INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/HIdm/ DEI/15	Name: History of the European integration
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Regular participation in seminars (30 points). Successful completion of the final written test (with a total score of 30 points). Successful completion of the oral examination (with a total score of 40 points). The condition for successful completion of the course is to obtain at least 50% of the total assessment score. The assessment grading scale is: A 90–100%, B 80–89%, C 70–79%, D 60–69%, E 50–59%.	
Results of education: The students will learn about the relevant phenomena and problems of the historical process of European integration from 1945 up to the present, i.e. of European integration, both in the context of the cold war and of the period following it. Particular emphasis is placed on the international and supranational institutions in the European and the Euro-Atlantic area.	
Brief syllabus: The historical dimension of European integration; The Paneuropean idea after 1945; Rebuilding Europe after 1945; Military questions of European integration; The Montagne Union and the Treaty of Rome; Integration of (West) Germany in the European society, Ostpolitik; European integration after 1973, The détente and Helsinki I.; The institutions and the decision-making mechanism in the European Union; The process of integration of the Slovak Republic and other Eastern European states into the EU; The EU's influence on the daily lives of European citizens (the Schengen Agreement, the Monetary Union).

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/HIdm/ DPO/15	Name: Master's Thesis and Defense
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3., 4..	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Draw-up, submission and successful defence of the graduate thesis (at least 1 appraisal by the primary supervisor or the opponent not graded Fx).	
Results of education: The students are capable of processing the results of their own research, and of logical argumentation in a debate. They are able to create a scientific text. They defend their thesis before the State Examination Commission.	
Brief syllabus: The form, structure, and scope of the final thesis are determined by the Rector's relevant directive on the layout, registration, disclosure and archiving of final theses at the University of J. Selye. The authors are obliged to assess the sources and resources related to the topic, to describe the course of their own research and to draw conclusions on the analysis. In the course of the defence, they react on the comments of the primary supervisor and of the opponent, and answer the questions of the members of State Examination Commission.	
Literature: A szükséges szakirodalom a választott téma alapján változhat. Literatúra je zadávaná individuálne podľa spracovanej témy. Az Európai Közösségeket alakító gazdasági, politikai és katonai szerződések áttekintése 1957–1993 között: Római, Elysée, Schengeni, Maastrichti, Koppenhágai szerződések. (Nyugat-)Németország integrációja az európai közösségbe: Németország megítélése, különféle státuszai és válságai 1945 és 1991 között: Washingtoni egyezmények, Bonni szerződés, EVK, Hallstein- doktrína, neue Ostpolitik. Az 1945 utáni európai integráció Kelet-Európa szempontjából. A kommunista országok ún. szisztémaszintű inkompatibilitása. (Cseh-)Szlovákia integrációs folyamata 2004-ig. Az ún. helsinki folyamat (1975) összefüggései az emberi jogokkal és az államhatárok kérdésével, valamint az 1990-es párizsi EBEÉ-csúcs. Az Európai Unió jelenlegi fő működési mechanizmusai (kormányköziség, nemzetekfelettség), valamint az EU fő szervei és azok részletes jellemzése. Diktatúrák története Az olasz fasiszmus (a fasiszta diktatúra kiépülése és a fasiszta Olaszország külpolitikája). A nemzetiszocializmus Németországban (a náciizmus létrejötte, hatalomra jutása és jellege, német külpolitikai és katonai sikerek az 1930-as években és a világháborúban). A spanyol polgárháború és a Franco-rendszer.	

Az 1917-es forradalmak és a sztálini Szovjetunió a két világháború között.

A Szovjetunió és a kelet-európai sztálinista diktatúrák a II. világháború után (1945-1953).

Közép-Európa 1849-1945

A dinasztikus politika reneszánsza 1849 után, a krími háború, az egységes Olaszország és Németország létrejötte.

