INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ APISdb/AJ/15	Name: Academic Writing
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: There will be one test written during the semester, in which students can get 50 points. Students will be required to submit a written report at the end of the semester, for which they can obtain another 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having accomplished this course, the student will become familiar with and be able to use the basic writing techniques of academic writing (e.g. that of thesis writing). The students will learn the skills of writing abstracts, selecting its keywords, and they will also be able to quote and paraphrase various sources.	
Brief syllabus: Each session of this course will concentrate on a certain aspect of the writing process and on organizing the different parts of texts. Students will read and evaluate each other's compositions. They will be required to submit a chapter of their thesis. The course will deal with writing abstracts, quoting and paraphrasing.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/BPdb/AJ/15	Name: Bachelor's Thesis and Defense
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study:	
Level of study: I.	
Prerequisites: KMF/BSAJdb/AJ/15	
Conditions for passing the subject: Accomplished thesis, positive evaluations from the supervisor and from the opponent. Successful defence of the thesis.	
Results of education: The student studies and conforms to the requirements for thesis writing, and then becomes able to work independently on a topic and to accomplish writing a thesis.	
Brief syllabus: 1. Types and administration of theses. 2. Thesis structure. 3. Formal organization of the parts of a thesis. 4. Citations, bibliographical entries, literature used. 5. Research related to the thesis topic. 6. Working hypothesis, the formulation of goals and tasks. 7. Research methodology. 8. Analysis and processing of results, discussion. 9. Conclusion and appendices. 10. Submitting the thesis, licence agreement, declaration of originality.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ BSAJdb/AJ/15	Name: Bachelor Seminar
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the term the student should work out the hypotheses and the structure of the thesis (for 20 points); should provide review of the literature (at least 10 sources) (for 10 points), and should also write and submit 70% of the thesis (for 70 points). At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to interpret the abstract of his/her BA thesis, to quote properly and refer to literary sources, to write 70% of his/her thesis, as well as to introduce it in the form of a short presentation.	
Brief syllabus: The main goal of the subject is to help the student to write his/her BA thesis. The topic and title of the thesis is already decided at the end of the fourth term. During the term the consultant provides general literary sources for thesis writing, as well as for the topic selected by student. The student has to do extensive reading in order to extend the sources by a number of other ones collected from the library and the Internet. Based on the sources the student provides the main structure of the thesis, as well as writes the thesis.

Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: There will be two tests in the semester, each with a score of 30 points. The course will end with an oral examination for 40 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be well familiar with the history of American literature, starting from its beginning, until the end of XIXth century-beginning of the XXth century. The student will be able to distinguish among various literary periods based on their characteristic features. The student will also be able to analyze the key works of American literature.	
Brief syllabus: The lectures describe the prominent representatives of the most important literary periods and their most well-known works. The seminar, the goal of which is deepening the knowledge acquired on lectures, freely follows the material of lectures. The subject focuses on the history of American literature, starting from its beginning, until the end of XIXth century-beginning of the XXth century. The main themes are as follows: Franklin: "Autobiography", W. Irving's short stories, Cooper: "The Last of the Mohicans", E.A.Poe poems and short stories, Thoreau: "Walden", Hawthorne: "The Scarlet Letter", Mark Twain: "The Adventures of Huckleberry Finn", Melville: "Billy Budd", Whitman and Dickinson's poems , Henry James: "The Turn of the Screw", T.S. Eliot and Ezra Pound's poems, etc.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ DRA1db/AJ/15	Name: Drama Techniques in Teaching English 1.
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students will write two tests with a score of 50 points each. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to use techniques of drama pedagogy in teaching English as foreign language. The students passing the course will be able to use the techniques, to prepare lesson plans based on drama pedagogy and organize projects based on drama.	
Brief syllabus: During the course the students will get acquainted with a number of various methods based on drama pedagogy, such as warm up, improvisation and other verbal and non-verbal games. The course puts main stress on practicing the skills with the help of which the students can easily acquire the techniques mentioned above. The largest part of the techniques mainly focuses on development of vocabulary and grammar. During the course the students get familiar with the main notions of drama pedagogy: improvisation, hot-seating, verbal and non-verbal activities/games, etc. The course introduces the techniques based on such literature with the help of which various language structures might be practiced. The students take part in various project, such as A Crazy Hotel, The Frog Prince, a The Grey Lady.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ FONEdb/AJ/15	Name: Linguistics 1. - Phonetics
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 30 points. The course ends with a written exam scoring 40 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: Having accomplished this course, the student will be able to apply the general notions and basic terminology related to the phonetics of the English language. The student will be able to classify, interpret and realize the sounds of English, as well as to recognize and identify the correspondences between spelling and pronunciation.	
Brief syllabus: Phonetics and phonology Basic concepts (phoneme, allophone, minimal pairs, free variants, complementary distribution; orthography and transcription). Classification of speech sounds; Obstruents (place and manner of articulation; voice, sonority, nasality, aspiration, devoicing, sound assimilation, flapping, palatalization). Voiced consonants (devoicing, L-darkening, R-dropping, linking and intrusive /r/, syllabic sonorants, yod-dropping, nasal place assimilation). Vowel classification. The influence of R on vowels: pre-R breaking, pre-R broadening, exceptions. Tense lax alternation: vowel alternations, trisyllabic laxing, U laxing, CiV laxing). Vowels in final position, vowel preceding vowel, letter to sound correspondences. Intonation of English words. Intonation of English sentences. The course focuses on segmental and suprasegmental features.

Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to use morphological and grammatical structures of the contemporary standard English language.	
Brief syllabus: The main goal of the seminar is to polish the students' language knowledge in the light of speaking and writing skills. Further objective is developing various communicative sub-competences, primarily grammar and vocabulary. The course focuses on the morphological and grammatical structures of contemporary English language. The themes of the course: Describing events, correct use of verb tenses, quantity, infinitive and gerund, modal verbs (Present and Past tense), Future tense (continuous and perfect), hypothetical situations, if-clauses.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ AP/15	Name: Computer Hardware
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 0 / 1 For the study period: 26 / 0 / 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The subject is finished by an written exam (test). For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. Credits will not be granted to students who obtain less than 50 points.	
Results of education: Within this subject students are familiar with the construction and principles of operation of computers, the computer architecture. Students gain a deeper understanding of traditional Von-Neumann architecture. Attention is paid to the technological milestones that have been the basis for the development of processors and computer components. The ways of cooperating of base units, principles of their operation and application areas with regard to current trends are explained. Attention is also paid to theoretical background and demonstrations of specific problems solutions in the context of current trends in the field.	
Brief syllabus: The meaning of computer architecture. Boolean algebra, logic elements. Logic circuits - design and realization Building blocks of digital systems Computer memory, registers. Data types, mathematical operations, Arithmetic logic unit, executing instructions (instruction cycle). Bus types, principle of operation, serial and parallel bus (FSB, PCI, PCIe, HT, QPI), characteristics I/O, I/O operations, performed in the storage unit DMA. I/O channel. IRQ system. Pinciple of operation DRAM, SRAM, ROM a EEPROM. Virtual machine - construction and operating principles. Intel, AMD, IBM a ARM processors, their architecture and development trends. Multi-core processors - development, implementation reasons, restrictions on use.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ DM/15	Name: Discret Mathematics
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 2 / 0 For the study period: 13 / 26 / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written tests by 20 points. The course is finished by an exam where it is possible to obtain 60 points. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. Credits will not be granted to students who obtain less than 50 points.	
Results of education: At the end of the course, students will obtain an overview of the basic concepts of Set Theory, Combinatorics, Mathematical Logic and Boolean Algebra.	
Brief syllabus: Introduction to the Discrete Mathematics, Peano axioms, principle of Mathematical induction. Set Theory – basic terms, set operations. Relations and mappings, composition of mappings, equivalence relation. Cardinality of sets, finite and nonfinite sets, computable sets. Combinatorics – combinations and variations (with and without repetition). Permutations (with and without repetition), combinatorial identities. Binomial and Polynomial theorem. Inclusion–exclusion principle, Pigeonhole principle. Propositions and logical operations, tautologies. Boolean algebra – binary Boolean functions, realization of Boolean functions by formulas. Equivalence of Boolean formulas, properties of elementary Boolean functions, principle of duality. Canonic form of Boolean functions, full disjunctive normal form. Functional completeness and closure, most important closed classes, Completeness theorem. Minimization of Boolean functions.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ DS1/15	Name: Database Systems 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Students during the semester to create their own database applications, where it is possible to obtain 50 percent. The course is finished by an exam where it is possible to obtain 50 percent. For assessment A should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent. Credits will not be granted to students who obtain less than 50 points.	
Results of education: In this course the student learns the issue of databases, their design and further its knowledge of relational databases. After successfully completing the course will gain an overview as the theoretical knowledge as well as practical aspects of creation of database systems, to acquire basic technical terminology in the field and this knowledge can also adequately used for the analysis of database systems, their design and implementation in the selected database environment.	
Brief syllabus: Basic concepts and terminology database systems. Introduction to database technology. Semantic database models. Hierarchical database models. Network database models. The relational database model. Relational algebra. Normal forms of relational databases. Normalization process for the demonstration. Customization and debug databases.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ GED/15	Name: Computer Graphics 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 0 / 0 / 2 For the study period: 0 / 0 / 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students work on an individual project where it is possible to obtain 100 points. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. Credits will not be granted to students who obtain less than 50 points.	
Results of education: At the end of the course, students will obtain an overview of the basic concepts of Raster graphics and they will be able to apply this knowledge during photo editing.	
Brief syllabus: Basic terms of Computer graphics – vector and raster graphics, pixel, dpi, rasterization, graphics file formats. Raster graphics and raster graphics editors (Paint.Net, Gimp). Environment of the graphics editor: design area, tool palette, status line, color palette, selection tools. Work with drawing tools: paintbrush, pencil, eraser, magic wand, paint bucket, clone stamp, recolor, text tool. Drawing filled and unfilled rectangles (squares) and ellipses (circles). Object selection and deselection, resize, translation, rotation, crop. Work with text: insert and edit text. Editing digital images: resize, canvas size, rotation, retouch. Sharpening tools, blur tools, darkening and lightening tools, coloring tools, brightness and contrast, color balance. Work with layers: add and delete layers, layer selection, layer properties. Selection tools: rectangle select, ellipse select, operations on selections. Work with filters.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ OS/15	Name: Operating Systems
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The course is finished by an exam. For assessment A should be obtained at least 90 percent, for assessment B at least 80 percent, for assessment C at least 70 percent, for assessment D at least 60 percent, for assessment E at least 50 percent. Credits will not be granted to students who obtain less than 50 percent.	
Results of education: After successfully completing the course the student is familiar with basic structures and functions of operating systems, user interfaces, the work in an operating system UNIX and Windows. He masters the operating system of single-user computers: 16-bit, 32 and 64-bit operating systems, processes, memory, file system, as well as the corresponding system terms of these functions. He learns the basic methods and algorithms used in the design and construction of operating systems that he can use in his practice.	
Brief syllabus: Introduction to the Operating systems, basic terms. History and classification of operating systems. Architecture of operating systems. Programming and user interface. Managing files and directories - name and file attributes. User rights, work with files and directories. Management and structure of disk devices. Management of resources. Management of processors and processes. Parallel processes - planning, communication and synchronization. Management of memory. Virtual memory management, memory segmentation.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ PP/15	Name: Propaedeuticsof programming
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 0 / 0 / 2 For the study period: 0 / 0 / 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students gain experience in programming in the microworld Imagine Logo and create custom animation in a graphical environment LogoMotion. Students from the mid-semester independently solve the programming tasks - semestral project of which outcome should be an own didactical project in Imagine. During the semester, students have the opportunity to consult his project (phase of creation) with teacher. At the end of the semester they submit the finished educational software (the electronic version), that is evaluated. Students must before classmates present and defend their project by an open discussion. Students are classified according to the average obtained in the overall assessment of the continuous preparing during the semester (50%) and according to the project (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of the course the student acquire an overview about the possibilities of teaching programming at the different types schools and levels of education through children's programming languages (microworlds), which can help in developing algorithmic thinking and acquire programming experiences in a playful way.	
Brief syllabus: <ul style="list-style-type: none"> • Teaching programming at different levels and degrees of education. • Place children's programming languages in the educational process. • Turtle Graphics - turtle, animated turtle. • LogoMotion - animation, timing, phase of turtles. • Basic control commands and elements of the program Imagine. • Data types - variables, texts, buttons and work with them. • Commands for the individual objects. • Sub-programs - their own procedures. • Events of individual objects, event response. • Conditions for process control. • Overlapping of objects, object testing. 	

