INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KJP/EMPem/ CJNM2/22	Name: German language 2
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 10s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester, students attend seminars and must prepare and submit a written assignment for which they may receive up to 20% of the overall score. They are also required to prepare and present a seminar paper in small groups for a maximum of 20% of the total points available. They write a written assessment at the end of the semester for a maximum of 60% of the total points available. A minimum of 90% of the total score is required for an "A" grade, 80% for a "B" grade, 70% for a "C" grade, 60% for a "D" grade, and 50% for an "E" grade. Students will not receive credits if they score below 50% on the end-of-semester assessment.	
Results of education: Knowledge: According to the course syllabus, the student develops the knowledge necessary for successful communication in a foreign language in a work environment in the subject areas. The student acquires knowledge of professional vocabulary and grammatical skills needed for fluent communication in a foreign language. The student masters the written and oral forms of professional and effective communication, tabular and graphical methods of data presentation in a foreign language. Skills: The student develops language skills and can use a professional foreign language at the B2 level (CEFR). Understand written professional text in the subject areas of the course syllabus in a foreign language. The student understands professional speech in the thematic areas according to the course syllabus in the foreign language. The student will conduct a conversation in a foreign language on the topics and communicative functions covered in the course syllabus (e.g. telephone conversations, the language of presentations, the language of meetings, negotiations, description of data, description of graphs and tables, description of products, development of business contacts, conversation and discussion, expression of opinions, expression of agreement and disagreement, presentation of results of analyses, etc.). The student develops skills in business correspondence.	

The student develops skills in preparing and presenting reports and professional reports in a foreign language.

The graduate can work in teams.

Competences:

The graduates can present the results of their analysis of the company's operations in a foreign language.

The graduate participates independently and responsibly in professional forums within and outside the business organisation in a foreign language.

Brief syllabus:

1. Tourism (Introduction, Types of tourism, Tourism and the economy)
2. Occupations related to tourism
3. Tourism and ecology
4. Grammar: Word building
5. Listening comprehension
6. Mini-projects
7. Services: travel arrangements, travel insurance
8. Reading comprehension
- 9 Grammar: Prepositions
10. Situational exercises, interpreting newspaper articles
- 11 Evaluating graphs and texts
12. Presentations
13. Tests

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ CON/22	Name: Controlling
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 10s / 5s Methods of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: During the semester the students write two written tests, each for 35 points and students will individually solve practical task for 30 points. To obtain grade „A“students have to obtain minimum 90% of the total score, to obtain grade „B students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%. Students have to collect min. 35 scores from two test papers. In other cases students will not have any credits.	
Results of education: The aim of the subject is to provide students with the theoretical knowledge and expand their practical skills linked with controlling particularly in the business unit. After completing the course students will know the essence and principles of formation and functioning of the controlling system, as well as the scope of controllers at different levels of management. Knowledge, skills and competences are developed: Knowledge Understands the structure, functioning and system of business relations, the environmental factors that determine the behavior of companies, the information and motivational factor of economic decisions. He masters the methods of evaluating the current position of companies on the basis of expertly based analyzes, taking into account the internal conditions and external characteristics of the environment. He knows the methods of evaluating sources of financing and methods of analyzing the financial return needed to implement development (change). INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ DPS/22	Name: Taxation of Business Entities
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 0s / 10s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 3.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The assessment and completion of the course consists of 4 parts, those being continuous assessments, individual seminar paper, active participation in seminars and final examination. Continuous assessment (20 points): to successfully pass the course, it is necessary that, based on a certain part of materials studied during the semester, the students can gain a comprehensive overview of the acquired knowledge through partial examinations. The continuous assessment is realised through a written examination four times during the semester, after studying the syllabus chapters determined in advance; maximum 10 points may be gained in each of them (total 20 points per semester for two continuous written assessments). Active participation in seminars (10 points): participation in at least 10 seminars during the semester is a condition for receiving active participation points. It is possible to receive the maximum of 10 points during these seminars by active approach to solving practical assignments related to the material and issues studied. Semester paper (20 points): The semester paper is done individually; the subject matter of the individual semester papers is substantively focused on the comparison of the current legislation regarding a selected tax from the taxes in force in the Slovak Republic and the current legislation regarding a selected tax from the taxes in force in Hungary. Students may opt for any alternative types of taxes but also for other member state of the European Union instead of Hungary. The semester paper is done in writing in the scope of 5–10 pages, continuously during the semester. Mandatory components of the semester paper: – A short description of the current legislation regarding a selected tax in the Slovak Republic. – A short description of the current legislation regarding a selected tax in Hungary (other member state of the European Union). – Comparison of basic tax elements of a selected tax in the Slovak Republic and Hungary (other member state of the European Union). Assessment criteria: – description of the current legislation regarding a selected tax in the Slovak Republic(4 points), – description of the current legislation regarding a selected tax in Hungary (other member state of the European Union)(4 points),	