A szövetségi rendszerek kialakulása a 19-20. sz. fordulóján és a balkáni kérdés (német külpolitikai irányváltás, a hármasszövetség és az antant létrejötte, az 1878-as orosz-török háború, valamint az 1. és 2. Balkán-háború).

Az első világháború, a versailles-i békerendszer és Közép-Európa átalakulása a háború után.

Közép-Kelet-Európa államai a két világháború között és a nagyhatalmak vetélkedése a Közép-Kelet-Európa feletti befolyásért.

Közép-Kelet-Európa a második világháború előestéjén (az Anschluss, Csehszlovákia felszámolása, a lengyel kérdés, a Molotov-Ribbentrop paktum).

A második világháború közép-kelet-európai vonatkozásai (Lengyelország felosztása, a Szovjetunió területi nyereségei, német háborús sikerek és olasz törekvések a térségben, a keleti front, a kelet-európai kisállamok és a háború)

A magyarság története 1918 után

Magyarország az első világháború után: az „öszirózsás forradalom” és a Tanácsköztársaság.

A trianoni békeszerződés és következményei.

A bethleni konszolidáció évei (1921-1931)

Magyarország külpolitikája a két világháború között.

Revíziós sikerek 1938 és 1941 között.

Magyarország a második világháborúban.

A koalíciós időszak (1945-1948) és Magyarország szovjetizálása.

A Rákosi-rendszer

Az 1956-os forradalom és a Kádár-korszak

A szlovákiai magyarság története

Csehszlovákia megalakulása és a magyarok. A mai Dél-Szlovákia csehszlovák megszállása, a lakosság magatartása, sztrájkok, sortűzek, a tanácsköztársaság hatása, az államhatárok véglegesítése

A magyar kisebbség társadalmi, népesedési, gazdasági jellemzői az első Csehszlovák Köztársaságban (demográfiai, területi, szociális jellemzők)

A szlovákiai magyar politika az első Csehszlovák Köztársaságban

(pártstruktúra, ellenzéki pártok, aktivizmus, baloldal, fontosabb politikusok)

A magyar kisebbség kulturális, oktatási élete az első köztársaságban,

(művelődés, oktatás, ifjúsági mozgalmak, egyház)

A magyar kisebbség magatartása 1938-ban. Az első bécsi döntés

(Csehszlovákia politikája a kisebbségekkel szemben, a magyarság sérelmei, 1938-ban, a községi választások, a nemzetiségi státútum, magyar lakosság magatartása a bécsi döntés előtt)

A szlovákiai magyarok a háborús szlovák államban 1939–1945

Magyar idők a Felvidéken: az első bécsi döntéssel Magyarországhoz visszacsatolt területek reintegrációja (1938–1945)

A csehszlovák nemzetállam kialakításának kísérlete 1945–1948

(csehszlovák nemzetállami törekvések a második világháború alatt és után, a magyar lakosság kitelepítésének terve, a kassai kormányprogram és a kisebbségellenes jogalkotás, a csehszlovák-magyar lakosságcsere-egyezmény és végrehajtása, a csehországi deportálások, a reszlovakizáció, a népbíráskodás magyarellenes éle, a párizsi békekonferencia, fordulat a magyar kérdés kezelésében)

Magyarok a sztálinista Csehszlovákiában (az 1950-es évek)

(További felemás lépések a magyar kisebbség helyzetének rendezésére, a Megbízottak Testületének határozatai, a csehszlovák alkotmányok, az 1960. évi közigazgatási reform, az 1956-os magyar forradalom és a szlovákiai magyarság)

A szlovákiai magyarok 1968-ban és a normalizáció éveiben

(a Csemadok 1968. márciusi javaslatai és a szlovák társadalom reakciója, a szlovákiai magyar társadalom a prágai tavasz idején, a Csemadok megújulása, önálló magyar társadalmi szervezetek létrehozásának kísérlete, a magyar lakosság reakciója a katonai megszállásra, a nemzetiségi alkotmánytörvény, a nemzetiségi szervek létrehozása, majd leépítése, tisztogatások a Csemadokban, a pártállam nemzetiségi politikája a normalizáció idején, kísérlet a magyar iskolahálózat leépítésére, a CSMKJB tevékenysége, magyar-csehszlovák feszültségforrások a nyolcvanas évek végén, kisebbségi beadványok 1988-1989-ben)

Szlovák nemzeti mozgalom

A szlovák nemzeti mozgalom kialakulása a 18. század második felében: társadalmi bázis, nyelvi, felekezeti sajátosságok és célok.