- Multimedia options of the Imagine environment - working with the sound and video.
- Planning and implementation of projects - didactical applications.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ PR1/15	Name: Programming 1
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 0 / 2 For the study period: 26 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester, students write two practical assessments. Students also solve some programming projects individually at home. The activity of students in classes is also taken into consideration, so students can get plus points. In practical assessments and programming project students need to achieve a minimum of 50%. Using all these assessments, the teacher of seminars prepare students continuous evaluation. The exam consists of a practical and theoretical programming tasks. Students in exam have to reach also a minimum of 50%. The final grade is calculated as a mean of continuous evaluation and exam mark. For the classification A at least 90%, for B at least 80%, for C at least 70%, for D at least 60%, and for E at least 50% must be obtained. Those students, who did not achieve the minimum 50% from any part, do not finish the course successfully.	
Results of education: After successful completion of course, students will know the fundamentals of structural programming, will be able to write algorithms as sequence of logical steps to different problems, draw flowcharts, and rewrite them into programs. Students will have experiences in the usage of programming environment, practice in programming using standard control structures and functions.	
Brief syllabus: <ul style="list-style-type: none"> • Algorithmization - Basic features of algorithms, forms of creating and expressing algorithms. • Oral and graphical expression of algorithms. • Basic elements of algorithms, and their usage. • Programming - The structure of programs in programming language. Syntax and semantics. • Data types, representation of standard data types in the programming language. • Standard data structures, basic commands. • Standard functions and procedures. • Programming, solving tasks (sorting algorithms). • Procedures and functions: hierarchy of program structure. Defining own functions. Global and local variables. • Procedures with and without parameters. 	

- Extending the concept of data types using additional standard types and structures, their importance in solving problems (enumerated types, sets, files, etc.).
- The file, as useful tool of exchanging data between programs and their environment. The structure of files, declaration of files, file types, accessing files, operation on files.
- Standard procedures for processing files. Methods of file handling.
- Complex solution of problems.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ PR2/15	Name: Programming 2
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 0 / 2 For the study period: 26 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The course ends with exam, where students can get 100 points. For the classification A at least 90 points, for B at least 80 points, for C at least 70 points, for D at least 60 points, and for E at least 50 points must be obtained.	
Results of education: After the successful accomplishment of the course, students will understand the concept of dynamic variable, dynamic data structures, and their implementation in the given programming language. They will acquire knowledge about the searching and sorting algorithms. Furthermore, students will be acquaint with various programming techniques.	
Brief syllabus: <ul style="list-style-type: none"> • Procedures and functions, creating own procedures and functions. • Data structures: set, record, enumerated type. • Using files: text files, typed binary files, untyped binary files. • Standard modules: System, Dos, Crt, Graph, String. • Special algorithms: Sorting, as an example for finding an effective algorithm: insertion sort, selection sort, bubblesort, binary insertion sort, shaker sort, lexicographic sort, merge sort, heapsort.... • Sorting files. • Programming techniques: Recursion. Recursive sorting algorithms: quicksort, merge sort. Comparing complexity of sorting algorithms. • Programming techniques: backtracking, iterative algorithms • Graph unit: graphic mode and its parameters (graphic driver, graphic mode and color depth, initializing graphic mode), procedures and functions of the graph unit, and their usage. • Graph, Winmouse units: Creating simple animations, using mouse (Winmouse unit). • Dynamic types and data structures: concept of dynamic variable, its representation in the computer's memory. Examples of dynamic data structures: linked list, stack, queue, and their usage in programming. • Implementing standard data structures (shift register, single linked list, double linked list, cyclic list, tree structure, net structures. Using appropriate data structure for simplifying the solution of problems. 	