- comparison of basic tax elements of a selected tax in the Slovak Republic and Hungary (other member state of the European Union (9 points),
- sophistication of the content and form (3 points).

Final assessment (50 points): to successfully pass the course, it is necessary to pass the written final examination comprised of theoretical questions and practical accounting problems. To pass the written examination successfully, it is necessary to receive at least 25 points from the maximum number of 50 points (excluding the points received from continuous assessment, active participation in seminars and semester paper). A student who fails to achieve at least 30 points in the written test, i.e. examination, will be awarded the grade FX – Insufficient.

Results of education:

Knowledge:

The student who has passed the Corporate Taxescourse builds on the basic knowledge from the Taxation Basics course. The student possesses extended knowledge from the field of taxation of natural persons and legal entities in the Slovak Republic. The student will understand the basic principles of selected types of taxes, as well as interrelations between taxing of natural person in terms of the type of income. The student will acquire theoretical knowledge in the field of tax issues and will demonstrate practical knowledge when solving individual assignments focused on calculation of selected tax liabilities of natural persons and legal entities. By passing the course, the student will be able to interpret the content of the individual tax returns of basic types of taxes in force in the Slovak Republic, thereby building especially on the knowledge acquired in the course Taxation Basics.

Skills:

Having successfully passed the course, the student:

- can calculate the amount of tax advance and the amount of net salary of a natural person,
- can calculate the all-year taxation liability of a natural person,
- can calculate the all-year taxation liability of a natural person which has income under Section 6 or 7 and 8 of the Act on Income Tax,
- knows the procedures and methodology of adjusting the profit or loss of a legal entity based on the tax levied to the legal entity and the procedure for reducing the tax base by deducing the tax loss incurred in previous tax periods,
- can calculate the basic relationship between a VAT payer (excessive deduction or tax liability) and the state budget of the Slovak Republic based on a definition of received and performed taxable transactions.

Competencies:

Having successfully passed the course, the student:

- has necessary skills in calculating the amount of tax advance of a natural person,
- can calculate the amount of net salary of an employee, the amount of social security contributions and advances for public medical insurance,
- can fill in the A-type tax return,
- is skilled in calculating the tax base of the legal entity's profit or loss,
- can fill in the basic lines of the VAT return.

Brief syllabus:

1. Classification of taxes in the Slovak Republic, SR tax system
2. Administration of taxes and fees
3. Income tax of natural persons – income classification, employment
4. Income tax of natural persons – income from business, from other self-employment activity, from the lease and use of the artistic performance
5. Income tax of natural persons – capital and other income

6. Income tax of natural persons – annual tax clearing and settlement
7. Income tax of legal entities –subject and object of the tax, means of payment and levies
8. Income tax of legal entities – tax base, tax expenses in relation to tax base, transformation of the accounting economic result to the tax base
9. Value added tax – the principle of tax operation and basic principles of intra-community supply of goods and services.
10. Value added tax – subject and object of the tax, place of taxable trade, formation of tax liability, tax base and tax rate, exempt taxable trade, tax depreciation, means of payment and levies
11. Characteristics and definition of excise taxes
12. Characteristics and definition of local taxes
13. Final revision

