

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ ANG/22	Name: Language training: English
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: Assesment. Translaton of a scientific study of a freely selected topic, in a length of one authorial sheet; its application into the students' own research project, and a presentation of a prepared scientific article.	
Results of education: Results of education: The student is able to read and understand scientific literature within historical, pedagogical and related scientific disciplines. Further he/she is able to edit scientific texts within his/her fields of interests in foreign language; also he/she is able of engaging critical standoints; to plan and fulfill his/her own research activity and also to publish the achieved scientific goals in foreign language.	
Brief syllabus: Course content: Study of linguistic formulations in scientific disciplines. Basic questions of communication. Components and means of communication process, models of communication. The most important characteristics of language, in its oral and written forms. National, regional and social versions of language. Theoretical background of analyzing texts, main features of spoken and written lectures, i.e. multimedial texts. Typology of texts, methods of interpreting texts. Characteristics of scientific language. Linguistic formulations of research and methodological steps (goals, methods, discussions of results). Questions of preparing a scientific study, of a lecture and the argumentation. Linguistic analysis of a scientific publication, reading and writing scientific texts. Application of results in order to prepre and discuss research results.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ DAD/22	Name: History Didactics
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study: 1.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: E: The assesment of the subject is an examination. Student has to complete a 100-points-test. The treshhold for a successfully completed test is to achieve minimally 50% of the available total points that can be achieved. The scale of the assessment is this: A – 90 -100%, B – 80 -89%, C – 70 -79%, D – 60 - 69%, E – 50 -59%.	
Results of education: Results of education: The absolvent of the study program should have the ability to orientate him or herself in the scientific structures of modern History Didactics, as well as in the circles of historico-didactical research. The aim of the subject is to enhance PhD students in the didactical procedures which can be applied in the historico-didactical research as well as teaching history on all levels of the education process. Knowledge: --The student will know the historical and pedagogical context of history didactics and school teaching of history. Skills: --The student will be able to evaluate the scientific historical processes and pedagogical context of history didactics and school teaching of history, as well as their impact on the educational system. Attitude and responsibility: --The student will be able to apply ethics in his/her own research. --The student will be able to express a critical opinion on the historical and pedagogical context of history didactics and school teaching of history.	
Brief syllabus: Course content: Theory and praxis of teaching history on all levels of education. Key problems of history as a science and as a school subject. Educational system and the social function of history. Strategic goals of teaching history. Strategic goals of historico-didactical research. The system of historico-didactical research at home and abroad. Problems of creating the content of history as a school subject as a didactically structured system. Problems of creating the content of history as a scientific research field.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ DPO/22	Name: Dissertation thesis – defending the thesis
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 30	
Recommended semester/trimester of study: 5., 6., 7., 8..	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: After obtaining at least 150 credits without including the credits allocated for the acceptance of the dissertation, and upon the recommendation of the supervisor, the doctoral student may submit the dissertation and apply for permission to defend it on the prescribed form. The preparation of the dissertation defense is organized by the training department after the doctoral student meets the following conditions: he / she successfully passes the dissertation examination, and submits an application for the dissertation defense on the prescribed form, supporting the relevant documents.	
Results of education: Results of education: The graduate is qualified to perform scientific research and more complex design and development activities in the field of their field. It can focus on more general pedagogical topics and problems or on a specialized didactic area. He is also qualified to work in the further education of teachers and pedagogical staff from the given field.	
Brief syllabus: Course content: The defense of the dissertation work is public. Its program is usually as follows: Opening; Introduction of the candidate; Presentation of goals, achieved results and contribution of the dissertation; Finding the results of the control of originality; Presentation of the Statement of the Theme Leader; Presentation of the Opponents' opinions; The doctoral student's answers to the opponents' comments; Discussion.	
Literature: Literature on the researched dissertation issue according to the individual plan of the doctoral student approved by the supervisor. The current UJS Rector's Directive on final, rigorous and habilitation theses, available on the university's website.	
Language, knowledge of which is necessary to complete a course: Hungarian or Slovak or Englis