- Developing software products: from top to bottom, from bottom to top, functional and procedural programming, modular programming, creating units, Jackson method.
- Developing of software systems: Rules of developing programs: analyzing the problem, redefining problems, dividing problems into smaller parts, etc. Methods of developing software projects, and their characterization. Collaborating and managing a programming group.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ PR3/15	Name: Programming 3
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The course ends with exam, where students can get 100 points. For the classification A at least 90 points, for B at least 80 points, for C at least 70 points, for D at least 60 points, and for E at least 50 points must be obtained.	
Results of education: After the successful accomplishment of the course, students will be familiar with the visual, event-driven programming, and developing applications with graphical user interface under the modern operating systems. Furthermore, students will have knowledge about creating software products in visual environments, and will have fundamental knowledge needed for deeper understanding of object-oriented programming.	
Brief syllabus: <ul style="list-style-type: none"> • Programming under Windows operating system, review of programming languages, visual, event-driven programming. • Basic components and events, properties of components. • Object oriented programming, classes and objects, attributes and methods. • Constructor, destructor, visibility modifiers (public, private, protected). • Objects, inheritance, polymorphism, virtual, dynamic, and abstract methods. • Compatibility and casting classes. • Objects that are available for creating a simple application. • Graphics, drawing on canvas, creating simple animations. • Handling files, saving preferences into ini files and registers. • Standard dialogs (OpenDialog, SaveDialog, FontDialog, ColorDialog, ...). • Using more windows in an applications, developing SDI and MDI applications. • Events of the operating system, messages, reactions to the events of the operating system. • OOP in practice – practical examples, runtime creating of visual objects. • User requirements and taking them into consideration, written and unwritten rules of software development. • Testing software products, copyright, copyright protection.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ TAZ/15	Name: Algorithm and Complexity Theory
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 2 / 1 / 0 For the study period: 26 / 13 / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written tests by 20 points. The course is finished by an exam where it is possible to obtain 60 points. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. Credits will not be granted to students who obtain less than 50 points.	
Results of education: At the end of the course, students will obtain an overview of the basic concepts of Algorithm and Complexity Theory. They will be familiar with sorting algorithms, mathematical models of computers, complexity classes and algorithmically unsolvable problems.	
Brief syllabus: Algorithm, properties of algorithms. Correctness of algorithms, proving correctness of algorithms. Complexity of algorithms – time and space complexity. Asymptotic complexity. Algorithms for searching in sorted array. Linear and Binary search. Sorting algorithms and their complexity: Bubble Sort, Insertion Sort, Binary Insertion Sort, Selection Sort. Sorting algorithms and their complexity: Merge Sort, Quick Sort, Heap Sort. Sorting algorithms and their complexity: Counting Sort, Radix Sort, Bucket Sort. Hash tables and their use. Hash functions. Mathematical models of computers: Turing machine. Mathematical models of computers: RAM Computation Theory - recursively enumerable and recursive languages, and partial recursive and recursive functions. Church–Turing thesis. Complexity classes P and NP. NP-complete problems. The NPC class. Algorithmically unsolvable problems, the Halting problem for Turing machines.

Name of the faculty: Faculty of Education	
Code: KMI/Idb/ TFJ/15	Name: Theory of Formal Languages
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 2 / 0 For the study period: 13 / 26 / 0 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester will be held two written tests by 20 points. The course is finished by an exam where it is possible to obtain 60 points. For assessment A should be obtained at least 90 points, for assessment B at least 80 points, for assessment C at least 70 points, for assessment D at least 60 points, for assessment E at least 50 points. Credits will not be granted to students who obtain less than 50 points.	
Results of education: At the end of the course, students will obtain an overview of the basic concepts of Theory of Formal Languages and Automata. They will be able to create regular and context-free grammars, finite and push-down automata.	
Brief syllabus: Introduction to the Theory of Formal Languages and Automata, basic terms. The Chomsky hierarchy of grammars, the Chomsky hierarchy of languages. Regular languages – basic terms. Nondeterministic and deterministic finite automata. Connection between regular grammars and finite automata. Regular expressions. Pumping lemma for regular languages. Context-free languages – basic terms. Push-down automata, nondeterminism of push-down automata. Equivalence between context-free languages and push-down automata. Pumping lemma for context-free languages. Top-down parsing, bottom-up parsing.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMI/Idb/ TPS/15	Name: Educational Software Development
Types, range and methods of educational activities: Form of study: Lecture / Seminar / Practical Recommended extent of course (in hours): Per week: 1 / 0 / 2 For the study period: 13 / 0 / 26 Methods of study: present	
Number of credits: 4	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Students during the semester independently solve a programming tasks - semestral project of which outcome should be an own educational software. During the semester, students have the opportunity to consult his project (phase of creation) with teacher. At the end of the semester they submit the finished educational software (the electronic version and the instructions for use), that is evaluated. Students must get at least the 50% of the total evaluation, to be allowed to pass the examination. The exam is combined and consists of practical part - presentation of the finished educational software and verification of theoretical knowledge from creation of educational software. The students, to be classified, must be also successful at least 50% on the exam. Students are classified according to the average obtained in the overall assessment of the continuous preparing (semestral project) during the semester (50%) and according to the exam (50%). For obtaining the classification A must be obtained at least 90% share of average, at least 80% for B, for C at least 70%, at least 60% for D, for E at least 50%. Credits for subject will not be assigned for the student, who is not at least 50% successful of the individual parts.	
Results of education: After successful completion of this course the students are proficient in basic of creation of educational software, they are able to select the right algorithm for solving the problem, they know the pedagogical and psychological aspects of creation of educational software. They are aware of the features of the computer in different forms and phases of learning and are able to choose and skillful use appropriate programming environment (optionally also combine different environments) for the creation of educational software for some topic. They master rules for a correct creation of software product documentation.	
Brief syllabus: <ul style="list-style-type: none"> • Computer options in different forms and phases of learning, • presenting the educational content - computer skills, • Computer based knowledge testing, • the possibility of creating animation in different programming languages, • the possibility of creating an interactive user interface, • multimedia options in the learning process, • pedagogical and psychological aspects of creation of educational software, 	