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ KPP/22	Name: Competition Policy
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 10s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 6.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The method of evaluation of the subject is the following: written exam. To obtain grade „A“ students have to obtain minimum 90% of the total score, to obtain grade „B“ students have to obtain 80% of the total score, to obtain grade „C“ students have to obtain 70% of the total score, to obtain grade „D“ students have to obtain 60% of the total score, to obtain grade „E“ students have to obtain 50% of the total score. There is no credit for the subject if a student obtains less than 50%.	
Results of education: The subject would like to help students to evaluate the most important phenomena of competition policy. During the lectures, we will deal with the issues of economic policy, market institutions and law. The students will evaluate the situation of free and regulated markets, especially the limitations, state and political interventions. The subject would like to illuminate the practice of competition policy in developed countries and new democracies, especially in Hungary and Slovakia. The course contributes to the acquisition of the following elements of knowledge, skills and competence in the topics outlined in the course. Knowledge: <ul style="list-style-type: none"> • Knows the basic concepts, theories, facts, national economic and international contexts of economics in relation to relevant economic actors, functions and processes. • Has a basic professional vocabulary in economics in the language of the study program and in at least one foreign language. Skill: <ul style="list-style-type: none"> • Follows and interprets world economic and international business processes, changes in economic policy, related policies and legislation, their effects, and takes them into account in its analyzes, proposals and decisions. • Able to collaborate with other disciplines. Competence: <ul style="list-style-type: none"> • Takes responsibility for compliance with professional, legal, and ethical standards and regulations related to work and conduct. 	

Gives lectures and conducts discussions independently. Participates independently and responsibly in the work of professional forums inside and outside the business organization.

Brief syllabus:

1. The subject and framework of competition policy. Schools and theories
2. The market's types: from the monopolies to the free market.
3. The antimonopoly measures. Competition versus monopolies.
4. The limits of the market — markets in danger.
5. Strategies of the corporations at the oligopol markets: horizontal and vertical limits.
6. Antitrust regulation in Slovakia and Hungary.
7. Road to monopolization, regulation of markets, abuse of market domination.
8. Market concentration, fusions (vertical, horizontal and conglomerate).
9. The role of competition policy: the intervention into the market mechanisms.
10. Natural and other monopolies.
11. The compilation of the competition, industry and trade policy. International influences, strategic fusions, international cartels.
12. The competition policy of the European Union. Harmonization efforts during the EU accession. International convergencies in competition policy.
13. Ethical issues of the competition.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ MED/22	Name: International Taxation
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: For the study period: 10s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 5.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The assessment and completion of the course consists of 3 parts, those being an individual semester paper, active participation in lectures and written examination. Active participation in lectures (10 points): participation in lectures during the semester is a condition for receiving active participation points. It is possible to receive the maximum of 10 points by active approach to solving practical assignments from the material and issues studied. Semester paper (30 points): The semester paper is done individually; the subject matter of the semester papers is substantively focused on one of the topics lectured on during the semester. The semester paper is done in writing in the scope of 5–10 pages. Mandatory components of the semester paper: – short description of the current legislation concerning a selected topic from international taxation in the Slovak Republic or Hungary, – short description of the current legislation concerning a selected topic from international taxation in the European Union, – processing of the selected topic based on the paper instructions. Assessment criteria: – Characterisation of the current legislation concerning the selected topic from international taxation in the Slovak Republic or Hungary (5 points). – Characterisation of the current legislation concerning the selected topic from international taxation in the European Union (5 points). – Processing of the selected topic based on the paper instructions (15 points). – Sophistication of the content and form (5 points). Final assessment (60 points): in order to successfully pass the course, it is necessary to pass the written final examination comprised of theoretical questions and practical problems. To pass the written examination successfully, it is necessary to receive at least 30 points from the maximum number of 60 points (excluding the points received from continuous assessment, active participation in lectures and semester paper). A student who fails to achieve at least 30 points in the written test, i.e. examination, will be awarded the grade FX – Insufficient. Overall assessment: the overall assessment represents the sum of assessments received by the student for the period evaluated, i.e. the sum total of points for active participation in lectures,	

semester paper and final assessment. The overall assessment shall be defined in line with the UJS internal policy (UJS Study Policy) and is based on the following classification scale:

A – Excellent (90–100 %)

B – Very good (80–89 %)

C – Good (70–79 %)

D – Satisfactory (60–69 %)

E – Sufficient (50–59 %)

FX – Insufficient (0–49 %). Credits shall not be awarded to a student who receives fewer than 50 points in the overall assessment.