A bibliai cseh nyelv szerepe. Az önálló szlovák nyelvi norma megteremtése: a Bernolák- és Štúr-féle nyelvi kodifikáció jelentősége.

A szláv kölcsönösség eszméje, a politikai pánszlávizmus jelensége Ján Kollár, Jozef Pavol Šafárik, Ľudovít Štúr munkásságában

A szlovák nemzeti mozgalom 1848–1849-ben. A Szlovák Nemzeti Tanács és a fegyveres szlovák felkelés

A szlovák nemzeti mozgalom 1860-1875 között: az 1861. évi szlovák nemzeti memorandum. A Matica slovenská létrejötte, működése és betiltása.

A Régi Iskola és az Új Iskola létrejötte. A Szlovák Nemzeti Párt kialakulása, programja, működése 1873-1914 között

A szlovák nemzeti mozgalom politikai újraéledése. A Szlovák Nemzeti Párt választási sikerei. A Szlovák Néppárt és a Szociáldemokrata Párt létrejötte a 20. század elején.

A Československá jednota, a cseh-szlovák egységmozgalom története 1896-1918

A szlovák kérdés az első világháború éveiben: az amerikai szlovákok aktivitása és a Masaryk vezette csehszlovák politikai emigráció.

A szlovákság kiválása a Magyar Királyságból. Az 1918. október 30-i turócszentmártoni szlovák nemzeti deklaráció.

Történelemdidaktika

A történelemdidaktika viszonya a történelemmethodikához. A történelemdidaktika és a történelemmethodika fogalmi és tartalmi különbségei. A történelmi tanulás/tanítás optimális típusai. A történelem mint tudomány és mint iskolai tantárgy viszonya. A múlt különböző felfogásainak szerepe az iskolai történelemtanításban. A történelem mint konstrukció: Hogyan konstruálódik a történelem?

Az ismeretek és a képességek fogalma az iskolai történelemtanításban. Az iskolai történelmi ismeretek (adat, tény, fogalom, ítélet) és képességcsoportok osztályozása.

Az értés-megjegyzés-alkalmazás-értelmezés paradigma. A tanulói aktivitás növelésének igénye, technikái, eszközei, nehézségei és korlátai.

Az óratervezés: az iskolai tevékenységek operacionalizációja és taxonomizációja.

A történelemtankönyv célja és típusai. A történelemtankönyv részei, módszertani egységei.

A forrásalapú történelemoktatás. A források didaktikai előkészítése. A tankönyvi források típusai.

A forrásfeldolgozás lépései.

20. századi társadalomtörténet

Magyarország társadalmi rétegződése és demográfiai fejlődése a kiegyezés korában

A középosztály és az elit fogalma, társadalmi bázisa és helye a kiegyezés kori Magyarországon

A birtokos és szegény, illetve föld nélküli parasztság a dualizmus kori Magyarországon

A szlovákiai magyar társadalom demográfiai és társadalomszerkezeti változásai a 20. században
Alapvető szakirodalom

