INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/HOP1/15	Name: Business Law 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 26s / 0s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, the student is obliged to pass the final written examination worth 100 points. A total of at least 90 points must be obtained to obtain an A rating, at least 80 points to obtain a B rating, at least 70 points to a C rating, at least 60 points to a D rating and at least 50 points to an E rating. Credits will not be awarded to a student who has obtained less than 50 points from the written examination.	
Results of education: The course introduces students to the issues of legislation contained in the Civil Code, as a basic document regulating the status, property, obligation and other rights of natural and legal persons and thus economic entities.	
Brief syllabus: 1. The concept, subject, sources of civil law, the system of civil law and the system of the Civil Code. 2. Legal facts of civil law, legal acts and legal consequences of defective legal acts. 3. Civil relations and personal rights and their protection. 4. The importance of time in civil law - limitation, prescription of rights and claims. 5. Nature and types of rights in rem. 6. Rights in rem to another's property. 7. Inheritance law. 8. General part of the law of obligations. 9. Purchase contract. 10. Contract for work. 11. Donation contract. 12. Lease agreement. 13. Loan Agreement and Loan Agreement.	
Literature: 1) Platné znenie zákona č. 40/1964 Zb. Občiansky zákonník v znení neskorších predpisov 2) LAZAR, J. a kol. Občianske právo hmotné, I. a II. diel, Bratislava: IuraEdition, 2010, 715+548 s. Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/HPO/15	Name: Economic policy
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 0s / 26s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 7.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Students will take a written exam in the form of a written work. At least 90 percent must be obtained for an A rating, at least 80 percent for an B rating, at least 70 percent for a C rating, at least 60 percent for a D rating and at least 50 percent for an E rating.	
Results of education: The essence of economic policy, its position, market economy, its basic categories and mechanisms, the subject of national economic policy and its tools and goals, measuring the success of economic policy, comparison of national economic policy of Hungary and Slovakia, transformation process, open market mechanisms in the EU, EU economic policy.	
Brief syllabus: 1. Objectives, tools and bearers 2. Economic and political relations as a subject of economic policy 3. Competitive policy 4. Trade policy 5. Sources of economic policy formation. 6. Evaluation of the effectiveness of economic policy 7. Stabilization policy. 8. Fiscal policy. 9. Monetary - monetary policy. Inflation. 10. Pension policy and wage policy. 11. Labor market and unemployment. 12. Open economy and balance of payments. 13. External economic policy

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KMI/PHMeb/ INF1/15	Name: Informatics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: For the study period: 13s / 26s / 0s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester are realizing two written tests of which the student is evaluated. To obtain of A evaluation from practice is necessary to obtain in total at least 90 points, on the valuations B at least 80 points, on the valuations C at least 70 points, on the valuations D at least 60 points and at least 50 points for E. The student participates in an examination which is written and oral. Half of the subject evaluation consists from the valuation of exercise, 50% of the test. For successful absolve of both the evaluated parts must achieve a minimum rating of "E".	
Results of education: After completing the course students know the basics of informatics in terms of user, both from the site of hardware as well as software. In exercises the emphasis is placed on mastering the basic program package needs for managers, as well as for use them in other subjects, for example in statistics.	
Brief syllabus: 1. Basics of Information Technology. The basic concepts of information technology. 2. The text editor, Word. 3. Excel spreadsheet. 4. Computer using and files managing. 5. The basic structure of the PC. 6. PC peripherals, contact with the user. 7. Databases. 8. PC graphics capabilities and possibilities of electronic presentation. 9. Computer networks and information networks services. 10. PC in business leadership.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/KAR/15	Name: Calculations and budgeting
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 26s / 0s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 8.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, the student's knowledge will be assessed through two written tests, for which he can obtain a total of 100 points. Credits will be awarded to a student who obtains at least 50 points from the first and second parts of the knowledge test. At least 90 points must be obtained to obtain an A rating, at least 80 points must be obtained to obtain a B rating, at least 70 points must be obtained to obtain a C rating, at least 60 points must be obtained to obtain a D rating and at least 50 points to obtain an E rating .	
Results of education: The main goal of the course is to develop knowledge about the costs of the company. The student will get acquainted with the relationship between calculations and accounting, methods of calculating costs as well as the compilation of corporate budgets and budgets of centers. Attention is also paid to calculations in business and in-store pricing.	
Brief syllabus: 1. Calculations and accounting - definition and structure of the company's accounting information system. 2. Accounting company and intra-organizational information system. 3. Cost accounting and cost control. Calculation breakdown of costs. 4. Definition of tasks and functions of calculations. Classification of calculations. 5. Classical calculations - characteristics, properties. 6. Examples to demonstrate the strengths and weaknesses of classical calculations. 7. Calculation of variable costs - characteristics, examples of their use in practice. 8. Definition and characteristics of calculation by ABC method. 9. Examples to demonstrate the advantages and disadvantages of ABC calculation. 10. Job costing - definition, tasks, example. 11. Process calculations - definition, tasks, example. 12. Budgeting - tasks and functions of company budgets. 13. Forms of budgets and their control.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KMI/PHMeb/ MAT1/15	Name: Mathematics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: For the study period: 26s / 26s / 0s Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written clearance by 35 points and for the active work of student in WebWork-system can the student obtain 30 points. Of the total of 100 points it is needed to obtain at least 90 points on the valuation A, for grade B is necessary to obtain 80 points, for grade C at least 70 points, for grade D at least 60 points and for grade E at least 50 points. For the student, who obtained less than 20 points in any written clearance, at the end of semester a final written clearance will be held with max. 80 points.	
Results of education: After successful completion of this course students can use the basic concepts and tools of differential calculus of real functions of one variable. Furthermore, students are able to solve basic tasks of differential calculus, they can find local extremes of functions and investigate the conduct of functions. They obtain knowledge of integral calculus, and the rules of integration and its economic applications.	
Brief syllabus: The real function. The domain, codomain. Properties of elementary functions. The sequence. Limit of a sequence. Limits of monotone sequences. Limits and continuity of functions. Asymptote. Derivatives, their geometric and economic importance. Derivatives of elementary functions. Derivation rules. Elasticity of functions. Linear approximation. The mean value theorems. Derivatives and differentials of higher order. Monotony, convexity and concavity of functions. Inflection points. L'Hospital's rule. Local and absolute extremes of functions. Economic applications. The rules of integration. Indefinite integral and primitive function. Integrating with substitution method and by parts. Economic applications. Integration of rational functions. Definite integral. Improper integral. Series with non-negative members. Convergence criteria. Alternative series. Leibniz criterion. Differential equations.