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ DSP/22	Name: Dissertation examination – written work
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 10	
Recommended semester/trimester of study: 3., 4., 5., 6..	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: The content of the Dissertation thesis – written work is (1) defending the written work of the examination, and (2) an oral examination based on the syllabus approved by the doctoral board. The doctoral student will apply if he / she has 60 credits, including 40 credits for the Study part. An intern student can apply 18 month after starting his/her study (at earliest); an extern student can apply 24 month after starting his/her study (at earliest). For the Scientific part the student can get 20 credits. Other conditions for granting consent to take the dissertation examination: obtaining the prescribed number of credits, handing over a printed study report with an overview of the credits obtained, and completing compulsory subjects (regulates the doctoral student's study plan). The dissertation examination is usually required no later than: (a) completion of the fifth semester of study for full-time doctoral students, (b) completion of the seventh semester of study for external form of doctoral students. The written work for the dissertation exam has at least 1.5 author's sheets (30 pages) and contains in particular: the aim of the dissertation, the current state of knowledge (research) on the issue, analysis and justification of the methodological approach in solving the issue, outline of the theoretical foundations of the future solution, formulation of hypotheses and proposal of research strategy, contribution of the work, overview of the studied literature on the given issue, processing of partial results from the first year of solving the problem, structure of the future dissertation work (dissertation project).	
Results of education: Results of education: In the written work, the doctoral student is able to demonstrate skill in working with literature, mastery research methods and partial results of the dissertation. He is able to formulate theoretical background and goals of the dissertation. Can respond to questions and suggestions of the opponent and the trainer, argue and defend the written work. The written work for the dissertation exam and its defense and the oral exam are the content of the dissertation exam, for which the student will receive 10 credits.	
Brief syllabus: Course content: Dissertation thesis – its part, a written work.	
Literature:	

Literature on the researched dissertation issue according to the individual plan of the doctoral student approved by the supervisor. The current UJS Rector's Directive on final, rigorous and habilitation theses, available on the university's website.

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ MAE/22	Name: Aspects of education management
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 3.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: Conditions for passing the subject: The student prepares a chapter of his / her study for the dissertation exam, or a chapter for his / her dissertation, with a min. of 1/2 author's sheet, for which he / she can get 70 points. The chapter will be analytical or comparative, focusing on a selected aspect of education policy, with an emphasis on the topic of the dissertation. The student makes a presentation on the given topic, which will be successfully defend. The student receives 30 points for the presentation. Criteria for the evaluation of an analytical or comparative scientific study (70 points): – review the relevant international papers related to the topic of the dissertation (20 points), – the cultural-historical and social contexts of the global educational policy tendencies related to the topic of the dissertation and their historical-cultural background (20 points), – review and evaluation of the application possibilities of international global trends in context of the relations between Slovakia and the topic of the dissertation (20 points), – suitability, correctness, relevance of the applied literature sources (10 points). The student prepares a presentation which he / she successfully defends. Evaluation criteria of the presentation (30 points): – presentation and communication skills (10 points), – reasoning, justification, answering questions in the extended concept of the project and the phenomenon analyzed (20 points). Evaluation: A – 90-100%, B – 80 -89%, C – 70 -79%, D – 60 - 69%, E – 50 -59%.	
Results of education: Results of education: Knowledge the student understands the cultural-historical and political contexts of current global trends in education policy and their historical and cultural background, the student is able to identify changes in the education system in terms of legal standards and European trends, the student will be able to explain the importance of regulation in the operation of education. Abilities The student will be able to evaluate ongoing reforms in education policy in the world and in Slovakia to anticipate their potential impact on the education system. Attitude	

the student can express a critical opinion on the reforms of the EU school system, the student adheres to the ethics of pedagogical research.

Autonomy and responsibility

the student will be able to analyze existing statistical reports on European education systems, the student will be able to critically review the application possibilities of international global trends in education policy in Slovakia,

the student will be able to prepare analytical or comparative scientific study focusing on a selected aspect of education policy that he / she successfully defends.

Brief syllabus:

Brief syllabus: Education policy. Global trends in education. European Union and national school systems. Stages in forming European education policy. Macro-, meso- and micro-level problems and ways of the political agenda, political cycle. Education and other subsystems of society. Structural and cohesion policy and their impact. The division of powers, the situation of the state, public administration bodies, local government bodies, citizens. Criteria and norms, standards, indicators and benchmarking, statistical characteristics of education systems. The relationship between education and the labor market.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ MHV/22	Name: Methodology of historical research
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study: 2.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: E: The assesment of the subject is an examination. Student has to complete a 100-points-test. The treshhold for a successfully completed test is to achieve minimally 50% of the available total points that can be achieved. The scale of the assessment is this: A – 90 -100%, B – 80 -89%, C – 70 -79%, D – 60 - 69%, E – 50 -59%.	
Results of education: Results of education: The student will be able to acquire, explain and correctly use in their own pedagogical research adequate theoretical starting points of the methodology of educational sciences. He will gain the ability to develop his own research project in the field of teaching the teaching of history, as well as issues of historical traditions, narratives. Can be innovative in the research of didactic and content issues of history of pedagogy and education, the main purpose of teaching historical sciences. Based on well-formulated hypotheses, he will be able to apply appropriate research methods in his own research. Gain the ability to accurately analyze texts, statistics, materials that will reflect the results of experiments and observations. An impartial and factual interpretation of the source base is able to deal with the dilemmas of methodological nationalism and other subjective, non-scientific, ideological influences on the elaboration of the research plan. For a successful defense, he will gain an international overview of the current results of research on the subject. Knowledge: --The student will know the historical and pedagogical context of history didactics and school teaching of history. Skills: --The student will be able to evaluate the scientific historical processes and pedagogical context of history didactics and school teaching of history, as well as their impact on the educational system. Attitude and responsibility: --The student will be able to apply ethics in his/her own research. --The student will be able to express a critical opinion on the historical and pedagogical context of history didactics and school teaching of history.	
Brief syllabus:	