Results of education:

Knowledge:

The student who has passed the International Taxation course builds on the basic knowledge from the Taxation Basics course and uses the knowledge from the course Corporate Taxes. The student possesses knowledge from the field of international taxation in the Slovak Republic. The student will understand the basic principles of methods to avoid double taxation. The student will acquire theoretical knowledge in the field of tax harmonisation and will demonstrate practical knowledge when solving individual assignments focused on the application of methods to avoid double taxation in the calculation of tax liability of natural persons and legal entities. By passing the course, the student will be able to interpret the content of the individual tax returns of entities that receive income from several countries simultaneously, thereby building especially on the knowledge acquired in the course Corporate Taxes.

The student is familiar with the process of European integration and specialist policies of the European Union related to its activities in the field of taxes and taxation policy.

The student is familiar with the contemporary, theoretically demanding methods to avoid double taxation, methods of recognition, formulation and solving of problems, and knows their deficiencies.

Skills:

Having successfully passed the course, the student:

– Is familiar with the calculation of the all-year taxation liability of a natural person which has an income from employment from several countries simultaneously.

– Is familiar with the calculation of the all-year taxation liability of a natural person which has income under Section 6 or 7 and 8 of the Act on Income Tax from several countries simultaneously.

– Knows the procedures and methods of adjustment of tax base with application of all the basic methods to avoid double taxation.

– Can apply the calculation of tax liability of the value-added tax in taxable transactions between companies identified for tax in various European Union member countries.

– Can formulate independent new conclusions, original ideas, and solutions, can apply demanding methods of analysis and modelling, develop strategies to solve complicated problems, make decisions in the changing Slovak and international environment,

– Will make an individual standpoint based on own analysis, can present and defend it in discussions.

Competencies:

Having successfully passed the course, the student:

– Independently applies the methods of calculation of tax liability of a natural person which has income from several countries.

– Independently fills in the B-type tax return.

– Independently analyses the value-added tax return of a VAT payer in a community acquisition.

- Independently selects and applies relevant methods of problem solving in the fields important from the viewpoint of organisation policy, strategy, and management, independently carries out economic analyses and consultancy tasks.
- Their work is characterised by independent and responsible thinking and consideration of economic and extra-economic consequences when formulating specialist issues.

Brief syllabus:

1. Definition of the basic notions of international taxation
2. Basic principles of international taxation
3. Characteristics and classification of double taxation
4. Avoidance of double taxation
5. International double taxation conventions
6. Taxation in the European Union. Bodies and institutions working in the field of taxation and legal rules of the European Union
7. Harmonisation in the field of direct taxes – income tax of legal entities
8. Harmonisation in the field of indirect taxes – value-added tax
9. Harmonisation in the field of indirect taxes – excise taxes
10. Tax competition in the world.
11. Comparison of the taxation system and taxation policy of Hungary and the Slovak Republic
12. Taxation system and taxation policy of the selected countries of the world
13. International tax planning and tax havens of the world

