Results of education: After completing the course, the student will know the theoretical methods and practical knowledge of financial and economical analysis of entrepreneurial subjects.	
Brief syllabus: 1. Introduction to the problem of financial analysis (functions, features and analysis methods) 2. Financial analysis: information sources of financial analysis 3. Financial analysis: ex post and ex ante analysis - definition, vertical and horizontal analysis, balance sheet golden rule, financial indicators - introduction 4. Financial analysis: liquidity indicators, debt indicators 5. Financial analysis: profitability indicators, efficiency indicators 6. Financial analysis: market valuation indicators, scorecards, cash flow analysis 7. Financial analysis: financial situation forecast, bankruptcy models 8. Economical analysis: analysis of production activities I. (market activities, investment activities) 9. Economical analysis: analysis of production activities II. (operating activities) 10. Economical analysis: analysis of the use of assets I. (HR, long-term assets) 11. Economical analysis: analysis of the use of assets II. (stocks)

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMdb/FGR/19	Name: Financial literacy
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 1., 3., 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: 100% - 90% participation + financial simulation game - evaluation grade A. 80% participation + financial simulation game - evaluation B. 70% participation + financial simulation game - evaluation C. 60% participation + financial simulation game - evaluation D. 50% participation + financial simulation game - evaluation E. Less than 50% participation - evaluation Fx.	
Results of education: After completing the course, students will be able to define short, medium and long-term goals. With the knowledge gained, they will be able to identify advantageous offers on the financial market. Students will get an introduction to various money earning opportunities in everyday life and will be able to evaluate what is the best way for them to achieve personal success. Students will get practical advice on “how to sell themselves“ and how to succeed both in business and in everyday life.	
Brief syllabus: 1. Introduction to everyday finance and the problem of financial skills 2. Setting and realizing personal goals, motivation and the importance of the vision 3. The importance of financial literacy in practice, income (Active/Passive) 4. The KAPS system (sales method) 5. Labour Market - differences in entrepreneurial and employee attitudes, priorities in management, methods of successful people, business etiquette and outfit. 6. Successful presentations, successful business negotiations 7. Safety of revenue and principles of insurance 8. Home affairs in everyday life: types of home loans, home savings, preparation for a home purchase, tips, tricks and dangers. 9. Making your revenue secure, how to get money 10. Presentation of the Slovak pension system and the provision of appropriate pension 11. Investment - types, misconceptions. An opportunity to create passive income. 12. Practical presentation about experiences – interactive game	

13. Simulation Game

Code: KEK/ PHMdb/HOP1/15	Name: Business Law 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 0 For the study period: 26 / 0 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Successful completion of the final written test at the end of the semester. To obtain evaluation A is necessary at least 90% of the maximum score of the final review, to obtain evaluation B at least 80%, for the assessment of at least 70% C, D for the assessment of at least 60%, and the evaluation E at least 50% of the maximum points. Credit won't be granted to a student who did not receive at least 50% of the maximum of score on the written test.	
Results of education: The course introduces students to the issues of legislation contained in the Civil Code, as a basic document regulating the status, property, obligation and other rights of natural and legal persons and thus economic entities.	
Brief syllabus: 1. Civil Code - system, definition, history 3. Civil law relations, personal rights and their protection. 5. Real rights. 6. Rights in the property of another. 7. Succession. 8. Law of obligations – general provisions. 9. Purchase contract. 10. Contract for work. 11. Deed od donation. 12. Lease agreement. 13. Loan agreement, loan for use agreement.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMdb/HPO/15	Name: Economic policy
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 0 / 2 For the study period: 0 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The method of evaluation of the subject is the following: written exam. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The subject would like to show the position of economic policy in the framework of the market economy. We will also illuminate its mechanisms and tools. In addition, the subject shows the tools which are useful for the measuring of success of the governmental policies. The subject would like to examine the position of the Central European countries within the economic structures of the EU.	
Brief syllabus: 1. Aims, instruments and mechanisms 2. Economic and political relations as a subjects of the economic policy 3. Competition 4. Trade policy 5. The sources of the economic policy 6. Measuring of the effectivity of economic policy 7. The policy of stabilization 8. Fiscal policy 9. The central bank and the monetary policy, Inflation 10. The system of superannuation, salary and wage policy 11. Labor market and unemployment 12. Open economy and balance of payments 13. External aspects of economic policy