Code: KMI/PHMeb/ MAT2/15	Name: Mathematics 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 0 For the study period: 26s / 26s / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written clearance by 35 points and for the active work of student in WebWork-system can the student obtain 30 points. Of the total of 100 points it is needed to obtain at least 90 points on the valuation A, for grade B is necessary to obtain 80 points, for grade C at least 70 points, for grade D at least 60 points and for grade E at least 50 points. For the student, who obtained less than 20 points in any written clearance, at the end of semester a final written clearance will be held with max. 80 points.	
Results of education: After successful completion of this course students can use the basic concepts and tools of linear algebra they are able to solve systems of linear equations, with matrix, determinants, elimination of variables. They obtain knowledge of differential calculus of real functions of more variable and partial derivatives. Furthermore, students are able to solve basic tasks of differential calculus, they can find local extremes of functions and investigate the conduct of functions. They obtain knowledge of linear programming.	
Brief syllabus: Linear algebra: Vectors. Vector operations. Linear independence. Matrix. Operations with matrices. Determinant, properties. Rank of a matrix. System of linear equations and its solution. Elimination method. Solution of system of linear equations with elemental base change and inverse matrix. Space of solutions. Eigenvector and eigenvalues of the matrix, diagonalization. The function of more variables. Some features of economic analysis. Homogeneous functions. Limit and continuity. Partial derivatives. Partial derivatives of higher order. Economic Applications of partial derivatives. Quadratic forms. Local extremes. Necessary and sufficient condition for local extreme. Economic applications of local extremes. Bound local extremes and their economic applications. Kuhn-Tucker conditions. Introduction to linear programming.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/MEO/15	Name: International trade
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 13s / 13s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 7.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Successful completion of the course is conditional on successful completion of the semester work (30% weight in the evaluation) and successful completion of a written exam (70% weight in the evaluation). A total of at least 90 points must be obtained to obtain an A rating, at least 80 points to obtain a B rating, at least 70 points to a C rating, at least 60 points to a D rating and at least 50 points to an E rating. Credits will not be awarded to a student who has not obtained at least 15 points from the written seminar work and has obtained less than 35 points from the written exam.	
Results of education: After completing the course, students are acquainted with the essence of the basic concepts of international trade, starting with the international division of labor, the functions of foreign trade, the subjects of the world economy - national economies, transnational corporations and international integration groups. They will gain an overview of the impact of the GATT / WTO on world trade, on the effects of the EU single market in the context of a globalizing world.	
Brief syllabus: 1. Conceptual apparatus of international trade, world trade and international division of labor. World economy, trends in the world economy and their impact on world trade. 2. Theory of international trade. World and international trade, functions of foreign trade. 3. International movement of capital. Transnational corporations - development and their current position in the world economy. 4. Foreign trade policy - GATT / WTO. 5. Services in international trade. International economic integration. 6. EU single market and common trade policy, impact of scientific and technical progress on SO. The issue of competitiveness in terms of foreign trade and the position of the EU in the world economy.