- comparison of the specifics of the first, the second level of elementary school and secondary schools,
- choice of the appropriate topic for educational software based on consultation with teachers in praxis,
- implementation of educational software,
- rules for a correct creation software product documentation,
- testing of final products in real conditions.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ JAS1db/AJ/15	Name: Language Seminar 1.
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to use the morphological and syntactical constructions of contemporary standard English language. The student will also be able to express himself/herself in English language, using vocabulary linked with the everyday topics.	
Brief syllabus: The topics include the most important vocabulary, as well as grammatical, morphological and syntactical constructions. Language Improvement Seminar I addresses the following topics: The past, present and future tenses. Auxiliary verbs. General rules of using verbs and tenses. Dialogue-constructions, abstract nouns, Expression of feelings; Use of tenses in narratives; continuous tenses; usage of prefixes and suffixes word-formation processes. Word order in English sentences. The most famous inventions of the last 150 years. How to pass exams successfully? Usage of the definite and indefinite article. Upon successful completion of this course, the students will be able to continue the second part of the course, Language Improvement Seminar II, which will treat some further topics, as well as various grammatical phenomena.

Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: There will be two tests in the semester, each with a score of 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to use the morphological and syntactical constructions of contemporary standard English language. The student will also be able to express himself/herself in English language, using vocabulary linked with the everyday topics.	
Brief syllabus: The main goal of the course is further development of various language competences and skills of students (writing and speaking), as well as polishing of their vocabulary and grammar. This course is continuation of Language Practice I. during which the students deal with the themes which will further develop language competences of students and will provide them with the knowledge crucial for passing their complex exam (ILIE). During the course the following topics are addressed: Holidays, events and festivals. Quantifying. Polishing of pronunciation. Coping with difficult situations. Celebrities and politicians. Talking to celebrities. Gerund and infinitive. The advantages and disadvantages of richness. Problem solving. Mysteries. The past tense of modal verbs. Cooperation and competition. Organizing of international meetings. Future tenses. The modern healing. The wonders of modern sciences. Hypothetical situations. Forming of opinions. Money and power. Media, Report.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ JASZdb/AJ/15	Name: Language Seminar - Final Exam
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 0 / 0 For the study period: 0 / 0 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The exam consists of 5 parts. One can obtain the following points: Use of English 60 points, Reading 15 points, Listening 13 points, Writing 30 points, Speaking 10 points. To pass the exam, the student needs to obtain at least 50% from each part. The grade is calculated based on the average of the 5 parts. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to use the morphological and syntactical constructions of contemporary standard English language and to express himself/herself in English language, using vocabulary linked with the everyday topics. The student will also be able to use synonyms, antonyms, collocations and the most frequently used idioms and phrases.	
Brief syllabus: The main goal of the exam is to test and verify the language level of students who have attended a language practice seminar for 2 terms. The main purpose of the exam is also to test students' language competences (writing and speaking), as well as communicative sub-competences (vocabulary and grammar). Grammar: the student will be able to use the morphological and syntactical constructions of contemporary standard English language, as well as to use language skills in such complicated process as translation from English and into English. Vocabulary: the student should be able to show his fluency in express himself/herself in English language, using vocabulary linked to the everyday topics. The student will also be able to use synonyms, antonyms, collocations and the most frequently used idioms and phrases. The students should also be able to use monolingual dictionaries without any difficulty. The final exam consists of five parts: written and oral. The written part, the purpose of which is to test the following skills (grammar, vocabulary, listening, reading and text understanding, as well as composition), consists of five parts. The oral part consists of a conversation based on the topic given to the student.