Course contents: Scientific approaches and methods to school education research in the field of teaching history, national and world history. The place of the history of education and pedagogical research in European, Slovak and Hungarian historiography. Comparative methods and discursive analysis in research

- Traditions and narratives of the history of education in the framework of classification of pedagogical sciences.
- Theoretical, conceptual and methodological foundations of empirical research in the teaching of history, art history, literature, etc.
- Comparative approach in research. Sources and theoretical basis of quantitative and qualitative pedagogical research of teaching historical subjects.
- Preparation, phases and design and strategy of own research. Research objectives, hypotheses and research questions.
- Methods in pedagogical research: content analysis of texts, collection and processing of statistical data. Planning experiments, observations in the wedding and educational process.
- Quantitative and qualitative research methods: observation and comparison, standardized and non-standardized research tools in pedagogy.
- Basic methods of statistical data processing. Presentation.
- the results of the methodological part of the research project of the own research area.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ MSM/22	Name: Mathematico-statistical methods in paedagogical research
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study: 2.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: E: Exam. Preliminary assessment: creating databases based on the results which the student gains from his/her research examination within his/her field of interest – 30 points. Proper usage of preliminary hypothesizes and proper application of statistical measure procedures – 70 points. Final assessment: based on the preliminary assessment.	
Results of education: Results of education: Students will deepen and expand their knowledge of various methods of pedagogical research, enrich their knowledge of basic concepts in the field of statistics. Upon successful completion of this course, students will be able to: <ol style="list-style-type: none"> 1. appropriately apply statistical judgments for the parameters of the two basic sets, 2. analyze the relationship between two statistical variables by regression and correlation analysis, analysis of variance and analysis of categorical data, 3. verify the assumptions of statistical methods, 4. know the basic techniques of quantitative and qualitative analysis, statistical techniques, and processing of empirical materials and verification of hypotheses. Knowledge: --The student will know the historical and pedagogical context of history didactics and school teaching of history. Skills: --The student will be able to evaluate the scientific historical processes and pedagogical context of history didactics and school teaching of history, as well as their impact on the educational system. Attitude and responsibility: --The student will be able to apply ethics in his/her own research. --The student will be able to express a critical opinion on the historical and pedagogical context of history didactics and school teaching of history.	
Brief syllabus: Course content: Educo-metrology - pedagogical research and its methods. Experiment as a method of verifying the truth of hypotheses. Data collection, various techniques in connection with usability in pedagogical research. Statistics - definition, terms. Exploratory analysis, hypothesis testing,	

