their approbation in the second semester of master's studies (in range of 20 lessons per semester) and in the third semester from the second subject of their approbation (in range of 20 lessons per semester). Students complete their coherent teaching practice in	

the fourth semester of their master's studies in the range of 40 lessons in each subject of their approbation - 20 lessons at primary school and 20 lessons at secondary school (from the first subject of their approbation: 40 lessons = 20 lessons at primary school + 20 lessons at secondary school, from the second subject of approbation: 40 lessons = 20 lessons at primary school + 20 lessons at secondary school).

Prerequisites:	
Conditions for passing the subject: The student presents the documentation of teaching practice: completed observation sheets, The minutes of teaching practice, lesson plans and the evaluation of the student's performance during teaching practice.	
Results of education: Within the framework of teaching practice, students observe and analyse the educational process, they learn to apply the theoretical knowledge and the general and specialized methodology acquired during their studies, and they gradually obtain skills necessary for their future teaching profession.	
Brief syllabus: - 5 lessons of observation: passive participation in the lesson taught by the teacher trainer during which students observe the course of the lesson respectively several aspects of the educational process and record their experiences in observation sheets; - 5 lessons of preparation: students prepare lesson plans according to the instructions and guidance of the teacher trainer for their active teaching activity, respectively for leading the teaching process; - 5 lessons of active teaching activity: students teach in a class selected by the teacher trainer as an independent teacher and lead the lesson; - 5 lessons of analysis and evaluation: the teacher trainer and the student analyze the activities of the student together from a methodical and didactic point of view.	
Literature:	
Language, knowledge of which is necessary to complete a course: Hungarian	
Notes: Final teaching practice - active teaching activities of students (trainees) under the supervision of a teacher trainer based on written preparation. It has two forms: continuously performed teaching practice and coherent teaching practice. Students undergo continuously performed teaching practice from one subject of their approbation in the second semester of master's studies (in range of 20 lessons per semester) and in the third semester from the second subject of their approbation (in range of 20 lessons per semester). Students complete their coherent teaching practice in	

the fourth semester of their master's studies in the range of 40 lessons in each subject of their approbation - 20 lessons at primary school and 20 lessons at secondary school (from the first subject of their approbation: 40 lessons = 20 lessons at primary school + 20 lessons at secondary school, from the second subject of approbation: 40 lessons = 20 lessons at primary school + 20 lessons at secondary school).