Number of credits: 3	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 20 points. The course ends with a written exam scoring 60 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having accomplished this course students will be able to analyse English words, lexical relations, and will obtain a general knowledge of lexicography.	
Brief syllabus: Lexicology, lexicography This course starts with a review of basic concepts that students learnt about in previous courses: word, unit, morpheme, allomorph. The course investigates lexical relations and the various phases of word formation and creation. It also surveys the different definitions of lexicographical principles, as well as with the types of dictionaries and the history of English and American dictionaries. By the end of the semester students will learn how to utilize dictionaries efficiently in the classroom.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ LISTdb/AJ/15	Name: Listening
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: There will be two tests in the semester (listening and comprehension), each with a score of 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to understand the directions, instructions and short remarks of teachers and native speakers of English, which contain well-known lexical and grammatical structures. The student will be able to understand the main point of conversation, as well as the main connections during the interaction between two or more people.	
Brief syllabus: The course focuses on the following skills: Listening to short, adapted stories, and songs (with/ or without the help of printed texts), and their understanding. Understanding of tape recording. Understanding of monologues and dialogues, authentic texts broadcasted on TV and radio. Differentiating between catching important and non-important pieces of information. Extracting and understanding of the main message of foreign language films, describing main characters. After language preparation understanding of artistic texts. Taking notes while doing listening exercises. The graphic marking of the most important pieces of information in notes. Understanding of bad quality recording or recording difficult to understand (such as announcements at bus and/or train stations; conversations disturbed by traffic noise). The texts and recordings contain British and American expressions.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ LT20db/AJ/15	Name: Reading Literary Texts of the 20th Century
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students will write two tests with a score of 50 points each. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to interpret and analyze the 20th century literary works, as well as to use the techniques and methods employed by main literary schools.	
Brief syllabus: The seminar focuses on the intensive analysis of the 20th century literary works. During classes various British and American novels, dramas, short stories and poems are analyzed. The main goal of the subject is to provide a chance for students to deepen their analysis of given literary works. During classes the students will get acquainted with the method of deep reading which puts emphasis on intensive work on the literary pieces and not on the length of the texts they have to read. The seminar sheds light on the techniques used by given literary schools, as well as gives a great chance to practice them

Conditions for passing the subject: There will be two tests in the semester, each with a score of 20 points. The course will end with a written examination for 60 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to introduce and evaluate the advantages and disadvantages of various language teaching methods, as well as to put the most important techniques of these methods into practice.	
Brief syllabus: The content of the subject is divided into three main thematic units. The first one addresses the general questions of language teaching: the factors playing important role in language teaching, learning styles, motivation, grouping of students. After discussing the key theories of language acquisition students get familiar with the most well-known methods of foreign language teaching. With the help of short presentations the students become acquainted with the main theories and trends which have played very important role in teaching of English as foreign language for the last 10 years (Grammar Translation Method, Direct Method, Audio-lingual Method, Silent Way, Suggestopedia, Community Language Learning, Total Physical Response, Communicative Language Teaching, Task-based Learning).

Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Two tests will be written during the semester, each with a score of 20 points. The course will end with a written examination, for which the students can obtain 60 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E.	
Results of education: Students, having successfully accomplished this course, will be able to critically evaluate, assess and solve the most frequent problems in modern language teaching. They will be able to apply the techniques required for transferring foreign language knowledge and for developing language competencies. They will be able to construct a methodological model for developing all the language skills and will know how to integrate them in the process of language teaching.	
Brief syllabus: The course will start with an introduction to the main models of foreign language teaching and will continue with a detailed analysis of the individual phases involved in these models. Students will become acquainted with various methods with which they can teach new grammatical structures, and they will evaluate and test the techniques with which they can expand the learners' vocabulary. The seminar will also discuss methods with which teachers can effectively ask questions and with which reading and listening skills can be effectively developed. Students will learn different assessment strategies, especially those for oral and written performances.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ MORFdb/AJ/15	Name: Linguistics 2. - Morphology
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 4.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: There will be two tests in the semester, each with a score of 20 points. The course will end with a written examination for 60 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to to use to provide an introduction to. Upon completion of the course the students are expected to to understand the fundamentals and terminology of English morphology, the structure of English words, and main rules according to which the words are formed; demonstrate a good understanding of forms of English words in different uses and constructions; to have deeper insights into morphological process, and to be able to carry out morphological analysis.	
Brief syllabus: Introduction. Basic concepts in morphology: some terminological issues. Word, word-form, lexeme, lemma. A word and its parts: affix, base, root, stem. Words, sentences and dictionaries. Affixation: suffixes, prefixes, circumfixes, infixes. Free morphemes, bound morphemes. Morphemes, morphs, and allomorphs. Derivation: Suffixation, prefixation. Inflection. Suppletion and suppletive forms. Word-formation processes: compounding, derivation, conversion, truncations, abbreviations, acronyms, initialisms, clipping, blending, loaning, backformation, reduplication, combining forms.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/PISdb/ AJ/15	Name: Writing
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 1.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Four tests will be written during the semester, each with a score of 25 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having accomplished this course, the student will be able to identify the general types and forms of written communication and to differentiate between various types and forms of texts (description, argumentation, narration, discourse, formal letters). The student will be able to produce such types of texts as well as to apply the basic techniques used in composing a grammatically correct text.	
Brief syllabus: The following topics will be covered in this course: Brainstorming, Effective sentence construction, Various sentence types, Punctuation, Paragraph construction, The relevance of key sentences in appropriate paragraphs, Units of texts, Constructing paragraphs, Opening and closing phrases, Continuity, From paragraphs to essay, Theses, Types of formal letters, CV, Applications, Proposals, Letter of complaint, Informal letters, Essays: the process of writing, structure, cohesion, coherence. Types of essays. After surveying the theoretical issues students will put their knowledge to practice, and they need to become able to compose texts of different types and genres in a style appropriate to the given type of text.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ SBAdB/AJ/15	Name: Contemporary British and American Literature
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 6.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students have to prepare a seminar work for 50 points and have to make a presentation for 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Having accomplished the course, the student will be able to analyze and evaluate English and American literary works written by the end of the 20th century and in the 21st century and will be able to apply the techniques and methods of the most known literary schools.	
Brief syllabus: The main objective of the course is to provide students with relevant information about contemporary British and American literature and help them become able to analyze the selected literary works from the indicated period in detail. Special attention will be paid to the fact that the intensive work with the literary text is more important than the length of the text. During the seminars, students will be working with various techniques of several active literary schools.