correlation analysis, work with statistical software. Evaluation of measured data and interpretation of obtained results.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ NEM/22	Name: Language training: German
Types, range and methods of educational activities: Form of study: Seminar Recommended extent of course (in hours): Per week: 1 For the study period: 13 Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 2.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: Assesment. During the semester, the student has to write an abstract of a freely selected topic concerning his/her thesis, and to present it. At the end of the semester he/she has to handle in a seminar work of a freely selected topic. For the abstract he/she can get 10 points, for the presentation 20 points, and for the seminar work 30 points. The assesment scale: A (60–54 points), B (53–48 points), C (47–42 points), D (41–36 points), E (35–30 points). If the student achives less than 30 points, he/she will not be given credits (Fx).	
Results of education: Results of education: The student is able to read and understand scientific literature within historical, pedagogical and related scientific disciplines. Further he/she is able to edit scientific texts within his/her fields of interests in foreign language; also he/she is able of engaging critical standoints; to plan and fulfill his/her own research activity and also to publish the achieved scientific goals in foreign language.	
Brief syllabus: Course content: The subject concentrates on writing abstracts in a foreign language, and to apply proper citacion and paraphrazation techniques. Based on different types of scientific texts, students are able to use methods of interpreting texts, mainly the lexical structures of the scientific language. Durig the semester the student is supposed to be able to write and prepare his/her thesis for scientific discussion.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ PVD/22	Name: Selected topics from the World history
Types, range and methods of educational activities: Form of study: Lecture Recommended extent of course (in hours): Per week: 2 For the study period: 26 Methods of study: present	
Number of credits: 7	
Recommended semester/trimester of study: 4.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: E: The assesment of the subject is an examination. Student has to complete a 100-points-test. The treshhold for a successfully completed test is to achieve minimally 50% of the available total points that can be achieved. The scale of the assessment is this: A – 90 -100%, B – 80 -89%, C – 70 -79%, D – 60 - 69%, E – 50 -59%.	
Results of education: Results of education: After finishing the subject, student should be professionally competent in orientation within the scientific problems concerning political and social history of the most renowned European and non-European states, including USA, China, Russssia, and Japan as well as international events, mostly from the 19th and the 20th centurty. Knowledge: --The student will know the historical and pedagogical context of history didactics and school teaching of history. Skills: --The student will be able to evaluate the scientific historical processes and pedagogical context of history didactics and school teaching of history, as well as their impact on the educational system. Attitude and responsibility: --The student will be able to apply ethics in his/her own research. --The student will be able to express a critical opinion on the historical and pedagogical context of history didactics and school teaching of history.	
Brief syllabus: Course content: Political and economic aspects of the development of the world from the First World War to the present. Characterization of international events of the 19 and 20th century. The political and economic history of the dominant European and non-European countries 19-21. century. Basic features and processes of international political relations: bipolar and multipolar world order, hotbeds of international conflicts, political right and left, decolonization process and post-colonization discourse, war conflicts in the world. Integration and disintegration processes in the world in 19-21. century.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ SVOC/22	Name: Active participant at the Scientific Student Conference
Types, range and methods of educational activities: Form of study: Recommended extent of course (in hours): Per week: For the study period: Methods of study: present	
Number of credits: 5	
Recommended semester/trimester of study: 1., 2., 3., 4., 5., 6., 7., 8..	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: Active participation, i.e. presenting an own work at the Scientific Students Conference.	
Results of education: Results of education: The student is given a credit when he/she actively and creatively participates, i.e. presents an own work at the Scientific Students Conference.

INFORMATION SHEET

Name of the university: J. Selye University	
Name of the faculty: Faculty of Education	
Code: KHI/DDed/ TVP/22	Name: Establishing a scientific research project
Types, range and methods of educational activities: Form of study: Lecture / Seminar Recommended extent of course (in hours): Per week: 1 / 1 For the study period: 13 / 13 Methods of study: present	
Number of credits: 8	
Recommended semester/trimester of study: 2.	
Level of study: III.	
Prerequisites:	
Conditions for passing the subject: E: The subject ends with an examination. The student will be assessed at the end of the semester on the basis of his/her research project which has to contain detailed methodological description of the starting points. The following aspects will be assessed: the research problem elaborated clearly and concisely; clear goals of the research project; detailed stages and tasks of the research problem; operationalization of the hypotheses; selection of proper methodology; the proper direction and clear description of the research strategy. Maximum 100 points. The threshold for a successfully completed test is to achieve minimally 50% of the available total points that can be achieved. The scale of the assessment is this: A – 90 -100%, B – 80 -89%, C – 70 -79%, D – 60 -69%, E – 50 -59%.	
Results of education: Results of education: The student will be able to master, explain and correctly use the theoretical basis of the methodology of educational sciences in their own design of scientific pedagogical research. He will be able to develop his own research project with a clearly formulated research problem, goal, tasks, or hypotheses. He will be able to select and apply an appropriate strategy and research methods for his own research. Will be able to plan, analyze and evaluate the results of preliminary research and interpret them logically, factually and correctly. Can eliminate subjective influences on research findings. He can successfully defend the project.	
Brief syllabus: Course content: Science, its aspects and features. Classification and history of the pedagogical research. Theoretical, historical and empirical research. Comparative aspects of research. Qualitative and quantitative research. Different phases of qualitative and quantitative research. Planning a research. Aims, goals, hypotheses and research questions of a research. Working with scientific literature. Strategies of a research. Methods of a pedagogical research. Objectivity, validity and reliability of research methods and means. Qualitative and quantitative research methods. Experiment. Standardized and non-standardized research methods in the pedagogical research. Presentation of the results and methods of the scientific research. Ethical rules in the pedagogical research. Ethical rules and their respect during the planning, carrying out and publishing research results. Potential impact of the subjectivity of the researcher on the research project.