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/HIdm/ UCD/15	Name: History of religions - Introduction
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study:	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Regular participation in seminars (50 points). A written seminar paper (with a total score of 50 points). The condition for successful completion of the course is to obtain at least 50% of the total assessment score. The assessment grading scale is: A 90–100%, B 80–89%, C 70–79%, D 60–69%, E 50–59%.	
Results of education: The students will acquire knowledge of the relevant problems of Christian and non-Christian religious movements from the 18th century to the present.	
Brief syllabus: Modern political revolutions and Christianity; Liberalism, conservatism and religion; The crisis of Christianity in the 19th and 20th centuries; The Church in the 20th century; Forms of Christianity outside Europe; Faith, religion, cults; The process of secularisation: the Church and the State; The relationships of Social Democracy and Communism to Christianity; The Church under totalitarian regimes; Christianity in modern times and its relationship to other religions.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ DI1/15	Name: Didactics of Informatics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students are become familiar with special elements in teaching informatics subjects at elementary and secondary schools as well as with various forms and methods of teaching (problem based, project based learning and cooperative teaching). Continuous, individually and creatively works on their own preparation to the lesson (to the content), which must submit, subsequently presenting (to teach) in the frame of the exercise. During the semester, students have the opportunity to consult their sample preparation with teacher. During the semester, students are evaluated to their activity (creation of preparation) and for the performance (presentation of own preparation). Students must get at least the 50% of the total evaluation, to be allowed to pass the examination. The exam is combined and consists of practical part - presentation of the didactic software and verification of theoretical knowledge from creation of educational software. The students, to be classified, must be also successful at least 50% on the exam. Students are classified according to the average obtained in the overall assessment of the continuous preparing during the semester (50%) and according to the exam (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of this course students can use different teaching forms and methods, to know the structure of the lesson, and are able to apply their own preparation in the subject of informatics. They are aware of the possibilities of the computer as didactic tools in various forms and phases of education. They know control technical and legal context of the teaching and its organization.	
Brief syllabus: <ul style="list-style-type: none"> • Introduction to didactics of informatics, • special elements of teaching the subjects of informatics, • working on the computer for beginners, • work with text (problem based learning), • working with graphics (problem based learning), • spreadsheets and databases (problem and project based learning), 	

- Internet and communication (cooperative teaching),
- supporting of the creativity in the education - constructionism and constructivism,
- evaluating the pupil performance and the classification,
- preparation of teacher of informatics to the teaching,
- structure of the lesson,
- computer as a universal didactic tool,
- technical and legal context of the teaching and its organization.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ DI2/15	Name: Didactics of Informatics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester students are become familiar with special elements in teaching informatics subjects at elementary and secondary schools -especially focused to programming, as well as with various forms and methods of teaching (problem based, project based learning and cooperative teaching). Continuously becomes familiar with the opportunities of children´s programming languages, individually and creatively works on their own preparation to the lesson (to the content of the phases of programming), which must submit, subsequently presenting (to teach) in the frame of the exercise. During the semester students must submit for evaluation 6 preparations, from which 2 needs to be presented. Students have the opportunity to consult their preparations with teacher. During the semester, students are evaluated to their activity (creation of preparation) and for the 2 performance (presentation of own preparation). Students must get at least the 50% of the total evaluation, to be allowed to pass the examination. The exam is combined and consists of practical part - presentation of the didactic software and verification of theoretical knowledge from creation of educational software. The students, to be classified, must be also successful at least 50% on the exam. Students are classified according to the average obtained in the overall assessment of the continuous preparing during the semester (50%) and according to the exam (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of this course students can use different teaching forms and methods, focused to teach programming at elementary and secondary school. Know the structure of the lesson, and are able to apply their own preparation to teach the programming in the subject of informatics. They are aware of the possibilities of the computer as didactic tools in various forms and phases of education. They know control technical and legal context of the teaching and its organization.	
Brief syllabus: <ul style="list-style-type: none"> • Safety regulations and health protection at work with a computer, • the place of programming in the frame of teaching informatics, 	