Conditions for passing the subject: Students have to obtain the necessary number of credits from compulsory and elective subjects required by the study plan of the programme.	
Results of education:	
Brief syllabus: LINGUISTICS 1. The definition and scope of linguistics. The main characteristics of communication; language universals. Diachrony/synchrony; descriptivism/prescriptivism. 2. Phonetics and phonology. Phoneme, allophone, minimal pairs. The International Phonetic Alphabet (IPA), different types of transcriptions. 3. Speech organs and sounds. Classification of speech sounds: consonants. 4. Speech organs and sounds. Classification of speech sounds: vowels. 5. Linking. Prosody, isochrony. Stress, pitch and tone. 6. Morphology. The notions of morphemes, allomorphs; the segmentability of words. Inflectional and derivational morphology. 7. Word. Lexeme. Lemma. Characteristics of words. Word classes. 8. Word-formation processes (compounding, clipping, blending, coinage, acronym, conversion, affixation, borrowing, noncewords, eponym). 9. Noun and the noun phrase. Classification of nouns, noun categories, structure of the noun phrase. 10. Verb and the verb phrase. Classification of verbs, verb categories, structure of the verb phrase. 11. The structure of the phrase; major types of phrase and their functions. 12. Simple sentence; sentence and clause; basic clause patterns; types of sentence (form and function)	

13. Complex sentence, compound sentence; complex-compound sentence; coordination and subordination; reported speech.
14. Tense, aspect and mood in English. Modal verbs in English
15. Adjectives (definition, characteristics, classification). Adverbs (types, characteristics, adverbs as clause elements, positions)
16. Semantics. The relationships between lexical items: synonymy, antonymy, meronymy, hyponymy, polysemy; homophones, homographs. Idioms, Collocations, Proverbs, Sayings.
17. Grammatical functions: subjects, predicates, direct and indirect objects, predicatives/compliments, adjuncts.
18. Phrases (AP, PP, AdvP, CP). Tree diagrams as representations of structure
19. Types of dictionaries. Dictionary structure. Lexical entries. Grammar in the dictionary. Using dictionaries in the classroom.

LITERATURE

1. The first English literature. The Anglo-Saxons. Beowulf. Arthurian legends. Middle-English literature Geoffrey Chaucer: The Canterbury Tales
2. Medieval English drama. Humanism and the Renaissance. Renaissance drama and Elizabethan theatre. Thomas Kyd, Christopher Marlowe
3. Renaissance poetry. Sir Thomas Wyatt, Henry Howard Earl of Surrey, Sir Philip Sidney, Edmund Spenser. The poetry of William Shakespeare. Tudor prose: Sir Thomas More.
4. Shakespeare's works, classification. Shakespearean tragedy
5. Shakespearean comedy
6. Stuart literature. Historical background. John Milton. Drama in the Restoration period. Classicism. Prose in the Age of Reason. Daniel Defoe, Samuel Richardson, Henry Fielding, Jonathan Swift. Laurence Sterne: The Life and Opinions of Tristram Shandy Gentleman
7. Jane Austen and social criticism. Pride and Prejudice. Gothic novels. The Brontë sisters. Wuthering Heights.
8. Romanticism. William Blake. Robert Burns. The Lake poets: S. T. Coleridge, William Wordsworth. Coleridge: The Rime of the Ancient Mariner. Byron, Shelley, Keats
9. The Victorian period. Realism. Charles Dickens: A Christmas Carol. Late Victorian period: Imperialism, Pessimism, Liberalism. Rudyard Kipling, Thomas Hardy
10. English drama in the late 19th and early 20th century. The influence of Henrik Ibsen. G. B. Shaw: Pygmalion.
11. Aestheticism and the Fin De Siècle. Oscar Wilde: The Picture of Dorian Gray. The Happy Prince and Other Stories
12. The Beginnings of American Literature (The writings of the explorers; Native American literature, Colonization and Puritanism; The 18th century: Christopher Columbus, John Smith, J. Hector St. John de Crèvecoeur, Benjamin Franklin)
13. Romanticism in American Literature I. (Washington Irving, James Fenimore Cooper)
14. Romanticism in American Literature II. (Edgar Allan Poe, prose and poetry)
15. The American Renaissance I. (Transcendentalism, Ralph Waldo Emerson, Henry David Thoreau)

16. The American Renaissance I. (Herman Melville, Nathaniel Hawthorne)
17. American Poetry in the 19th Century (Walt Whitman, Emily Dickinson)
18. American Prose in the Second Half of the 19th Century I. (Kate Chopin, Harriet Beecher Stowe, Mark Twain)
19. American Prose in the Second Half of the 19th Century II. (Henry James, Stephen Crane, Charlotte Perkins Gilman)
20. Early 20th Century American Poetry (Robert Frost, Ezra Pound, William Carlos Williams)
21. Contemporary British and American Literature I. (Margaret Atwood – The Handmaids Tale, David Mitchell – Cloud Atlas, Andy Weir – Martian, Jeff Vandermeer – Annihilation)
22. Contemporary British and American Literature II. (Kazuo Ishiguro – Never Let Me Go, Chris Beckett – Dark Eden, Neil Gaiman – American Gods)
23. Contemporary British and American Literature III. (Ian McEwan – Atonement, Kate Atkinson – Life after Life, Gillian Flynn – Gone Girl)