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KMI/ PHMdb/INF1/15	Name: Informatics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 2 / 0 For the study period: 26 / 26 / 0 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester are realizing two written tests of which the student is evaluated. To obtain of A evaluation from practice is necessary to obtain in total at least 90 points, on the valuations B at least 80 points, on the valuations C at least 70 points, on the valuations D at least 60 points and at least 50 points for E. The student participates in an examination which is written and oral. Half of the subject evaluation consists from the valuation of exercise, 50% of the test. For successful absolve of both the evaluated parts must achieve a minimum rating of "E".	
Results of education: After completing the course students know the basics of informatics in terms of user, both from the site of hardware as well as software. In exercises the emphasis is placed on mastering the basic program package needs for managers, as well as for use them in other subjects, for example in statistics.	
Brief syllabus: 1. Basics of Information Technology. The basic concepts of information technology. 2. The text editor, Word. 3. Excel spreadsheet. 4. Computer using and files managing. 5. The basic structure of the PC. 6. PC peripherals, contact with the user. 7. Databases. 8. PC graphics capabilities and possibilities of electronic presentation. 9. Computer networks and information networks services. 10. PC in business leadership.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMdb/KAR/15	Name: Calculations and budgeting
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 0 For the study period: 26 / 0 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Knowledge of the students during semester will be rated on the base of achieved results at two written tests. The total score which can be reached from these two tests is 100 points. Student who will reached minimal 50 points score will obtain credits. To obtain level A 90 points score is necessary, to obtain level B student has to reached 80 points score at least. For level C student needs 50 points score and for level D student needs 60 points score. Minimal points score 50 – means level E.	
Results of education: The main aim of the subject is to development of knowledge on costs of the students. Students will learn about the relationship of cost calculation and accounting, of cost calculation methods, as well as range of problems of company and company entity budget. The attention also covers calculations and pricing used in trade.	
Brief syllabus: 1. Calculations and accounting - definitions and structure of the accounting information system of enterprise. 2. Financial and managerial information system. 3. Cost accounting and cost control. Segmentation of costs by calculations. 4. Definition of roles and functions of calculation. Classification of calculations. 5. The classic calculations - characterization, properties. 6. Examples to prove strengths and weaknesses of classical calculations. 7. Calculation of the variable costs - characteristics, examples of their use in practice. 8. The definition and characteristics of the ABC calculation method. 9. Examples to prove strengths and weaknesses of ABC calculation method. 10. Job Costing - definition, tasks, example. 11. Process calculations - definition, tasks, example. 12. Budgeting - the roles and functions of enterprise budgets. 13. The forms of budgets and their control.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KMI/ PHMdb/MAT1/15	Name: Mathematics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 2 / 0 For the study period: 26 / 26 / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written clearance by 35 points and for the active work of student in WebWork-system can the student obtain 30 points. Of the total of 100 points it is needed to obtain at least 90 points on the valuation A, for grade B is necessary to obtain 80 points, for grade C at least 70 points, for grade D at least 60 points and for grade E at least 50 points. For the student, who obtained less than 20 points in any written clearance, at the end of semester a final written clearance will be held with max. 80 points.	
Results of education: After successful completion of this course students can use the basic concepts and tools of differential calculus of real functions of one variable. Furthermore, students are able to solve basic tasks of differential calculus, they can find local extremes of functions and investigate the conduct of functions. They obtain knowledge of integral calculus, and the rules of integration and its economic applications.	
Brief syllabus: The real function. The domain, codomain. Properties of elementary functions. The sequence. Limit of a sequence. Limits of monotone sequences. Limits and continuity of functions. Asymptote. Derivatives, their geometric and economic importance. Derivatives of elementary functions. Derivation rules. Elasticity of functions. Linear approximation. The mean value theorems. Derivatives and differentials of higher order. Monotony, convexity and concavity of functions. Inflection points. L'Hospital's rule. Local and absolute extremes of functions. Economic applications. The rules of integration. Indefinite integral and primitive function. Integrating with substitution method and by parts. Economic applications. Integration of rational functions. Definite integral. Improper integral. Series with non-negative members. Convergence criteria. Alternative series. Leibniz criterion. Differential equations.