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ MMLZ/22	Name: International Human Resource Management
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 10s / 5s Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 4.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: Completion of the subject consists of 2 parts: active participation in the seminars and successful completion of the final exam. Active participation in seminars (40 points): Active participation in seminars means solving individual or group tasks. For active participation (solving tasks, participating in case studies) the student can get a maximum of 40 points. Final evaluation (60 points): successful completion of the subject requires the passing of a final exam consisting of a written and an oral part. The maximum score that can be obtained in the final exam is 60 points. A minimum of 30 out of a maximum of 60 points is required to pass the written and oral exam. Overall evaluation (100 points): the overall evaluation represents the sum of the evaluations obtained by the students for the evaluated period, as the sum of the points for active participation in the lectures, and the final evaluation. The student's duty is to successfully pass the final written examination as well as active participation in lectures. The overall result is determined based on the classification scale determined in the internal regulations of UJS: - A - excellent - 90 -100%, - B - very good - 80 - 89%, - C - good - 70 -79%, - D - medium - 60 - 69%, - E- sufficient - 50 -59%. - FX - Insufficient - 0 - 49%. - No credit will be given to a student who passes his / her written exam for less than 50%.	
Results of education: Upon successful completion of the course, students will gain a comprehensive understanding of the drivers and factors that significantly change the activities of human resource management as a result of internationalization and globalization. In the course of the program, we examine the convergent and divergent picture of human resource management (HRM) in the domestic environment with the international HRM (IHRM = MMLZ). Knowledge: Based on the mastering of the subject, students will be able to answer the following: - What IHRM = MMLZ concepts do we work with? How the focus of IHRM = MMLZ changes,	

approaches in the 21st century?

- How do the most important influencing factors and drivers of IHRM = MMLZ develop?
- Who manages human resources? Who makes the decisions of IHRM = MMLZ, who shape the IHRM = MMLZ systems, who performs the IHRM = MMLZ activities?
- What is IHRM = MMLZ, and within it the theoretical / strategic decision-making of each system and function questions, connection points?
- How does IHRM = MMLZ contribute to the development of organizational performance and value creation?
- What are the main goals, characteristics, methods of the different IHRM = MMLZ systems (functions), choice of techniques, application processes, conditions and expected results?
- What innovative solutions have become established in the last few years and what changes can be expected in the application of different IHRM = MMLZ systems?
- What are the characteristics of labor and labor law processes?
- What are they showing? How to develop the application of international and domestic research experiences?

Skills:

- Students able to understand the nature, external-internal relations and relationship of organizational processes an international human resource management.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ OBDF/22	Name: Defending Thesis
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study:	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: <p>In preparing the final thesis, the student follows the instructions of his supervisor and the Rector's Directive on the editing, registration, access and archiving of final theses at J. Selye University. The recommended length of the diploma thesis is 50 to 70 pages (90,000 to 126,000 characters). The deadline for submission of the final thesis is set in the schedule of the relevant academic year. The originality of the work is assessed in the central register of final theses. A report on the originality of the final thesis is prepared on the result of the originality check. Control of originality is a necessary condition of defense. Part of the transfer of work is the conclusion of a license agreement on the use of a digital copy of the work between the author and the Slovak Republic on behalf of the university. The final thesis is assessed by the supervisor and the opponent, who prepares the assessments according to the set criteria. The thesis supervisor assesses the fulfillment of the final thesis, the degree of independence and initiative of the student in processing the topic, cooperation with the thesis supervisor, logical structure of the final thesis, adequacy of methods used, methodology, professional level of work, depth and quality of the topic, contribution of the results , work with literature, relevance of used sources in relation to the topic and goal of the work, formal side of the work, spelling, stylistics and originality. The reviewer assesses the topicality and suitability of the topic, setting the goal of the work and its fulfillment, the logical structure of the final work, the continuity of chapters, their proportionality, suitability and suitability of methods used, methodology, professional level, depth and quality of work, contribution of work, work with literature, formal side of the work, spelling, stylistics and originality. choice of material, through the implementation of research, its ability to evaluate results, discuss results, summarize results, present their importance for the educational process, etc. The ability to present the results, including answering questions related to this research process and the topic of the final thesis, adherence to time limits, etc. is also assessed. During the classification, it comprehensively assesses the quality of the final thesis and its defense, taking into account the assessments and the course of the defense and evaluates the defense with one common mark. The final evaluation can be the same as in the testimonials, but it can also be better, resp. worse, depending on the course of the defense. Final evaluation: A - 100 - 91%, B - 90 - 81%, C - 80 - 71%, D - 70 - 61%, E - 60 - 50%. Credits will not be awarded to a student who does not reach 50%. The decision on the result of the defense will be announced publicly by the chairman of the commission together with the result of the theoretical oral part of the state exam.</p>	