METHODOLOGY

1. The roles of the teacher in the foreign language classroom
2. Learner factors affecting second language learning (age, learning styles, motivation, anxiety)
3. Theories of language acquisition and their influence on language teaching
4. The Grammar Translation Method
5. The Direct Method
6. The Audio-Lingual Method
7. Alternative methodologies: Suggestopedia and Silent Way.
8. Total Physical Response
9. Community Language Learning
10. The Communicative Approach
11. Task-Based Language Teaching
12. Classroom management
13. Introducing new language structures: teaching models
14. Giving feedback: feedback, assessment, correction
15. Correction: dealing with spoken and written errors
16. Classroom discipline
17. Coursebooks, and the use of teaching equipment
18. Lesson planning, syllabus, curriculum

Name of the faculty: Faculty of Education	
Code: KPD/SZdb/ ANA/15	Name: Preparation and Analysis of listen
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 1	
Recommended semester/trimester of study: 5.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: Studens will attend 5-5 hours of each approbation at training schools. The course will be passed if 4 “listening reports” will be submitted (2 of each approbation).	
Results of education: During the pedagogical training students will follow and analyze the education process, they will learn how to apply the theoretical knowledge and the methodology of teaching and will become professionals being able to provide teaching, being able to record and analyze the realities of the profession. The students will be able for reflexion and self-reflexion.	
Brief syllabus: Attending training school classes. Preparing the attendance. Definition of goals, methodology and specialization. Self-observation of the educational process, didactical methods, pedagogical communication, psychological aspects. End phase of the attendance. Analyzation of records, reflexing and interpreting of the observed educational issues.

Level of study: I.	
Prerequisites:	
Conditions for passing the subject: The conditions for completing the course: <ul style="list-style-type: none"> - active participation of the student in a teaching practice in a primary school (primary school) or a secondary school (secondary school), - participation of the student in assigned tasks and involvement in analysis and discussion during the teaching practice, - submission of a completed and validated PPC1 completion report, - Completion of observation sheets from the teaching practice in primary or secondary school: lesson observation records, - Student reflection on PPC1a. Evaluation of the submitted documents (max. 50 points): <ul style="list-style-type: none"> o Content page 35 points, o formal aspect 15 points. Total student workload: 1 credit = 30 hours <ul style="list-style-type: none"> - 20 hours of participation in the teaching practice (contact hours): of which 10 hours of hospitalization and 10 hours of analysis; 2 hours of introductory meeting; 8 hours of preparation of observation sheets and reflection. Final assessment: <ul style="list-style-type: none"> - passed = 50 - 100% (25 - 50 points) - not passed = 49 - 0% (0 - 24 points) 	
Results of education: Knowledge: <ul style="list-style-type: none"> - The student is competent to observe lessons in elementary and middle school. - The student is able to document observed lessons in grade 2 elementary and middle school. - The student is able to navigate some school documents. Skills: <ul style="list-style-type: none"> - The student is able to identify diverse manifestations of structural elements of personality, psychological processes of the student in the teaching process and in social interactions. - The student will describe the didactic aids, communication technologies and means used in the teaching process and the possibilities of applying computers, interactive whiteboards, the 	

Internet, specific teaching programmes and software, dynamic systems and interactive teaching materials and portals in teaching subjects at the 2nd level of primary and secondary school.
- It identifies teachers' teaching and communication styles and professional skills.

Competencies:

- The student is able to conceive his/her own work practices for effective observation.
- Takes a position on observed phenomena based on prior theoretical knowledge.
- Understands the relationship between the principles of teaching and the consequences - the effectiveness of learning.

Brief syllabus:

Basic attributes of observation.

Observation and evaluation of the interior and exterior of a training primary and secondary school.

Recognition and work with pedagogical documentation of the classroom.

Observation of lessons in a 2nd grade elementary school and an SHS.

Analysis of observed lessons together with the trainee teacher.

Documenting the progress of each lesson observed.

Structure of observation sheets.

Completion of observation sheets.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KMF/ VYMEdb/AJ/15	Name: Research Methods
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 2	
Recommended semester/trimester of study: 2.	
Level of study: I.	
Prerequisites:	
Conditions for passing the subject: During the semester students will write two tests with a score of 20 points each. At the end of the term they will also submit a seminar paper for 60 points. The course will end with an oral exam of 50 points. At least 90 points are required for grade A, 80 points for B, 70 points for C, 60 points for D, and a minimum of 50 points for E. Students who score under 50 points will not obtain a credit for this course.	
Results of education: Upon successful completion of this course, the student will be able to profit from theoretical and practical knowledge obtained of studying research methods. He/she will be able to plan and to work out his/her own research. Furthermore, the student will be able to write an essay, a journal article, thesis.	
Brief syllabus: The subject deals with various aspects of academic researches. The main goal of it is to introduce and practice basic qualitative and quantitative methods, as well as evaluation of published research. The main topics: Introduction to the language methodology research methods; Key concepts in research methodology; Formulating research questions and hypotheses; Research project; Data collecting; Observation; Qualitative research; Descriptive observation; Case studies; Quantitative research, survey in the form of a questionnaire; data analyzing; Interpreting results; Finishing research, Introducing research.