Prerequisites:	
Conditions for passing the subject: Successful completion of the course is conditional on successful completion of the final written exam with a maximum of 100 points. To obtain grade A it is necessary to obtain a total of at least 90 points, to obtain grade B at least 80 points, to grade C at least 70 points, for a rating of D at least 60 points and for a rating of E at least 50 points.	
Results of education: After completing the course, students are acquainted with important views of sociology, theoretical and methodological peculiarities of sociological research and with the more important results of empirical research. The curriculum places great emphasis on the professional presentation of social aspects of social problems, conflicts and economics. Of the larger thematic areas, the following are important: social structure, inequality, poverty, social mobility, as well as sociological analysis of the population, lifestyle, economic and political system.	
Brief syllabus: 1. Subject and method of sociology. 2. Structure and stratification of society 3. Moving, migration 4. Social mobility 5. Selected demographic groups 6. Educational system. Cultural capital, investment in the human factor. 7. Structure of settlements and social inequalities 8. Political sociology 9. Race, nation, ethnic group, minorities. 10. Sociology of economic life (theory) 11. Deviant behavior 12. Economy and society (research, survey) 13. Participants in economic life, Research of economic life

Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/SPR/20	Name: Semester Project
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 0s / 13s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, the student is obliged to write a written seminar task in the amount of 100 points. A total of at least 90 points must be obtained to obtain an A rating, at least 80 points to obtain a B rating, at least 70 points to a C rating, at least 60 points to a D rating and at least 50 points to an E rating.	
Results of education: The aim of the course is to prepare students for quality preparation of the final bachelor's thesis. To acquaint students with the basic knowledge needed to write a final thesis. In addition to stylistic necessities and generally used principles of preparation of the final thesis at the 1st level of university study.	
Brief syllabus: 1. Selection of the topic of the final work: tasks and goals 2. Oral lecture and presentation 3. Basic rules of writing, editing and classifying documents 4. Work with book and magazine literature 5. Citations: ethics and technique of citation, adjustments 6. Time schedule: stages and steps planned for time periods 7. Information survey: bibliographic survey, information sources 8. Research: preparation and implementation of research 9. Design and strategy of processing individual parts 10. Processing of research results: questionnaire 11. Illustrations, tables, appendices: formal and content page 12. Preparation of the final version of the work: writing a clean copy, final edition 13. Preparation for the defense of the final thesis

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KMI/PHMeb/ STA1/15	Name: Statistics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: For the study period: 13s / 26s / 0s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 7.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The course is finished by a written exam. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points.	
Results of education: Statistics I course provides basic theoretical and practical knowledge of descriptive statistical methods and skills while creating their exploitation for the analysis of specific data of an economic nature. The successful completion of the course gives an overview of basic statistical methods and skills to work in computer systems.	
Brief syllabus: 1. Basic concepts of descriptive statistics. Stages and methods of statistical examination. 2. Statistical Classification of data. Level characteristics and the distribution of values in a one-dimensional set of statistics. 3. Correlation between sets of data. Ratios. 4. Graphical display of data. 5. Frequency analysis of data. Quantiles. 6. Measures of central tendency. Mean, median, mode. 7. Measures of variability. 8. Kurtosis and skewness rate. 9. Classification of statistical data. Variance analysis. 10. Statistical relationship between data. 11. Pivot table. Cramers contingency coefficient. 12. Correlation and regression analysis.

Number of credits: 5	
Recommended semester/trimester of study: 8.	
Level of study: I.	
Prerequisites: KMI/PHMeb/STA1/15	
Conditions for passing the subject: The course is finished by a written exam. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. The assessment will count points earned by individual work.	
Results of education: The successful completion of the course gives an overview of inductive statistics methods and skills to work in computer systems. The theoretical knowledge is practised by the PC applications. The statistical examples are formulated from the economical sphere and businnes area.	
Brief syllabus: 1. Basic concepts of inductive statistics. 2. Random sampling. Sampling methods. 3. Theory of point estimation, basic properties of estimators. Estimation methods (maximum likelihood). 4. Estimation of population mean and variance. 5. Interval estimations. Confidence interval for the mean, variance, ratio. 6. Hypothesis testing. Parametric and non-parametric tests. 7. Hypothesis testing of parameters of Normal distribution, and Bimomial Distribution. 8. Two sample parametric tests. ANOVA . 9. Time series analysis, trend and seasonal component. 10. Linear and non-linear trend. Moving average smoothing. 11. Regression analysis, linear and non-linear regression models. Hypothesis testing of the linear models parameters. 12. Correlation coefficient. 13. Non-linear regression analysis.