Results of education:

Knowledge: -student knows the structure of scientific publications, -student can independently and creatively use professional sources, -student can analyze and evaluate the current situation in their field, -student can synthesize and apply the acquired theoretical knowledge in practical educational activities, -student can Adequate choices: - by processing the diploma thesis the student has to demonstrate the ability to independently acquire theoretical and practical knowledge and creatively apply and use it in solving specific problems, -student is able to present and defend their expert opinion on the problems of educational work and look for ways to solve them, -student has developed skills to educate himself, which allows him to continue his studies, -student can understand the complexity of phenomena and formulate decisions even with incomplete or limited information, including social and ethical responsibility in applying their knowledge and -student will be able to justify the ideas presented, as well as formulate practical conclusions and recommendations in a cultured way, -student will be able to prepare a presentation of the results of their own research activities, -student will apply the principles of scientific integrity and ethics. culture and own attitude to professional problems of their studies, -student is able to argue and methodically apply knowledge in theoretical, didactic and methodological contexts, -student can implement and synthesize the acquired knowledge in practice, -student can creatively use knowledge in solving tasks, analyze problem and synthesize a new solution, the student is able to answer the questions of the leader and the opponent at the required level so that he successfully defends the final thesis.

Brief syllabus:

The defense of the final thesis has the following: 1.Presentation of the final thesis by the student.2.Presentation of the main points from the written opinions of the supervisor and the opponent.3.Response of the student to the questions of the supervisor and the opponent.4.Professional discussion about the final thesis with questions for the student.Presentation The final work of students should include the following points: 1. Brief justification of the choice of topic, its topicality, practical benefits.2. Clarification of objectives and methods used in the processing of the work.3.Main content problems of the work.4.Conclusions and practical recommendations to which The author has his own copy of the final thesis or electronic presentation. The speech will be delivered independently, in the range of 10 min. He can use computer technology. The final work is available to the commission before and during the defense.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ PRM/22	Name: Project Management
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 5s / 5s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 2.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The assessment and successful completion of the course consists of 3 parts: 1. Active participation in the solution of practical tasks (15 points) - for the successful completion of the subject it is necessary to develop practical skills with individual or group work (individual work based on theoretical knowledge, group solution of case studies). The tasks are solved in writing. A maximum of 15 points can be obtained for solving practical task. 2. Seminar work - project plan (25 points) - prerequisite for the successful completion of the subject is the elaboration of a project plan in groups in writing, based on the acquired knowledge. A total of 25 points can be earned for the part of the project. 3. Final evaluation (60 points) - successful completion of the written final test, which includes theoretical and practical questions, is required for successful completion of the subject. To pass the written test, it is necessary to achieve at least 30 out of the maximum 60 points that can be obtained (in addition to the points earned by Active participation in the solution of practical tasks and the project plan). Complex / final evaluation: the total evaluation is the sum of the points achieved by the student during the evaluated period during the evaluation of the active participation in the practical tasks, the project plan and the final evaluation. The final grade is determined in accordance with the SJE's internal regulations (SJE Study Rules) on the basis of the following six-point grading scale: A - excellent - 90 -100%, B - very good - 80 -89%, C - good - 70 -79%, D - medium - 60 - 69%, E - sufficient - 50 -59%. FX - insufficient - 0 -49%. A student who does not receive a minimum of 50 points from the final grade will not receive credit for this subject	
Results of education: Upon successful completion of the course students will become familiar with the processes of project design and implementation, as well as the organizational role of project management. By completing the course, students will master the methods of project management and differentiate the tools of project planning in theory and practice. Knowledge	

After completing the subject, the student has the following knowledge:

- Knows the planning, management and ethical standards of the company, business organization and project.
- Understands the structure, operation and relationship system of enterprises, the environmental factors that determine the behavior of enterprises, the information and motivational factors of economic decisions.
- Knows the evaluation of financing sources necessary for the implementation of development (change) and the methods of financial return analysis.
- Has extensive management and organizational knowledge.