Code: KMI/ PHMdb/MAT2/15	Name: Mathematics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 2 / 0 For the study period: 26 / 26 / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written clearance by 35 points and for the active work of student in WebWork-system can the student obtain 30 points. Of the total of 100 points it is needed to obtain at least 90 points on the valuation A, for grade B is necessary to obtain 80 points, for grade C at least 70 points, for grade D at least 60 points and for grade E at least 50 points. For the student, who obtained less than 20 points in any written clearance, at the end of semester a final written clearance will be held with max. 80 points.	
Results of education: After successful completion of this course students can use the basic concepts and tools of linear algebra they are able to solve systems of linear equations, with matrix, determinants, elimination of variables. They obtain knowledge of differential calculus of real functions of more variable and partial derivatives. Furthermore, students are able to solve basic tasks of differential calculus, they can find local extremes of functions and investigate the conduct of functions. They obtain knowledge of linear programming.	
Brief syllabus: Linear algebra: Vectors. Vector operations. Linear independence. Matrix. Operations with matrices. Determinant, properties. Rank of a matrix. System of linear equations and its solution. Elimination method. Solution of system of linear equations with elemental base change and inverse matrix. Space of solutions. Eigenvector and eigenvalues of the matrix, diagonalization. The function of more variables. Some features of economic analysis. Homogeneous functions. Limit and continuity. Partial derivatives. Partial derivatives of higher order. Economic Applications of partial derivatives. Quadratic forms. Local extremes. Necessary and sufficient condition for local extreme. Economic applications of local extremes. Bound local extremes and their economic applications. Kuhn-Tucker conditions. Introduction to linear programming.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMdb/SFE/17	Name: Seminar on financial economic analysis
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Solving seminar assignments and attendance at seminars. At least 90 percent must be obtained for an A rating, at least 80 percent for an B rating, at least 70 percent for a C rating, at least 60 percent for a D rating and at least 50 percent for an E rating.	
Results of education: After completing the course, students are able to analyze the financial statements of the company using financial indicators, know the methods of economic analysis (analysis of production activities, operational activities) and management of company resources.	
Brief syllabus: 1. Analysis of financial statements - horizontal and vertical analysis 2. Financial indicators I. (indicators of liquidity, efficiency, profitability, indebtedness, market indicators) - calculation of indicators and interpretation of values 3. Financial indicators I II. (indicators of liquidity, efficiency, profitability, indebtedness, market indicators) - calculation of indicators and interpretation of values 4. Indicator systems 5. Ex-ante analysis (bankruptcy models, creditworthiness analysis) 6. Analysis of production activity I. (preparation of production - market activity, development activity) 7. Analysis of production activity II. (operational activity). 8. Resource analysis I. (HR management) 9. Resource analysis II. (tangible fixed assets) 10. Analysis of sources III. (stocks)

Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 0 / 1 For the study period: 0 / 13 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester the student's task is to prepare a written seminar work which is worth 100 points. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The course is designed to prepare students for making high-quality thesis work. Acquaint students with the basic knowledge required to write a thesis. In addition to the stylistic rules its task is to familiarize students with generally applicable principles for the first level of university qualification.	
Brief syllabus: 1. Select a Thesis topic: tasks and goals 2. Oral presentation and presentation 3. Basic rules for writing, editing and organizing documents 4. Work with book and journal literature 5. Quotes: ethics and the citing technique 6. Timetable: phases and steps for each period 7. Information exploration: bibliographic research, sources of information 8. Research: preparation and implementation of the research 9. Design and processing of parts of the strategy 10. The processing of research results: the questionnaire 11. Figures, tables, attachments: form and content side 12. Preparation of the final version of the work: writing, editing, manuscript 13. Preparation for the defense of the thesis

Prerequisites:	
Conditions for passing the subject: The course is finished by a written exam. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points.	
Results of education: Statistics I course provides basic theoretical and practical knowledge of descriptive statistical methods and skills while creating their exploitation for the analysis of specific data of an economic nature. The successful completion of the course gives an overview of basic statistical methods and skills to work in computer systems.	
Brief syllabus: 1. Basic concepts of descriptive statistics. Stages and methods of statistical examination. 2. Statistical Classification of data. Level characteristics and the distribution of values in a one-dimensional set of statistics. 3. Correlation between sets of data. Ratios. 4. Graphical display of data. 5. Frequency analysis of data. Quantiles. 6. Measures of central tendency. Mean, median, mode. 7. Measures of variability. 8. Kurtosis and skewness rate. 9. Classification of statistical data. Variance analysis. 10. Statistical relationship between data. 11. Pivot table. Cramers contingency coefficient. 12. Correlation and regression analysis.

Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 2 / 2 For the study period: 26 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, students have to work out their tasks of seminars in written form. It can be evaluated by max. 40 scores. Students have to write one or two test paper(s). I can be evaluated by 60 scores. They are altogether 100 scores. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. Students have to collect min. 20 scores from the seminars' tasks and min. 30 scores from test papers. In other cases, students will not have credits.	
Results of education: When students fulfil the subject successfully, they will have an overview of the theoretical side of the organization and they will be able to differentiate the organizational structures.	
Brief syllabus: 1. Introduction, fundamental conceptions, the basis of organization and leadership. Tylorism. 2. The organization as a rational, social open system 3. Structural features, operational principles of organization. 4. Divisional structure 5. More dimension and dual organization. 6. Concern and holdings 7. Managerial functions, leadership style, managerial tasks, managerial systems. 8. Duties and strategy making. 9. Control 10. Leadership 11. Organization and forming of organizations 12. Change management 13. Directions and challenges in theories of organization and management.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMdb/TPR/15	Name: The presentation creation
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 0 / 2 For the study period: 0 / 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites: KMI/PHMdb/INF1/15	
Conditions for passing the subject: During the semester will be the theoretical knowledge of students evaluated through electronically checks for which students can obtain 50 points and also students will individually solve practical task for 50 points. For both parts are required at least 25 points. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score.	
Results of education: The aim of the course is to achieve the active expansion of students' skills in the area of presentation creation. The seminar theme is devoted to aspects of the presentation creation and the presenting. The student acquires knowledge of the preparation, planning, making of presentations, as well as the determinants of its acceptance by audience. Students verify acquired knowledge in front of the collective by presenting outputs of practical tasks.	
Brief syllabus: 1. Introduction to subject. Requirements for a successful completion. 2. Criteria for the preparation and bringing into effect a good presentation. 3. The first phase – preparation for presentation. Creativity in this phase. 4. The second phase – planning and making the presentation. The principles and tools which are applicable in this process. 5. The third phase – presenting. 6. Space for questioning and types of enquirers. 7. Software support in the creation and presentation realization. 8. Own website as presentation form. 9. Video CV when applying for a job. 10. Student present outputs of practical tasks (joint debate on the value, clarity and attractiveness). 11. Student present outputs of practical tasks (joint debate on the value, clarity and attractiveness). 12. Student present outputs of practical tasks (joint debate on the value, clarity and attractiveness). 13. Trends in presentation creation.