- children's programming languages and their application in primary and secondary schools - Logo turtle graphics, Imagine and other graphical programming environment,
- teaching programming in the "classic" programming language in primary and secondary schools,
- pupils' motivation and creativity,
- care of talented pupils - their preparation for programming competitions,
- evaluation of programming skills and performance,
- work with literature and with resources from the Internet (type freeware programs),
- social, ethical and psychological issues connected with teaching,
- methods of problem-based learning and collective problem-solving - active performance of students,
- technical realization of teaching - exemplification, electronic textbooks.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ MS1/15	Name: Modeling and Simulation 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 0 / 2 For the study period: 26 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the students except of analytical solutions of identification systems problems, making their mathematical models and computer implementation models create their own applications - computer simulation model of a particular system. Students are assessed according to the average percentage obtained on the basis of their continuous training assessment during the semester, their semester project and the exams. For assessment A it should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent.	
Results of education: After successful completion of the course the student is familiar with the methods of modeling and simulation, can do mathematical models, and he has has a theoretical knowledge and skills to implement them through appropriate programming environment. He can cope with the simulation of different dynamic effects in order to acquire new knowledge.	
Brief syllabus: Course contents: Introduction to modeling and simulation systems, basic terminology, classification systems and their essential characteristics , Discrete systems: Markov chain and its characteristics; queuing systems and their classification; Kolmogorov differential equations and analytical solutions of queuing systems ; Description and analytical solution for various types of queuing systems; Network queuing systems and analytical solutions; Methods for generating random numbers; Monte Carlo method and its applications; Compartmental models in discrete systems; Languages for modeling and siulation of discrete systems (SPML); Computer modelling and simulation of discrete systems; Simulation experiments, their planning and implementation, simulation protocol. Continuous systems:	

A description of continuous systems, mathematical models of continuous systems and their creation;
 identification of systems;
 Numerical methods for solving linear systems;
 Continuous compartmental models;
 Languages for continuous systems (PSI/I);
 Computer modeling and simulation in continuous systems;
 Simulation experiments, their planning and implementation;
 Interpretation of the results of the simulation experiment.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ PGR/15	Name: Computer Graphics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The course is finished by an exam. Students are assessed according to the average percentage obtained on the exams. For assessment A should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent. Credits will not be granted to students who obtain less than 50 percent.	
Results of education: After successful completion of the course the student gain insight into the world of digital image processing and computer graphics. He masters the technical terminology, algorithms, principles and procedures used in computer graphics. He is familiar with the work of raster and vector graphics, work with graphic data and formats, hardware components and modern methods.	
Brief syllabus: Introduction to image processing and computer graphics. Characterization of raster image and their displayig. Color models and the human visual system. Raster image formats. Raster image compression method. Image processing- highlighting , bounding of noise and so on. Stereograms, optical illusion. Characterization of vector images. Curves and surfaces. Geometric transformations. Visibility of objects. Lighting and shading. Fractals in computer graphics.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ PPX2/15	Name: Pedagogical Practice 2
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 20s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student shall transmit documentation on teaching practice: completed observation sheets, protocol of teaching practice, lesson plans and assessment of own performer teaching practice.	
Results of education: Within the teaching practice students observe and analyze educational process. They learn to apply the theoretical knowledge acquired during studies of general-education subjects, general and subject didactics. They gradually acquire teaching skills to conduct teaching profession.	
Brief syllabus: - 5 hours to listen: passive participation in the hour of the teacher trainer, during which the student monitoring the progress of the lesson, resp. the educational process and makes notes of the aspects of the lesson in monitoring sheets; - 5 hours of preparation: the student is preparing for the teaching activity, resp. for the management of lesson, according to the instructions and guidances of teacher trainer; - 5 hours of active teaching activity: the student performs as a teacher in the classroom selected by teachers trainer and leads the lesson; - 5 hours of analysis and evaluation: the teacher trainer and student jointly make analysis the activity of the student, from the methodological and didactical point of view.	
Literature: The current curriculum and educational standards. Pedagogical school programs for primary /secondary schools. Overview of current foreign pedagogical documents.	
Language, knowledge of which is necessary to complete a course: Hungarian language	
Notes: The student mandatory takes up the performer teaching practice (PPX2 respectively PPX3) from the one of their combination (subject specialization) in the 2. semester and the second one in the 3. semester.	