Name of the faculty: Faculty of Economics and Informatics	
Code: KM/PHMeb/ TOM/15	Name: Organization and Management Theory
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 26s / 26s Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, students have to work out their tasks of seminars in written form. It can be evaluated by max. 40 scores. Students have to write one or two test paper(s). I can be evaluated by 60 scores. They are altogether 100 scores. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. Students have to collect min. 20 scores from the seminars' tasks and min. 30 scores from test papers. In other cases, students will not have credits.	
Results of education: When students fulfil the subject successfully, they will have an overview of the theoretical side of the organization and they will be able to differentiate the organizational structures.	
Brief syllabus: 1. Introduction, fundamental conceptions, the basis of organization and leadership. Tylorism. 2. The organization as a rational, social open system 3. Structural features, operational principles of organization. 4. Divisional structure 5. More dimension and dual organization. 6. Concern and holdings 7. Managerial functions, leadership style, managerial tasks, managerial systems. 8. Duties and strategy making. 9. Control 10. Leadership 11. Organization and forming of organizations 12. Change management 13. Directions and challenges in theories of organization and management.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/TPR/15	Name: The presentation creation
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 0s / 26s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, the student's theoretical knowledge will be assessed by an electronic form of examination for which he can obtain 50 points and the student will also be required to solve a practical task for which he can obtain 50 points. A total of at least 90 points must be obtained to obtain an A rating, at least 80 points to obtain a B rating, at least 70 points to a C rating, at least 60 points to a D rating and at least 50 points to an E rating.	
Results of education: The aim of the course is to achieve students' active expansion of the base of their skills in creating presentations. The topic of seminar hours is devoted to the aspect of the origin of the presentation and its presentation. The student will gain knowledge about the preparation, planning, preparation of the presentation, as well as the determining factors of its acceptance by the audience. Students verify the acquired knowledge in front of the team by presenting the outputs of practical tasks.	
Brief syllabus: 1. Introduction to the subject. Presentation of requirements for successful completion. 2. Criteria for preparing and performing a good presentation. 3. The first phase - preparation for the presentation. Creativity in this activity. 4. The second phase - planning and preparation of the presentation. Principles and tools applicable in this process. 5. The third phase - presentation. 6. Space for asking questions and types of inquirers. 7. Software support in creating and executing presentations. 8. Own website as a form of presentation. 9. Video CV when applying for a job position. 10. Presentation of outputs of practical tasks of students (joint discussion on value, intelligibility and attractiveness). 11. Presentation of outputs of practical tasks of students (joint discussion on value, intelligibility and attractiveness). 12. Presentation of the outputs of students' practical tasks (joint discussion on value, comprehensibility and attractiveness).	

13. Trends in presentation creation.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KEK/ PHMeb/ZAD/15	Name: Basics of Taxation
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 26s / 0s Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, the student's knowledge will be assessed through two written tests, for which he can obtain a total of 100 points. Credits will be awarded to a student who obtains at least 50 points from the first and second parts of the knowledge test. At least 90 points must be obtained to obtain an A rating, at least 80 points must be obtained to obtain a B rating, at least 70 points must be obtained to obtain a C rating, at least 60 points must be obtained to obtain a D rating and at least 50 points to obtain an E rating .	
Results of education: The main goal of the course is to acquaint students with the general principles of taxation. Attention is paid to the historical development of taxes, the role of taxes and the characteristics of the tax policy of the Slovak Republic. After completing the course, the student will gain an overview of currently collected taxes, orientation in the Income Tax Act, knowledge of the calculation of monthly advances and annual tax liability and, last but not least, knowledge of possible ways of settling personal income tax.	
Brief syllabus: 1. History of tax collection and development of taxation. 2. Basic concepts of taxation. 3. Principles of tax collection and administration. 4. Main and secondary tax requirements. 5. The tax system of the Slovak Republic and development trends in the field of tax collection. 6. Income Tax Act. 7. Personal income tax - characteristics, definition of groups of taxable income. 8. Income from dependent activity of natural persons - characteristics, peculiarities. 9. Methodology for calculating monthly advances for income from dependent activity. 10. Examples for modeling possible situations that may occur when calculating monthly advances for income from dependent activity. 11. Methodology for calculating the annual tax liability and settlement of the tax on income from dependent activity. 12. - 13. A comprehensive example of income from dependent activity resulting in tax settlement.