Skills

Upon successful completion of the course, the student will:

- It formulates independent new conclusions, original ideas and solutions, is able to apply demanding analysis and modeling methods to develop strategies for solving complex problems, to make decisions, in a changing domestic and international environment, as well as in an organizational culture.
- Develops an individual position based on one's own analysis, is able to present it and represent it in a debate.
- Ability to participate in a large and complex project, group problem solving, lead, organize and evaluate the activity as a leader.

Competences

Upon successful completion of the course, the student will:

- Independently selects and applies the relevant problem-solving methods in areas important for organizational policy, strategy and management, and independently performs economic analysis and consulting tasks.
- Analyzes and evaluates the experience of the operation of the company, manages the responsibility that the results obtained during the analyzes and practical procedures also depend on the chosen method.
- Gives lectures and conducts debates independently. Participates independently and responsibly in the work of professional forums inside and outside the business organization.

Brief syllabus:

1. Introduction to project management, projects and project typologies
2. The relationship between project management, project and application
3. Organizational structures of project management. The impact of project offices on project management processes
4. Project life cycle, project process characteristics.
5. Basics of project planning. Stakeholder management, analysis of the environment and influence of stakeholders.
6. Planning project plan activities. Tools for time planning and project execution. Analysis of the opportunities and risks of apparent activities.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ PZP/22	Name: Preparation for Final Work
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: For the study period: 10s Methods of study: present	
Number of credits: 3	
Recommended semester/trimester of study: 6.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The student's work is evaluated on the basis of the following criteria: <ul style="list-style-type: none"> - analytical-synthetic thought processes of the student, - expression of one's own opinion supported by theoretical knowledge, - determination of problems and goals of work, method of processing, - structure of the consulted work - logical continuity and balance of individual parts, - work with literature and information sources (choosing the way to use them), - compliance with basic standards for the formal arrangement of work, compliance with citation standards, - aesthetic and linguistic aspect of the student's work, - fulfillment of tasks agreed with the teacher. The subject evaluates the level of student work and participation in seminars. Final evaluation: A - 100 - 91%, B - 90 - 81%, C - 80 - 71%, D - 70 - 61%, E - 60 - 50%. Credits will not be awarded to a student who does not reach 50%.	
Results of education: Knowledge: The student can: <ul style="list-style-type: none"> - state and explain the general requirements for the creation of the final thesis, describe and characterize the content structure of the final thesis and its individual parts (introduction, main text, appendices), - explain the concepts of phenomenon, fact, state and describe the types of examination of economic phenomena, - characterize in more detail the basic methods of data collection in the final work and the methods of their processing, - name the basic requirements for the author of a professional text, characterize and describe the model, properties of the professional text and its formal construction, - name and explain the formal requirements for the final work, - define the concept of abstract, describe the structure of the abstract, characterize the features of a quality abstract, list the most common mistakes in creating abstracts, distinguish the abstract from annotation, abstract, summary, overview, 	

- explain the terms quote, citation, citation, paraphrase, compilation, plagiarism, distinguish a quote from a paraphrase, illustrate individual techniques of citation and referencing by examples,
- define and interpret in their own words the basic concepts and motives in the field of the chosen topic,
- get to know the basic terms of work,
- clarify the terms used in the work,
- on a theoretical level, create (process) the final work with all the necessary requisites,
- analyze and justify the conclusions of the work,
- critically analyze the acquired knowledge, re-evaluate it and use it in theory.