The performer teaching practice - active individual teaching of students (trainees) under the guidance of teacher trainers based on thought out written preparation. It has two forms: the continuous performer teaching practice and the related performer teaching practice.

The student absolves the continuous performer teaching practice (PPX2) from the one of their subject specialization in the 2. semester of master study (in the range of 20 hours per semester) and the continuous performer teaching practice from second one subject specialization (PPX3) in the 3. semester of master study (in the range of 20 hours per semester).

The student absolves the related performer teaching practice (PPX4) from each of subject specialization in the 4. semester of master study in the range of 40 hours per subject specialization, of which 20 hours in primary school and 20 hours in secondary school (the first subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school; the second subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school).

They learn to apply the theoretical knowledge acquired during studies of general-education subjects, general and subject didactics. They gradually acquire teaching skills to conduct teaching profession.	
Brief syllabus: - 5 hours to listen: passive participation in the hour of the teacher trainer, during which the student monitoring the progress of the lesson, resp. the educational process and makes notes of the aspects of the lesson in monitoring sheets; - 5 hours of preparation: the student is preparing for the teaching activity, resp. for the management of lesson, according to the instructions and guidance of teachers trainer; - 5 hours of active teaching activity: the student performs as a teacher in the classroom selected by teacher trainer and leads the lesson; - 5 hours of analysis and evaluation: the teacher trainer and student jointly make analysis the activity of the student, from the methodological and didactical point of view.	
Literature: The current curriculum and educational standards. Pedagogical school programs for primary /secondary schools. Overview of current foreign pedagogical documents.	
Language, knowledge of which is necessary to complete a course: Hungarian language	
Notes: The student mandatory takes up the performer teaching practice (PPX2 respectively PPX3) from the one of their combination (subject specialization) in the 2. semester and the second one in the 3. semester.	

The performer teaching practice - active individual teaching of students (trainees) under the guidance of teacher trainers based on thought out written preparation. It has two forms: the continuous performer teaching practice and the related performer teaching practice.

The student absolves the continuous performer teaching practice (PPX2) from the one of their subject specialization in the 2. semester of master study (in the range of 20 hours per semester) and the continuous performer teaching practice from second one subject specialization (PPX3) in the 3. semester of master study (in the range of 20 hours per semester).

The student absolves the related performer teaching practice (PPX4) from each of subject specialization in the 4. semester of master study in the range of 40 hours per subject specialization, of which 20 hours in primary school and 20 hours in secondary school (the first subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school; the second subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school).

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idm/ PPX4/15	Name: Pedagogical Practice 4
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 40s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 4.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student shall transmit documentation on teaching practice: completed observation sheets, protocol of teaching practice, lesson plans and assessment of own performer teaching practice.	
Results of education: The student will be able to handle the monitoring, evaluation analyzes of teaching during teaching practice, respectively the methodology of teaching in elementary and secondary schools at the professional level, within the terms of primary and secondary schools in accordance with pedagogical-didactic knowledge and will be able to individually leads the lesson.	
Brief syllabus: Didactic teaching competence in direct contact with pupils / students in the environment of elementary resp. secondary school. Monitoring and analyzing of educational activities. Professional mastering methodology (based on individual concepts) as it current trends of didactics in English language projects for primary and secondary schools. Application of pedagogical approaches based on the personality of pupils / students. Expected are the elements of creativity, independence, individuality and alternatives in the participants used methodology.	
Literature: The current curriculum and educational standards. Pedagogical school programs for primary /secondary schools. Overview of current foreign pedagogical documents.	
Language, knowledge of which is necessary to complete a course: Hungarian language	
Notes: The student absolves the related performer teaching practice in the range of 40 hours per subject specialization, of which 20 hours in primary school and 20 hours in secondary school (the first subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school; the second subject specialization: 40 hours = 20 hours of basic school + 20 hours secondary school).