Skills: The student is able to:

- write a project of their own final work,
- explain the methodological rules of creating a diploma thesis,
- define the problem and goal of the final work, formulate possible hypotheses,
- plan a time schedule for the creation of the final thesis, including the content,
- work with professional literature (with primary and secondary sources, search for information in information book databases),
- on the basis of acquired knowledge to create a text with logical and precise formulation of ideas, to create a quality abstract, to write an introduction, a conclusion to the article, to the final work respecting the set requirements,
- present knowledge in the field, manage its complexity and form judgments,
- apply knowledge of ethics and citation techniques in the creation of professional text,
- use correctly the various methods of citation and reference, recording of bibliographic references,
- at the practical level, create (process) the final work with all the necessary requisites,
- analyze, synthesize and compare knowledge and propose solutions based on it, - draw conclusions and recommendations for practice on the basis of critical analysis,
- critically analyze the acquired knowledge, re-evaluate it and use it in practice,
- present, discuss and justify their knowledge in terms of the planned objectives of the work, - present the outputs of the activity within the whole study group and in front of the teacher and justify their importance and practical application,
- complete the final work and prepare for its public defense,
- classify the strengths and weaknesses of the topic of the final work as well as the work itself,
- critically evaluate the need and possibilities of applying methods and approaches in the chosen work and creatively suggest possibilities of their application,
- independently acquire new knowledge from the chosen field using the acquired skills, - apply theoretical knowledge to economic / managerial practice.

Competences:

The student

- realize the need and importance of adhering to academic ethics and etiquette for his student as well as future life,
- behave in accordance with the rules of social conduct,
- has mastered the basics of social protocol, is able to dress properly and put on a state exam, - respects the ethics of citation,
- expresses its convictions and opinions directly and honestly, but at the same time is able to recognize that the other party also has the right to its own opinion,
- bears the consequences and accepts responsibility for its actions.

Brief syllabus:

1. Science as a part of human culture, scientists and scientists.
2. Institutional provision and management of scientific work.

3. The most important forms of scientific work. Methods and methodology of scientific research.
4. Writing professional and scientific articles and works.
5. Specifics of the work of the community of scientists, evaluation of scientific work and qualifications.
6. Scientific and technical information, basics of scientific ethics, plagiarism.
7. Determining the goals of the bachelor thesis.
8. The structure of the bachelor's thesis and its formal arrangement (internal rules of the university).
9. Preparation of a work plan for a bachelor's project.
10. Compilation of time schedule.
11. Organization and implementation of work, planning of research activities and their implementation.
12. Processing, interpretation of the results of independent scientific work.
13. Presentation of the results of independent scientific work

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Economics and Informatics	
Code: KM/EMPem/ SMN/22	Name: Strategic Management
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: For the study period: 10s / 5s Methods of study: present	
Number of credits: 6	
Recommended semester/trimester of study: 1.	
Level of study: II.	
Prerequisites:	
Conditions for passing the subject: The final evaluation of the student is a comprehensive evaluation of the student's work done during the semester. It consists of three separate partial evaluations. Condition of completing the course: - Elaboration of term paper based on the pre-agreed issue closely related to the theoretical content of the course. It accounts for 20% of the final evaluation. - Elaboration of case study, which accounts for 20% of the final evaluation - Final written test, which accounts for 60% of the final evaluation. Condition for the successfully passed exam is at least 50% success in all parts of the assessment process. The course assessment is in accordance with the Study Regulations of J. Selye University. It is based on the following scale: A – excellent (90-100%), B – very good (80-89%), C – good (70-79%), D – satisfactory (60-69%), E – sufficient (50-59%), FX – not sufficient (0-49%). Credits are not awarded for a student who obtains less than 50 points from the overall assessment.	
Results of education: Successful completion of the course will make the student able to master the basic concepts of strategic thinking and development stages of strategic thinking in terms of global aspect. The student will be able to apply the theoretical and methodological basis of strategic management, prepare strategic analysis and elaborate a company strategy maintaining a logical sequence of steps. The course contributes to acquisition of knowledge, skills and competencies outlined in the course description. Knowledge: The student will understand the structure, functioning and the system of business relations, environmental factors, which determine the steps companies make, as well as the information and motivation factors of economic decisions. The student will obtain extensive managerial and organizational knowledge.	

Skills:

In addition to performing tasks and gaining practical knowledge as well as experience, the student will be able to start a business; plan and manage complex process and manage resources.

Competencies:

The student will learn to be responsible for his/her work, organization or business, the employees he/she is managing, and the business partners.

He/she will identify the problems independently, will plan and organize the overall and professional development of his/her employees, as well as takes on responsibility.
